

24-Hour SWPPP Training Workshop For Contractors

CALIFORNIA DEPARTMENT OF TRANSPORTATION

Meets Section 500.7 of the CalTrans SWPPP

Rainfall can cause many problems for construction sites. Runoff water can flow through stockpiled construction material and pick up pollutants or across disturbed soil areas and pick up sediment. The runoff typically ends up in streams or rivers that flow to the ocean. A Storm Water Pollution Prevention Plan (SWPPP) is required for any construction projects that disturb one acre or more of soil.

Global Environmental Network, Inc. offers several SWPPP training workshops, from a 4-hour Basics of BMPs to the 24-hour SWPPP Development, Preparation, and Implementation Workshop for Contractors. We can customize courses as needed. The SWPPP Training Workshop will allow you to:

- **Meet the minimum 24-hours of storm water management training required to become a Water Pollution Control Manager**
- **Review major changes in the state and federal Stormwater Programs**
- **Review of the NEW CDOT WPCP and the SWPPP Templates**

Visit: www.My-DVBE.com
for more SWPPP information!

« 2007 Schedule »

Training Dates	Cost Per Person
Oakland April 4-6 June 6-8	Oakland AGC: \$620 Non-AGC: \$670
Oceanside June 18-20	Oceanside AGC: \$570 Non-AGC: \$620
Santa Ana April 30 - May 2 May 14-16 May 21 - 23	Santa Ana AGC: \$540 Non-AGC: \$590
