Attn: Mr. General Manager

Subject: Contractor Standard Falsework Details

Mr. Manager:

As a result of the 2001, "California Bridge Construction Forum", the Offices of Structure Construction (OSC) is pursuing establishing an internal library of Contractor's standard falsework design details. This will assist OSC field staff in the review of falsework plan submittals and inspection of falsework during construction.

The process requires that the standard falsework details be submitted to OSC at the address above. All details must be summarized in index format on a cover sheet included in your submittal. Each sheet shall be stamped, sealed and dated by a Civil Engineer licensed in the State of California. Each sheet shall have a unique title for identification and clearly show the sheet number and company's name. All details must clearly call out: 1) all the detailed components and connections including dimensions legibly where applicable, 2) limits of use and 3) must be displayed on either 8 ½" x 11" or 11" x 17" sheets. Once approved, your standard details will then be listed on OSC's Intranet Web Site for internal access and use only.

Please forward standard falsework details that you may utilize on state highway projects for our review. If you have any questions please contact Wassim Al-Basha at 916-227-8060.

Sincerely,

DOLORES M. VALLS
Deputy Division Chief
Offices of Structure Construction
