**Table 4: Project Summary**

**a) Project Description** - Describe the project in your own words, using comprehensive overall project description regarding improvements to be made, increased level of service and performance goals.

Similar to the existing and potentially expanded route 290, this new freeway express pilot program serving Yucaipa, Redlands, Hospitality Lane and San Bernardino Transit Center will provide a similar convenience and benefit. Shortened commute time and removing people from a single occupant vehicle are some of the benefits.

**c) Project Life** - For capital projects, state the Useful Life of the Project. For operations project state the number of months service will operate.

### PROJECT DESCRIPTION AND ALLOCATION REQUEST (BENEFITS/OUTCOMES)

**Table 5: Description of Major Benefits/Outcomes**

**a) Greenhouse Gas Reduction** - Describe how this project will reduce greenhouse gases and any assumptions or data that support this description. For example, "The expanded transit service will reduce VMT and greenhouse gas emissions by replacing auto trips with transit trips. Initial estimates indicate that the expansion could add 50 commuter bus riders per day to replace an average auto trip of 10 miles each way." If available, please provide the expected amount of VMT reductions and greenhouse gas reductions.

Our freeway express service will allow for shorter trips over a greater mileage.

*more information needed.*

**b) Increased Mode Share** - Describe how this project will directly increase mode share.

Implementing a new freeway express service and developing a new service will increase mode share by expanding the mileage that this mode of transportation is available. For those riders that would have changed modes sooner, this expansion alleviates the need to do so.

**c) Disadvantaged Communities (DAC) Project Criteria**

See Attachment B for DAC Criteria to Evaluate Projects (example: Category 1B Project provides transit incentives to residents with a physical address in a disadvantage community (e.g., vouchers, reduced fares, transit passes).

**d) Disadvantaged Communities (DAC) (if applicable\*)** - Describe how this project will directly benefit the DAC(s) within your service area in your own words. For agencies whose service area includes disadvantaged communities, at least 50 percent of the total moneys received shall be expended on projects that will benefit disadvantaged communities.

f) **Co-Benefits** - Describe benefits indicated above in d) and any other benefits not listed.

**The freeway express programs (290 and Yucaipa Freeway Express) express benefit the community by expediting bus travel across Omnitrans 480 mile service area. Each route reduces travel time by bus more than 50% and each route terminates at a multi-modal transit center with connections to Metrolink. This expedited bus service increases the likelihood of bus use and the interconnectivity promotes multi-modal travel.**

**The OmniGo Ontario Airport shuttle service connects Airport focused service with Omnitrans broader fixed route network and also to the Rancho Cucamonga Metrolink station. This increase provides for improved multi-modal connectivity. The shuttle also is designed to augment existing hotel shuttles by running one connected system of shuttles rather than dozens of independent shuttles. Doing so increases system wide efficiencies, reduces emissions and improves reliability.**

## PROJECT DESCRIPTION AND ALLOCATION REQUEST (OPERATIONS DESCRIPTION)

### Table 7: Operations Project Description

a) Describe the operating plan for this system.

The Freeway express buses will run like Omnitrans existing freeway express service. Buses will be used at peak hour only to maximize cost effectiveness. The routes and services will operate, be maintained and marketed along with Omnitrans network of existing services.

b) Describe the fare structure for this system.

Fare will be our standard rates including Full Fare, S&D Fares and Youth Fare.

*Please provide attachments*

c) Describe the assumptions and process that were used to develop the ridership projections shown in the request.

The assumptions are that ridership per service hour will be similar on these routes as on similar existing services serving similar demographics. Omnitrans has operated one freeway express route for many years and there is an established ridership pattern on it. The ridership levels on additional freeway express routes are expected to be similar per unit of service that is rendered.

d) Describe the assumptions and process for how the operating cost projections were developed.

Prior year data and similar project scopes are used to develop projections. *More information*
