

Sustainable DOT

Caltrans 2015

What is Sustainability?

That depends on who you ask.

The 2005 World Summit on Social Development identified sustainable development goals, such as economic development, social development and environmental protection. This view has been expressed as an illustration using three overlapping ellipses indicating that the three pillars of sustainability are not mutually exclusive and can be mutually reinforcing

So who should we ask?

The EPA

The US Chamber of Commerce

Your Neighbor

What is sustainability?

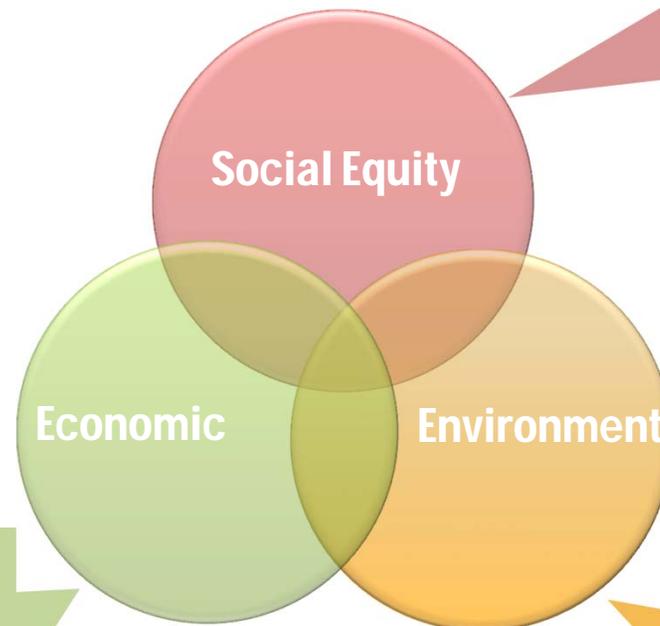

Sustainability is balanced, long-term stewardship of **economic**, **environmental** and **social** resources now and for future generations.

USEPA- (3P's)

FHWA-Triple Bottom Line (3E's)

Caltrans- California Transportation Plan (3E's)

What is Sustainability in Caltrans?

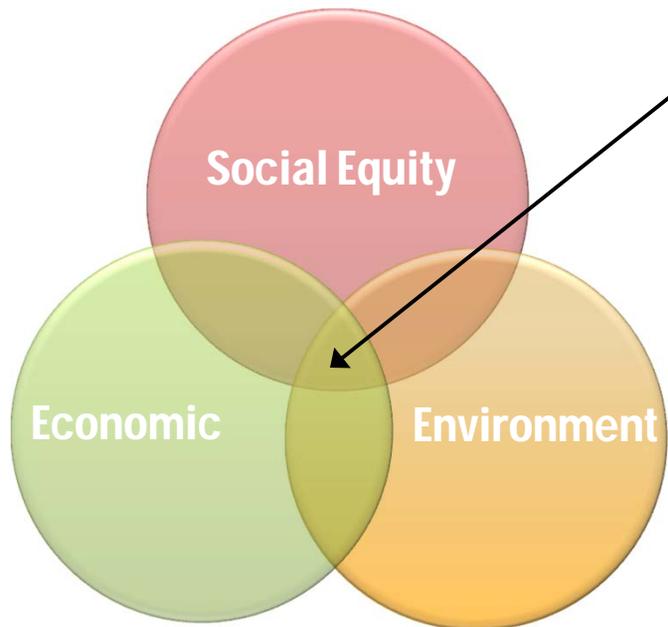

Policies and procedures that improve the safety, health and **quality of life for workers, travelers and communities.**

Balanced life-cycle and **investment** considerations to ensure prudent fiscal and system asset management decisions.

Compliance with legal mandates and proactive decision-making that improves ecological **health** and resiliency.

Plus Innovation & Partnership

Getting here also requires:

partnerships & innovation.

- Sustainability goals require collaborative and integrated decision-making with local, state and federal **partners** and stakeholders
- Innovation is required to meet evolving sustainability challenges.
