April 26, 2007

Dear Interested Party:

The California Department of Transportation (Caltrans) announces the upcoming construction of State Route 63 – Mooney Boulevard 6-Lane Widening Project. This project will upgrade just over 2 miles of Mooney Boulevard from a four-lane to a six-lane divided highway from Packwood Creek to Noble Avenue.

Construction for the Mooney Boulevard Widening Project will begin in January 2008 and additional project information will be available prior to construction. As part of pre-construction activities related to the Mooney Boulevard Project, local utility companies will begin utility relocation work as early as May 2007. I, along with Caltrans Utility Coordinators, will work with the utility companies to ensure that up to date project information and current work schedules are made available to the public.

Caltrans recognizes the potential impacts utility relocation and construction activities can have and we are committed to minimizing the inconvenience as well as keeping the public informed of when and where work will take place. If you would like construction update information throughout the project, please take a moment to review and complete the enclosed Public Interest Form. This will ensure that we sent you project information as it becomes available.

If you have any questions regarding this or any other Caltrans project, please feel free to contact me at (559) 651-8313 and I will try to answer your questions and/or facilitate a resolution with our Construction Department. Thanks again for your patience and understanding during the construction phase of this important project in the City of Visalia.

Sincerely,

A handwritten signature in blue ink that reads "Gloria Samaniego".
