WHAT IS BEING PLANNED?

The California Department of Transportation (CALTRANS), as CEQA lead agency, and the Federal Highway Administration, as NEPA lead agency, and with support from the Inyo County Local Transportation Commission propose to convert approximately 12.6 miles of the existing U.S. Highway 395 from a two-lane conventional highway into a four-lane expressway or partial four-lane conventional highway conventional four-lane highway from post mile 29.2 to post mile 41.8 in Inyo County. The project proposes five build alternatives with varying amounts of construction on new alignments. The new facility would have four 12-foot lanes with a median of variable width. The proposed project would improve highway operation and safety for both the interregional and local traveler.

WHY THIS PUBLIC NOTICE?

CALTRANS has studied the effects this project may have on the environment. Our studies show it will not significantly affect the quality of the environment. The results of our studies are explained in a report called a Proposed Negative Declaration and Initial Study/Environmental Assessment. This notice is to tell you of the preparation of this report and of its availability for you to read. A hearing will be held to give you an opportunity to talk about the report and proposed project alternatives with CALTRANS staff before the preferred alternative is selected. The tentative project schedule will be presented, including the environmental process and project construction.

The Proposed Negative Declaration and Initial Study/Environmental Assessment are available for review and copying at the CALTRANS District 9 Office, 500 South Main Street, Bishop, on weekdays from 8:00 a.m. to 5:00 p.m. The document is also available at the Lone Pine Library, located at the corner of Washington and Bush Streets in Lone Pine.
