

Notice of Intent to Supply Cementitious Material

Use this form to notify the California Department of Transportation that you intend to supply a cementitious material product to contractors for Department projects. Materials for which submittals are received before any particular cut off date will appear on the next published list of Approved Cementitious Materials for use in Concrete. Appearance on the list does not relieve the supplier of the responsibility to supply only materials that conform to the Department's specifications.

Instructions: Supply information for EACH material on a separate sheet. Return completed sheets to the Department at 5900 Folsom Blvd, Sacramento CA, 95819, Attention: Vijay Jain or to Vijay_Jain@dot.ca.gov.
