EXECUTIVE SUMMARY

Several Initial Site Assessment (ISA) studies were conducted for Caltrans District 7, as part of the Infiltration Basin Site Selection Study. The ISA studies were conducted on properties that have been identified as potential sites for infiltration basins within the Department's right-of way. The ISA studies are to be incorporated into the secondary site screening process of the Infiltration Site Selection Study. The ISA reports have been completed on individual sites. This report presents the findings for a site located adjacent to the northbound off-ramp of the 710 Freeway at the Olympic Boulevard, and is referenced as site 710-10 (Olympic Blvd.). Site 710 -10 (Olympic Blvd), is located within the city of East Los Angeles, Los Angeles County, California. The following is a summary of our findings, based on the scope of services presented in the Caltrans Infiltration Basin Site Selection Report.

The subject site is located adjacent to. Recognized Environmental Conditions (RECs), as defined by ASTM Practice, were not observed during the site reconnaissance.

Review of historical data indicated that the sites were undeveloped prior to the 710 Freeway construction in the early 1950s. Recognized Environmental Conditions (RECs) were not noted in the historical documents reviewed.

A review of the environmental database report indicates no listing of the site for environmental conditions. RECs were not noted in the agency database report review.

This Executive Summary is not intended to be a "stand-alone" document, but a summary of our findings as described in the following report. It is intended to be used in conjunction with the scope of services and limitations described therein.

1.0 INTRODUCTION

1.1 Purpose

The purpose of the Initial Site Assessment (ISA) was to gather information regarding site 710-10 (Olympic Blvd) in order to evaluate whether features and conditions of potential environmental concern exist in association with the subject sites and the adjoining properties..

1.2 Scope of Services

The original scope of work for this ISA was described in the Contract 43A00, Task Order #31, and amended by verbal agreement for Priority 4 (I-710 sites) and Priority 5 (I405 sites), as defined in the Caltrans Infiltration Site Selection Study. Based on the Scope of Services, the ISA specifically did not include testing for asbestos, lead-based paint, radon gas, or lead in drinking water; sampling or testing of soil or groundwater; or evaluation of wetlands or cultural resources. In addition, this ISA did not include a compliance audit.

1.3 ASTM Standard

This report was prepared in general conformance with the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Standard E 1527-00). This standard defines a Recognized Environmental Condition (REC) as: "The presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 Location and Legal Description

The subject site is located within the city of East Los Angeles, Los Angeles County, California. The site is located within the interior portion of the northbound off-ramp of the 710 Freeway at Olympic Boulevard. The subject site is identified as 710-10 (Olympic Blvd).

2.2 Physical Setting Analysis

The subject sites are located approximately 25 km (15 miles) south of the San Gabriel Mountains, approximately 35 km (21 miles) east of the Santa Monica Mountains within the north-central portion of the Los Angeles Coastal Plain within a physiographic feature known as the Downey Plain. The Downey Plain is a depositional feature formed by coalescing alluvial fans deposited by the Los Angeles River and Rio Hondo-San Gabriel Rivers systems and slopes gently to the south. The subject site is located on the U.S.G.S. Los Angeles topographic map, R12W, T2S, Section 7 (photorevised 1994).

2.2.1 Aquifer Descriptions

The site is located within the Central Basin, a hydrographic area that extends over most of the Los Angeles Coastal Plain. The Central Basin is divided into several smaller hydrologic areas and the site is found within the Los Angeles Forebay Area Basin. Groundwater in this area is under semi-confined to confined conditions. Approximately 100 feet of alluvium, which includes the Bellflower Aquiclude, under lie the site.

2.2.2 Geologic Units

Quaternary deposits of alluvium and floodplain deposits are mapped in the area and generally consists of coarse and unconsolidated (e.g. sand and sandy gravel), and fine-grained silts and clays are also very common. Sediments in the site vicinity are mainly river deposits that were laid down prior to channelization of the Los Angeles River. The area is underlain by alluvial and flood plain deposits that comprise the Lakewood Formation.

2.2.3 Location and Use of Groundwater Monitoring Wells in the Subject Corridor Vicinity

Depth to groundwater measurements made by the Los Angeles Department of Public Works, Hydrologic Records section on November 15, 2001 indicate that depth to groundwater from well #2838 was approximately 124.5 feet (38 meters) below ground surface (bgs), located less than 0.32 km (0.2 miles) southwest of the subject site. Regional direction of groundwater flow is generally to the south.

2.3 Subject Site and Vicinity Characteristics

Observations and evaluations of adjoining properties were limited to features and conditions that were visible from public rights-of-way. The following observations were made:

North: Commercial properties including LA Globe Barrel and Drum Co. and Sloan's Dry Cleaners with single-family residential beyond.

South: Interstate 5 Freeway.

East: Commercial properties including Pierce Bros. Funeral Home with small commercial businesses, residential properties, and an ARCO Service Station beyond.

West: Interstate 710 Freeway with commercial properties located beyond.

The vicinity of the subject site is primarily commercial properties. Residential properties are located approximately 0.2 km (0.12 miles) north and east of the site.

2.4 Descriptions of Subject Site Structures and Improvements

The subject site includes the interior portion of the northbound off-ramp. There are no structures located within the subject sites. The site is landscaped with trees, grasses, and ice plant. Site photographs are included in Appendix K-I.

2.5 Current Uses of Subject Site

The subject site is a landscaped interior portion of the northbound off-ramp of the 710 Freeway at Olympic Boulevard.

