

# **RURAL STATEWIDE GOOGLE TRANSIT IMPLEMENTATION PROJECT – PHASE 2 UPDATE**

The Rural Statewide Google Transit Implementation Project is the second phase of a comprehensive project to continue California's rural statewide implementation of Google's trip planner. Eastern Sierra Transit Authority, as the lead agency, will manage the project which has two components-project implementation and maintenance. Implementation of Google Maps/Transit will occur in nine rural counties and identified counties will receive three years of annual subscription fees for the Google Transit Feed Specification (GTFS) publishing tool.

## **PROJECT KEY DATES**

- July 15, 2011: Eastern Sierra Transit Authority Board of Directors approved agency recommendation of Trillium Solutions to complete transit operator integration into Google Maps/Transit online transit trip planner.
- August 1, 2011: Trillium Solutions began working on the project.
