

IT ONLY TAKES A SECOND TO CRASH.

Make a difference. Live to tell about it.

TIP #1

When you see orange cones, slow down in advance. You risk losing a couple of seconds, but it could mean your life.

TIP #2

Merge early. Waiting often results in a deadly chain reaction of multiple rear-end collisions further back down the line.

TIP #3

No phone in a Cone Zone. Cell phones are a major distraction. The cones mean it's time to pay attention. No call is worth your life.