2.6 Past Uses of the Subject Site

Prior to the construction of the 710 Freeway, the site was single-family residential.

2.7 Current and Past Uses of Adjoining Properties

Current and past uses of adjoining properties were determined during the site inspection as well as through reviews of historic and current aerial photographs (Appendix K-II).

YEAR	DIRECTION FROM SITE	DESCRIPTION
1928	North	The site appears occupied by dense residential development and is surrounded on all sides by surface streets with residential development to the north.
1928	South	Residential development is present adjacent to the south with more residential development beyond.
1928	East	Residential development is present to the east with more residential development beyond.
1928	West	Residential development is present to the west with more residential development beyond.
1949	North	The site appears relatively unchanged with the exception of Olympic Boulevard being rerouted to cross the site in an east-west alignment. Significant changes were not observed to the north of the site.
1949	South	Significant changes were not observed to the south of the site.
1949	East	Significant changes were not observed to the east of the site.
1949	West	Significant changes were not observed to the west of the site.
1954	North	The subject site has been cleared of all residential structures except one located at the northeast. Significant changes were not observed to the north of the site.
1954	South	All residential structures located adjacent to the south and southwest of the site have been removed and replaced by vacant graded land.
1954	East	Significant changes were not observed to the east of the site.
1954	West	Residential structures have been cleared of the area located adjacent to the west. Residential property remains present beyond. A small structure possibly indicative of a gasoline

YEAR	DIRECTION FROM SITE	DESCRIPTION
		station was observed at the northwest corner of the intersection of the Eastern and Olympic Avenues.
1965	North	The subject site appears occupied by vegetation and is part of a freeway interchange easement. The 710 Freeway has been constructed and continues to the north.
1965	South	The 710 Freeway is present adjacent to the south and continues south.
1965	East	Several houses appear to have been removed from the area nearest the freeway easement in an area now noted as vacant. Significant changes were not observed to the eastern site vicinity.
1965	West	The 710 Freeway is located adjacent to the west of the site with commercial structures located beyond.
1976	North	The subject site and area located adjacent to the north appears unchanged from the previous photograph.
1976	South	The area located adjacent to the south appears unchanged.
1976	East	The area noted as vacant is now occupied by a large rectangular commercial structure. Residential property is located beyond.
1976	West	Significant changes were not observed to the adjacent properties or vicinity west of the site.
1989	Site	Significant changes were not observed to the site, adjacent properties or vicinity in the 1989 aerial photograph.
1994	Site	Significant changes were not observed to the site, adjacent properties or vicinity in the 1994 aerial photograph.

2.8 Historical Use Information

Features of an environmental concern were not observed on the historical aerial photographs of the site.

3.0 RECORDS REVIEW – STANDARD ENVIRONMENTAL RECORDS SOURCES

Information was gathered and reviewed from environmental databases. The databases include the most recent federal, State, and local lists of registered and contaminated sites, as well as sites using hazardous substances, were examined for evidence of recognized environmental conditions in connection with the subject site. It should be noted that this information is reported as it is provided in various government databases. It is not possible to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. A copy of the database report and a map showing the relative locations of reported site are presented in Appendix K-III.

3.1 Federal

U.S. EPA National Priority List (NPL): Sites with significant risk to human health and the environment which are qualified to receive remedial funding under the Superfund provision of the Comprehensive Environmental Response Conservation and Liability Act (CERCLA). Minimum search distance = 1.6 kilometer (km) (1 mile).

- No NPL facilities were reported for the subject sites or adjoining properties.

U.S. EPA Comprehensive Emergency Response, Compensation and Liability Information System (CERCLIS) and No Further Remedial Action Planned Report (NFRAP): Information in this database is used to report official Superfund progress and to help EPA regional and headquarter managers evaluate the status and progress of site cleanup action. The NFRAP is also known as the CERCLIS Archive, containing sites that have been removed from the CERCLIS database. Minimum search distance = 0.8 km (0.5 miles).

- No CERCLIS and/or NFRAP facilities were reported for the subject site.
- One site within the vicinity is listed as a CERCLIS site; 1) National Lighting Supply Form was identified at 1365 South Eastern Avenue, approximately 0.4 km (0.25 miles) southwest of the subject property.

Due to the relative location of this site, the potential for this facility to have created a REC at the sites appears low.

U.S. EPA Federal Resource Conservation and Recovery Act (RCRA) Corrective Action Report (CORRACTS): This list contains information concerning RCRA facilities that have conducted, or are currently conducting a corrective action. Minimum search distance = 1.6 km (1 mile).

- No RCRA CORRACTS facilities were reported for the subject site.
- Two sites within the vicinity is listed as a CORRACTS site; 1) A 2 Z Plating Company was identified at 1467 South Sunol Drive, approximately 0.8 km (0.5 miles) southwest of the subject property; and 2) Van Waters was identified at 1363 South Bonnie Beach Place, approximately 0.8 km (0.5 miles) southwest of the subject property.

Due to the relative location of these sites, the potential for these facilities to have created a REC at the sites appears low.

U.S. EPA Federal RCRA Treatment, Storage and Disposal Facility (TSD) CORRACTS Facilities: This list contains hazardous waste TSD facilities regulated under RCRA for which facilities that have conducted, or are currently conducting a corrective action. Minimum search distance = 1.6 km (1 mile).

- No RCRA TSD CORRACTS facilities were reported for the subject sites or adjoining properties.

