ELIGIBLE PROJECTS
and ACTIVITIES

Normally, eligible work must be within the right-of-way limits of the damaged Federal-aid highway facility. A minimum $5,000 in repair cost per site should be used to determine if the extent of repair work at a site is beyond the scope of heavy maintenance. Title 23 Code of Federal Regulations (CFR), Part 668, subpart A includes a $700,000 (federal share) disaster eligibility threshold to distinguish between heavy maintenance or routine emergency repair and serious damage eligible under the ER program. See the FHWA ER Manual Chapter 2 http://www.fhwa.dot.gov/reports/erm/ermchap2.cfm#b for ER eligible items of work.
