Section 6-2.01. Use on projects with job-produced materials including subbases, bases, bituminous seals, HMA pavements, concrete pavements and concrete if the project is more than 50 miles:
1. From the district testing laboratory for any job-produced material
2. From METS in Sacramento for job-produced materials with cement
3. From either METS or the southern regional lab in Fontana for job-produced materials with asphalt binder

Contact the district construction office for questions on testing laboratory locations relative to the project's location.
Use with SN-025 throughout 2015

Add to section 6-2.01:
Provide a commercial shipping service for the Department's use for delivering acceptance samples to testing laboratories. The service must pick up the samples from the Engineer's field office.