U.S. EPA Federal RCRA List of Hazardous Waste TSD Facilities: This list contains hazardous waste TSD facilities regulated under RCRA for which no violations have been reported by the U.S. EPA. Minimum search distance = 0.8 km (0.5 miles).

- No RCRA TSD facilities were reported for the subject sites or adjoining properties.

U.S. EPA Federal Resources Conservation and Recovery Act Information System (RCRIS) Violations Report: The RCRIS identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRIS Violations report contains information concerning facilities that have been cited for violations of RCRA, as well as any enforcement actions taken against the facility. Minimum search distance = 0.4 km (0.25 miles).

- No RCRIS Violation facilities were reported for the subject sites or adjoining properties.

U.S. EPA Toxic Release Inventory System (TRIS): All facilities that manufacture, process, or import toxic chemicals in quantities in excess of 25,000 pounds per year are required to register with the EPA under Superfund Amendments and Reauthorization Act (SARA) Title III of 1986. Minimum search distance = 0.4 km (0.25 miles).

- No TRIS facilities were reported for the subject sites or adjoining properties.

U.S. EPA Emergency Response Notification System (ERNS): ERNS is a national database that is used to store information on the sudden and/or accidental release of hazardous substances. The ERNS database contains preliminary information on the specific release(s), including the location, substance released, and the responsible party. Minimum search distance = 0.4 km (0.25 miles).

- No ERNS sites were reported for the subject sites or adjoining properties.

U.S. EPA Generators (Large and Small Quantity Generator): The RCRA program identifies and tracks hazardous waste from the point of generation to the point of disposal. RCRA Large Quantity Generators are facilities that generate at least 1,000 kg/month of non-acutely hazardous waste (or 1kg/month of acutely hazardous waste). RCRA Small Quantity Generators are facilities that generate less than 1,000 kg/month of non-acutely hazardous waste. Minimum search distance = 0.4 km (0.25 miles).

- No Large and Small Quantity Generators were reported for the subject site.
- One site within the vicinity is listed as a Large Quantity Generator site; 1) Specific Plating Company was identified at 1350 South Eastern Avenue, approximately 0.4 km (0.25 miles) southwest of the subject property.
- Five sites within the vicinity are listed as Small Quantity Generator sites; 1) Hardinge Bros. was identified at 4480 E. Olympic Boulevard, approximately 0.24 km (0.15 miles) northwest of the subject property; and 2) Sloan's Dry Cleaners was identified at 4539 E. Olympic Boulevard, approximately 0.24 km (0.15 miles) north of the subject property; 3) LAUSD Ford Elementary School was identified at 1112 South Ford Boulevard, approximately 0.24 km (0.15 miles) northeast of the subject property; 4) National Lighting Supply Form was identified at 1365 South Eastern Avenue, approximately 0.4 km (0.25 miles) southwest of the subject property; and 5) Deal Auto Center was identified at 4408 Union Pacific Avenue, approximately 0.4 km (0.25 miles) southwest of the subject property.

Due to the regulatory status and the relative distances of these sites, the potential for these facilities to have created a REC at the sites appears low.

U.S. EPA RCRIS Notifiers: The RCRA program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRIS Notifiers contains information on formerly regulated RCRA sites with more complete historical information. Minimum search distance = 0.4 km (0.25 miles).

- No RCRIS Notifiers were reported for the subject sites or adjoining properties.

3.2 State

Cal EPA State Priority List (SPL) (aka: Annual Work Plan): A list of sites managed by Cal EPA which are qualified to receive state funds for cleanup under the California Health and Safety Code. This list is sometimes referred to as the "State Superfund" list. Minimum search distance = 1.6 km (1 mile).

- No SPL sites were reported for the subject sites or adjoining properties.

Cal EPA CalSites (aka: State equivalent to the CERCLIS List (SCL)): A database provided by the Department of Toxic Substances Control (DTSC) of potentially hazardous waste sites discovered through file searches and visual reconnaissance. Cal EPA has determined that many of these sites require no further action, and that many sites pose no significant threat to the public or the environment. Minimum search distance = 0.8 km (0.5 mile).

- No CalSites were reported for the subject site.
- Three sites within the vicinity are listed as Calsites sites; 1) National Lighting Supply Form was identified at 1365 South Eastern Avenue, approximately 0.4 km (0.25 miles) southwest of the subject property; 2) Western Lead Products of Commerce was identified at 4530 Pacific Way, approximately 1.2 km (0.75 miles) southwest of the subject property ; and 3) Hemphill Spring Company was identified at 4220 East Washington Boulevard, approximately 1.4 km (0.9 miles) southwest of the subject property.

Due to the regulatory status and the relative distances of these sites, the potential for these facilities to have created a REC at the sites appears low.

Deeds Restrictions List (aka: Border Zone Property List): A database of agreements with property owners who propose building residences, school, hospitals, or day care centers on property that is on or within 2,000 feet of a potentially hazardous waste site. Minimum search distance = 0.8 km (0.5 mile).

- No Deed Restriction sites were reported for the subject site or adjoining properties.

Cortese List: A historical database provided by the Office of Environmental Protection, Office of Hazardous Materials. The Cortese List is a published list of potential and confirmed hazardous waste sites within California from 14 different databases. Minimum search distance = 0.8 km (0.5 mile).

- No Cortese sites were reported for the subject site or the adjoining properties.

Toxic Pits: A historical database provided by the Water Quality Control Board, Division of Loans and Grants. Minimum search distance = 0.8 km (0.5 mile).

- No Toxic Pit sites were reported for the subject site.
- One site within the vicinity is listed as a Toxic Pit site; 1) Union Pacific, LA East Yard was identified at 4341 East Washington Boulevard, approximately 1.2 km (0.75 miles) southwest of the subject property.

Due to the regulatory status and the relative distance of this site, the potential for this facility to have created a REC at the site appears low.

Spill, Leaks, and Industrial Cleanups (SLIC): A historical database provided by the Water Quality Control Board, Division of Loans and Grants. Minimum search distance = 0.8 km (0.5 mile).

- No SLIC sites were reported for the subject sites or adjoining properties.

3.3 Local

Leaking Underground Storage Tanks (LUST): A database provided by the Regional Water Quality Control Board (RWQCB). Minimum search distance = 0.8 km (0.5 mile).

- No LUST sites were reported for the subject site.
- Six LUST sites were identified within one-half mile from the sites, up-gradient and cross-gradient sites are identified as follows: 1) Phang Auto Center was identified at 4479 East Olympic Boulevard, approximately 0.24 km (0.15 miles) northwest of the subject site; 2) Ford Elementary School was identified at 1112 Ford Boulevard, approximately 0.24 km (0.15 miles) northeast of the subject site; 3) Shell Station #2200 was identified at 4625 Olympic Boulevard is approximately 0.4 km (0.2 miles) east of the site; 4) Gomez Gas Station was identified at 4640 Olympic Boulevard, approximately 0.4 km (0.25 miles) east of the subject site; 5) LA County Fire Station #003 was identified at 930 Eastern Avenue, approximately 0.53 km (0.33 miles) north of the subject site; and 6) Shell Service Station #1301 was identified at 4411 Whittier Boulevard, approximately 0.53 km (0.33 miles) north of the subject site.

Due to the regulatory status and the relative distances of these sites, the potential for these facilities to have created a REC at the site appears low.

Solid Waste Landfills (SWLF): Databases provided by the Integrated Waste Management Board and Los Angeles County Solid Waste Management Program. Minimum search distance = 0.8 km (0.5 mile).

- No SWLF sites were reported for the subject site or adjoining properties.

3.4 Private

Munger Map Book California – Alaska Oil and Gas Fields: the 1999 Munger Map book (Page W-64) was checked for any historic or current oil wells for the site and the site vicinity. The Munger Book revealed one exploratory well within the Flour Corporation property, approximately 1.6 km (1.0 miles) southeast of the subject site.

3.5 Local Agency Visits

Local agency data was requested for the known problem sites within the immediate vicinity from the Regional Water Quality Control Board (RWQCB), Cal EPA Department of Toxic Substances Control (DTSC), and the Los Angeles County Department of Public Works Solid Waste Division LACDPW.

Records from the RWQCB and LACDPW revealed that there were no files to review. The DTSC has not responded to our request as of the date of this report.

4.0 INFORMATION FROM SITE RECONNAISSANCE AND INTERVIEWS

4.1 Site Reconnaissance and Interviewed Personnel

The site reconnaissance was conducted by Anna Garcia and Janet Tentler on April 2, 2002. Site reconnaissance was performed by walking the site. All site observations were made on public land from public thoroughfares.

4.2 Hazardous Substances in Connection with Identified Uses

Hazardous substances were not identified in connection with the historic use of the subject site. No current uses appear likely to involve the use and storage of reportable quantities of hazardous materials or wastes.

4.3 Unidentified Substances, Containers, Staining or Stressed Vegetation

Unidentified substances, containers, significant stains, or stressed vegetation was not observed on or adjoining the subject sites during the site reconnaissance.

4.4 Storage Tanks

4.4.1 Underground Storage Tanks (USTs)

No indications of underground fuel storage tanks (UST), such as vent lines or fill pipes, were observed during the site reconnaissance.

4.4.2 Aboveground Storage Tanks (ASTs)

Aboveground storage tanks (ASTs) were not observed or reported on the subject property.

4.5 Indications of Polychlorinated Biphenyls (PCBs)

Pad-mounted transformers or underground were not observed within the subject sites.

4.6 Indications of Solid Waste Disposal

Evidence of active landfills or other solid waste disposal areas were not observed during the site reconnaissance.

4.7 Any Other Areas of Concern

Additional areas of concern were not identified at the time of site reconnaissance.

5.0 FINDINGS AND CONCLUSIONS

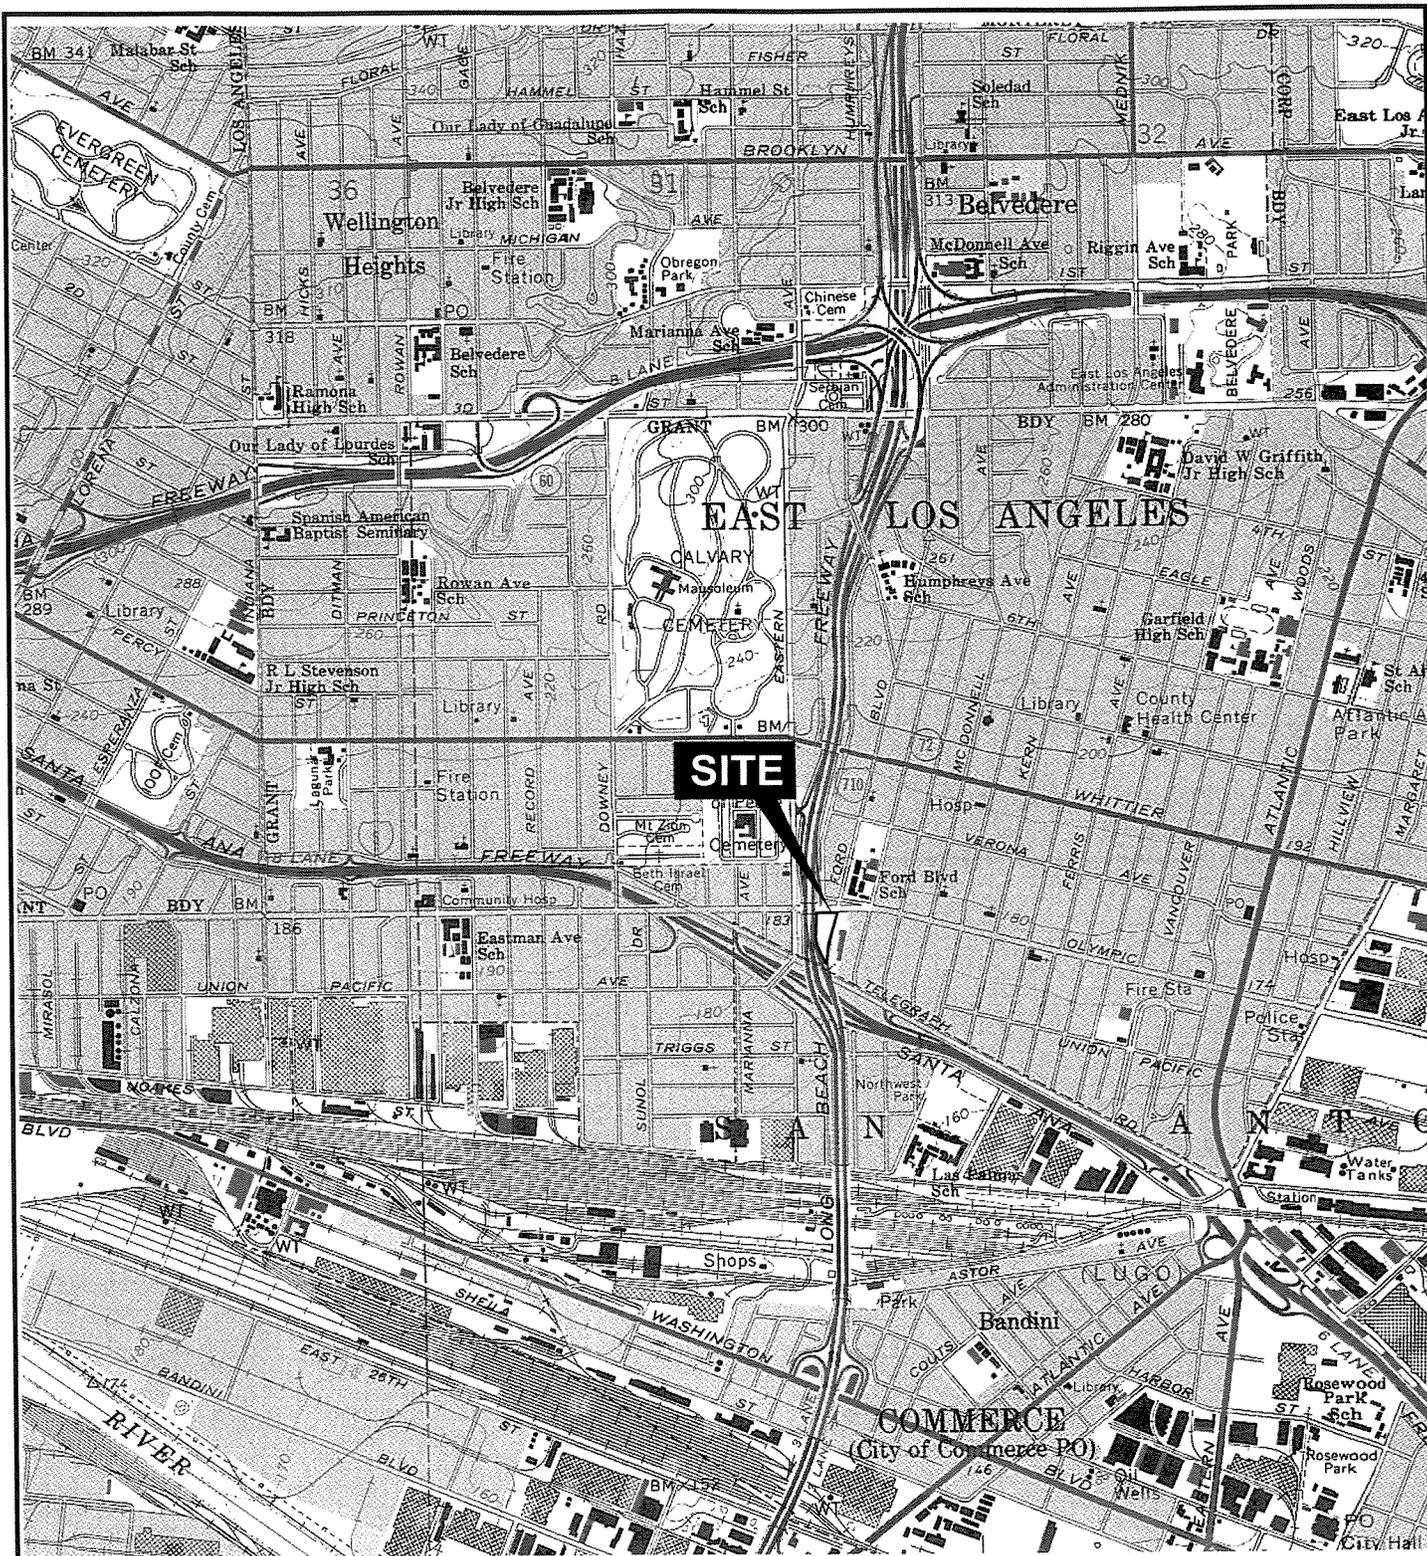

An Initial Site Assessment (ISA) of the Interstate 710 Freeway Olympic Interchange (710-10), within the city of East Los Angeles, Los Angeles County, California was conducted. Exceptions to, or deletions from, this practice are described in the body of this report.

The subject site is comprised of one section within the 710 Freeway Olympic Interchange, identified as 710-10-a. The section is located within the northbound off-ramp of the 710 Freeway at the Olympic Interchange. Recognized Environmental Conditions (RECs), as defined by ASTM Practice, were not observed during the site reconnaissance.

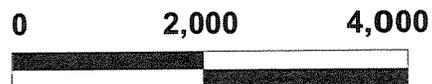

Review of historical data indicated that the site was residential property prior to the 710 Freeway construction in the early 1950s. Recognized Environmental Conditions (RECs) were not noted in the historical documents reviewed.

A review of the environmental database report indicates no listing of the site for environmental conditions. RECs were not noted in the agency database report review.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Elevations have been determined from the USGS 1 degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. a site with an elevation equal to the target property includes a tolerance of +/- 10 feet. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property (by more than 10 feet). Page numbers and map identification numbers refer to the Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL ASTM STANDARD

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, dated 11/21/2001 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list has revealed that there are 16 HAZNET sites within approximately 0.25 miles of the target property.

EPA Waste Codes Addendum

Code	Description
D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
D002	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
D006	CADMIUM
D007	CHROMIUM
D008	LEAD
D010	SELENIUM
D029	1,1-DICHLOROETHYLENE
D039	TETRACHLOROETHYLENE
D040	TRICHLOROETHYLENE
F001	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F002	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROENZENE, TRICHLOROFUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F003	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM STANDARD RECORDS

NPL: National Priority List

Source: EPA
Telephone: N/A

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/29/02
Date Made Active : 02/25/02
Database Release Frequency: Semi-Annually

Date of Data Arrival : 02/04/02
Elapsed ASTM days: 21

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA
Telephone: 703-413-0223

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/21/01
Date Made Active : 02/04/02
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 12/26/01
Elapsed ASTM days: 40
Date of Last Contact: 12/26/01

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA
Telephone: 703-413-0223

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 11/21/01
Date Made Active 02/04/02
Database Release Frequency: Quarterly

ERNS: Emergency Response Notification System

Source: EPA/NTIS
Telephone: 202-260-2342

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 08/08/00
Date Made Active 09/06/00
Database Release Frequency: Varies

Date of Data Arrival at EDR: 08/11/00
Elapsed ASTM days: 26
Date of Last Contact: 02/01/02

FEDERAL ASTM SUPPLEMENTAL RECORDS

BRS: Biennial Reporting System

Source: EPA/NTIS
Telephone: 800-424-9346

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/99
Database Release Frequency: Biennially

Date of Last Contact: 03/18/02
Date of Next Scheduled Contact: 06/17/02

CONSENT: Superfund (CERCLA) Consent Decrees

Source: EPA Regional Offices
Telephone: Varies

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: N/A
Database Release Frequency: Varies

Date of Last Contact: N/A
Date of Next Scheduled Contact: N/A

ROD: Records Of Decision

Source: NTIS
Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 09/30/00
Database Release Frequency: Annually

Date of Last Contact: 01/07/02
Date of Next Scheduled Contact: 04/08/02

DELISTED NPL: National Priority List Deletions

Source: EPA
Telephone: N/A

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/29/02
Database Release Frequency: Quarterly

Date of Last Contact: 02/04/02
Date of Next Scheduled Contact: 05/06/02

FINDS: Facility Index System/Facility Identification Initiative Program Summary Report

Source: EPA
Telephone: N/A

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/29/01
Database Release Frequency: Quarterly

Date of Last Contact: 01/07/02
Date of Next Scheduled Contact: 04/08/02

HMIRS: Hazardous Materials Information Reporting System

Source: U.S. Department of Transportation
Telephone: 202-366-4526

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 09/30/01
Database Release Frequency: Annually

Date of Last Contact: 01/21/02
Date of Next Scheduled Contact: 04/22/02

MLTS: Material Licensing Tracking System

Source: Nuclear Regulatory Commission
Telephone: 301-415-7169

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/25/01
Database Release Frequency: Quarterly

Date of Last Contact: 01/07/02
Date of Next Scheduled Contact: 04/08/02

MINES: Mines Master Index File

Source: Department of Labor, Mine Safety and Health Administration
Telephone: 303-231-5959

Date of Government Version: 12/14/01
Database Release Frequency: Semi-Annually

Date of Last Contact: 01/02/02
Date of Next Scheduled Contact: 04/01/02

NPL LIENS: Federal Superfund Liens

Source: EPA
Telephone: 205-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/91
Database Release Frequency: No Update Planned

Date of Last Contact: 02/26/02
Date of Next Scheduled Contact: 05/27/02

PADS: PCB Activity Database System

Source: EPA
Telephone: 202-260-3936

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 09/30/01
Database Release Frequency: Annually

Date of Last Contact: 02/12/02
Date of Next Scheduled Contact: 05/13/02

RAATS: RCRA Administrative Action Tracking System

Source: EPA
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/95
Database Release Frequency: No Update Planned

Date of Last Contact: 03/11/02
Date of Next Scheduled Contact: 06/10/02

TRIS: Toxic Chemical Release Inventory System

Source: EPA
Telephone: 202-260-1531

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/99
Database Release Frequency: Annually

Date of Last Contact: 12/26/01
Date of Next Scheduled Contact: 03/25/02

TSCA: Toxic Substances Control Act

Source: EPA
Telephone: 202-260-5521

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/98
Database Release Frequency: Every 4 Years

Date of Last Contact: 01/22/02
Date of Next Scheduled Contact: 04/22/02

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Telephone: 202-564-2501

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 01/11/02
Database Release Frequency: Quarterly

Date of Last Contact: 12/26/01
Date of Next Scheduled Contact: 03/25/02

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SWF/LF (SWIS): Solid Waste Information System

Source: Integrated Waste Management Board

Telephone: 916-341-6320

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 12/17/01
Date Made Active 01/15/02
Database Release Frequency: Quarterly

Date of Data Arrival 12/17/01
Elapsed ASTM days: 29
Date of Last Contact: 03/18/02

WMUDS/SWAT: Waste Management Unit Database

Source: State Water Resources Control Board

Telephone: 916-227-4448

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

Date of Next Scheduled Contact: 06/24/02

DEED: List of Deed Restrictions

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes.

Date of Government Version: 02/11/02
Database Release Frequency: Semi-Annually

Date of Last Contact: 02/19/02
Date of Next Scheduled Contact: 04/08/02

HAZNET: Hazardous Waste Information System

Source: California Environmental Protection Agency
Telephone: 916-255-1136

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

HISTORICAL DATABASES

Station and Dry Cleaners: has searched select national collections of business directories and has collected listings of potential dry cleaner and gas station/filling station/service station sites that were available to researchers. review was limited to those categories of sources that might include dry cleaning and gas station/filling station/service station establishments. The categories reviewed included, but were not limited to: *gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, dry cleaner, cleaners, laundry, laundromat, cleaning/laundry, wash & dry, etc.*

This information is meant to assist and complement environmental professionals in their conduct of environmental site assessments, and is not meant to be a substitute for a full historical investigation as defined in ASTM E1527. The information provided in this proprietary database may or may not be complete; i.e., the absence of a dry cleaner or gas station/filling station/service station site does not necessarily mean that such a site did not exist in the area covered by this report.

(A note on "dry cleaning" sites: it is not possible to differentiate between establishments that use PERC on-site as a cleaning solvent and sites that function simply as drop-off and pick-up locations or that are traditional wet cleaning/laundry facilities. Therefore, it is essential for environmental professionals to incorporate professional judgment in the evaluation of each site.)

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Former Manufactured Gas (Coal Gas) Sites: The existence and location of Coal Gas sites is provided exclusively to
by _____ For a technical description of the types
of hazards which may be found at such sites, contact _____ customer service

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines/Electrical Transmission Lines: This data was obtained _____ the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines and electrical transmission lines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, _____ those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Flood Zone Data: This data, available in select counties across the country, was obtained _____ in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained in 1999 from the U.S. Fish and Wildlife Service.

GEOCHECK®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

710-10
OLYMPIC/EASTERN
EAST LOS ANGELES, CA 90022

TARGET PROPERTY COORDINATES

Latitude (North):	34.018398 - 34° 1' 6.2"
Longitude (West):	118.172897 - 118° 10' 22.4"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	391703.3
UTM Y (Meters):	3764621.8

GeoCheck Physical Setting Source Addendum has been developed to assist the environmental professional with the collection of physical setting source information in accordance with ASTM 1527-00, Section 7.2.3. Section 7.2.3 requires that a current USGS 7.5 Minute Topographic Map (or equivalent, such as the USGS Digital Elevation Model) be reviewed. It also requires that one or more additional physical setting sources be sought when (1) conditions have been identified in which hazardous substances or petroleum products are likely to migrate to or from the property, and (2) more information than is provided in the current USGS 7.5 Minute Topographic Map (or equivalent) is generally obtained, pursuant to local good commercial or customary practice, to assess the impact of migration of recognized environmental conditions in connection with the property. Such additional physical setting sources generally include information about the topographic, hydrologic, hydrogeologic, and geologic characteristics of a site, and wells in the area.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

USGS TOPOGRAPHIC MAP ASSOCIATED WITH THIS SITE

Target Property: 2434118-A2 LOS ANGELES, CA
Source: USGS 7.5 min quad index

GENERAL TOPOGRAPHIC GRADIENT AT TARGET PROPERTY

Target Property: General SSE

Source: General Topographic Gradient has been determined from the USGS 1 Degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> LOS ANGELES, CA	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	0650430850B / CBNP
Additional Panels in search area:	0601100000A / CBNP

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> LOS ANGELES	<u>NWI Electronic Data Coverage</u> Not Available
---	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Site-Specific Hydrogeological Data*:

Search Radius: 2.0 miles
 Location Relative to TP: 1 - 2 Miles WSW
 Site Name: AMVAC CHEM CORP
 Site EPA ID Number: CAD056446388
 Groundwater Flow Direction: South
 Inferred Depth to Water: approximately 40 feet.
 Hydraulic Connection: The site is underlain by approximately 40 feet of clay, a semi-perched aquifer, the Bellflower aquiclude, and the Exposition aquifer.
 Sole Source Aquifer: No information about a sole source aquifer is available
 Data Quality: Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 2.000 Miles.

has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
17	1/2 - 1 Mile East	Not Reported
18	1 - 2 Miles North	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
 System: Quaternary
 Series: Quaternary
 Code: Q (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
 gravelly - sandy loam
 silt loam
 clay
 sand
 gravelly - sand
 fine sandy loam
 fine sand

Surficial Soil Types: sandy loam
 gravelly - sandy loam

Shallow Soil Types: fine sandy loam
 gravelly - loam
 sandy clay
 sandy clay loam
 clay
 sand
 silty clay

Deeper Soil Types: gravelly - sandy loam
 sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

stratified
 very gravelly - sandy loam
 weathered bedrock
 silty clay loam
 gravelly - fine sandy loam
 clay loam
 sand
 very fine sandy loam

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

According to ASTM E 1527-00, Section 7.2.2, "one or more additional state or local sources of environmental records may be checked, in the discretion of the environmental professional, to enhance and supplement federal and state sources... Factors to consider in determining which local or additional state records, if any, should be checked include (1) whether they are reasonably ascertainable, (2) whether they are sufficiently useful, accurate, and complete in light of the objective of the records review (see 7.1.1), and (3) whether they are obtained, pursuant to local, good commercial or customary practice." One of the record sources listed in Section 7.2.2 is water well information. Water well information can be used to assist the environmental professional in assessing sources that may impact groundwater flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Water System Information:

Prime Station Code:	02S/12W-08F01 S	User ID:	MET
FRDS Number:	1910036025	County:	Los Angeles
District Number:	15	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340100.0 1181000.0	Precision:	Undefined
Source Name:	WELL 43-01		
System Number:	1910036		
System Name:	CALIFORNIA WATER SERVICE CO. - ELA		
Organization That Operates System:	1720 N. FIRST STREET SAN JOSE, CA 92108		
Pop Served:	152820	Connections:	25741
Area Served:	EAST LOS ANGELES		

Sample Information: * Only Findings Above Detection Level Are Listed

Sample Collected:	06/13/1984	Findings:	1.400 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	06/13/1984	Findings:	1.300 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	01/22/1985	Findings:	1.700 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	01/22/1985	Findings:	1.500 UG/L
Chemical:	TRICHLOROETHYLENE

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Water System Information:

Prime Station Code:	02S/12W-07H01 S	User ID:	MET
FRDS Number:	1910036011	County:	Los Angeles
District Number:	15	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340100.0 1181000.0	Precision:	Undefined
Source Name:	WELL 22-01		
System Number:	1910036		
System Name:	CALIFORNIA WATER SERVICE CO. - ELA		
Organization That Operates System:	1720 N. FIRST STREET SAN JOSE, CA 92108		
Pop Served:	152820	Connections:	25741
Area Served:	EAST LOS ANGELES		

Sample Information: * Only Findings Above Detection Level Are Listed

Sample Collected:	01/22/1985	Findings:	.600 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	07/23/1985	Findings:	.800 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	10/07/1985	Findings:	.600 UG/L
Chemical:	CHLOROFORM (THM)		
Sample Collected:	02/03/1986	Findings:	.800 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	05/05/1986	Findings:	11.600 UG/L
Chemical:	BROMOFORM (THM)		
Sample Collected:	05/05/1986	Findings:	.600 UG/L

CA WELLS 2796

Water System Information:

Prime Station Code:	02S/12W-07C02 S	User ID:	MET
FRDS Number:	1910036033	County:	Los Angeles
District Number:	15	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340100.0 1181100.0	Precision:	Undefined
Source Name:	WELL 53-01		
System Number:	1910036		
System Name:	CALIFORNIA WATER SERVICE CO. - ELA		
Organization That Operates System:	1720 N. FIRST STREET SAN JOSE, CA 92108		
Pop Served:	152820	Connections:	25741
Area Served:	EAST LOS ANGELES		

Sample Information: * Only Findings Above Detection Level Are Listed

Sample Collected:	03/07/1989	Findings:	21.000 C
Chemical:	SOURCE TEMPERATURE C		
Sample Collected:	03/07/1989	Findings:	9.000 UNITS
Chemical:	COLOR		
Sample Collected:	03/07/1989	Findings:	850.000 UMHO
Chemical:	SPECIFIC CONDUCTANCE		
Sample Collected:	03/07/1989	Findings:	7.770
Chemical:	PH (LABORATORY)		
Sample Collected:	03/07/1989	Findings:	192.000 MG/L
Chemical:	TOTAL ALKALINITY (AS CaCO3)

PHYSICAL SETTING SOURCE RECORDS SEARCHED

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained in 1999 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the national Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water
Telephone: 202-260-2805

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water
Telephone: 202-260-2805

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: In November 1971 the United States Geological Survey (USGS) implemented a national water resource information tracking system. This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on more than 900,000 wells, springs, and other sources of groundwater.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

STATE RECORDS

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations for District 2 and 6

Source: Department of Conservation

Telephone: 916-323-1779

RADON

Area Radon Information: The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones: Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
