Statement of Qualifications

EXECUTIVE SUMMARY

Natural Resources Management Corporation (NRM), established in Eureka, California in 1971, is an employee owned certified small business that specializes in forestry and environmental consulting. NRM is organized into two divisions – a *Forestry Division* offering a full range of forestry services (timber harvesting plans, land management, due diligence and appraisals) and an *Environmental Division* that performs biological surveys and assessments, land use planning and prepares regulatory compliance documents. NRM provides multi-disciplinary professional services in natural resources inventory and analyses, appraisals, planning and management primarily throughout the western United States. NRM's professional staff includes experienced forestland and timber appraisers, forestland managers specializing in timber inventories and timber resource planning, and a diverse environmental resources staff with specialists in the fields of wildlife, botany, geology, hydrology, wetlands, and GIS cartography. For more than 40 years, NRM has been meeting the needs of clientele in – federal, state and local agencies, and for private landowners, major timber companies, utility companies, law firms and Native American tribes.

The services provided by NRM include wildlife management, watershed analysis, geology/watershed management, watershed rehabilitation, botanical surveys, range inventories, feasibility studies, environmental assessments, vegetative analysis, timber and timberland appraisal services, litigation support services, timber inventories, forest management, logging engineering, timber and log marketing and complete mapping services. Many of these services are commonly triggered by regulatory compliance; the application of, and adherence to, a combination of local, state and federal environmental regulations. Consequently, NRM performs all of the permitting requirements and documentation necessary to comply with applicable regulations; for instance, the California Environmental Quality Act (CEQA), National Environmental Policy Act (NEPA), Clean Water and Air Acts, Endangered Species Act, Coastal Act and California Forest Practice Act, to name a few.

To meet the needs of clients, NRM offers an excellent array of natural resource managers with experience and insight into the regulatory framework. The NRM professional staff of resource specialists includes experienced botanists, wildlife biologists, geologists, hydrologists, forest land appraisers, forest inventory specialists, photogrammetrists, logging engineers and general forest managers. The support staff provides computer, cartographic and clerical support personnel. NRM's facilities are well equipped with a mapping and drafting section, computer facilities, Map Info™ and Arc View™ Geographic Information Systems (GIS), an extensive up-to-date resource library, a fleet of vehicles and an inventory of all necessary field equipment.

Regulations and methodologies for the management of natural resources are constantly undergoing changes. To stay informed with the latest in social and technological adoptions, NRM's staff is involved in professional organizations such as the California Licensed Foresters Association, the Appraisal Institute, the American Society of Farm Managers and Rural Appraisers, California Botanical Society, the Society of Wetland Scientists, the Geological Society of America, the Wildlife Society, the California Native Plant Society, the Association of Consulting Foresters, Society of American Foresters and the Western Forestry and Conservation Association. This ensures current knowledge of changes in the sciences as well as technical and governmental regulations.

Areas of specific expertise include the following brief descriptions:

- **Appraisals:** NRM has a Certified General Real Estate Appraiser who conducts forestland appraisals, feasibility studies, marketing and negotiation services and litigation support.
- **Botany and Wetlands:** NRM Botanists conduct surveys, habitat assessments, mitigation & monitoring plans, impact analyses and consultations for endangered, threatened and other special-status species. NRM Wetland Specialists conduct wetland assessments, delineations, typing & mapping, mitigation plans, monitoring plans, restoration plans and invasive species management.
- **GIS/Cartography:** NRM's Cartographic Division has MapInfo & ArcView GIS capabilities.
- **Environmental Planning, Consultations, & Documentation:** NRM Environmental and Timber Resource Specialists prepare all types of documents and permit applications for CEQA & NEPA compliance. NRM has authored EISs, EAs, BA/BEs, WA, CEs, THPs, and NTMPs.
- **Forestry & Forest Engineering:** NRM's Registered Professional Foresters prepare timber harvest plans, non-industrial timber management plans, and land management plans for a diversity of private landowner and timber industry clientele. The staff also conducts timber inventories, performs data analysis and evaluation, and designs site appropriate harvesting and transportation systems that minimize cost, maintain safety and reduce impacts to the soil, water, wildlife, and other forest resources. Foresters also prepare and administer harvesting and road work contract activities and log sales.
- **Geology & Watershed Hydrology:** NRM's Geologist and Hydrologist conduct geomorphic mapping, aerial-photograph interpretation, erosion and sediment inventories, treatment prescriptions, culvert risk analyses, stream profiles, hydrologic analyses, impact assessments, cumulative effects analyses and watershed analyses.
- **Wildlife:** NRM Wildlife Biologists conduct surveys, habitat assessments, impact assessments, mitigation plans and endangered & special-status species consultations.

More detailed descriptions of NRM's areas of expertise include the following:

TIMBER INVENTORIES, APPRAISALS, AND LITIGATION SUPPORT

NRM has performed timber inventories throughout the western U.S. and Alaska on public and private lands to include general management inventories, appraisal inventories (for purchase or sale) and litigation inventories. NRM maintains a full-time inventory staff that provides quality control and a quick response to inventory requests. NRM's in-house computer programming provides job-specific programs and customized inventory reports. NRM routinely provides inventory services for clients who have an in-house inventory system but do not have the necessary field personnel. Appraisal services have included valuation for federal 631a capital gains values, inheritance tax considerations, general appraisal values, acquisition, disposal and condemnation appraisals. NRM's chief appraiser each has over 25 years of experience in forestry consulting and forestland valuations.

NRM also provides the necessary pre-trial and during trial expertise to provide law firms with the technical and professional knowledge of key forestry-related issues. NRM has provided expert testimony regarding general forest management, silvicultural applications, timber inventory issues and timber sale contract disputes. NRM's cartographic staff provides graphics and court exhibits to support the testimony.

FOREST MANAGEMENT SERVICES

NRM provides direct management services on more than 70,000 acres for private clients in northwestern California. These services include the recommendation of silvicultural treatments, the planning, writing and implementation of the timber harvesting plans, site supervision of site preparation and reforestation activities, log accounting and comprehensive logging administration. NRM routinely authors forest management plans and supervises their implementation for large and small land owners. NRM's biologists and botanists assist our foresters in the preparation of harvesting plans thereby providing multi-disciplinary input to better assure statutory compliance through adequate biological evaluations and environmental assessments. NRM also provides administrative and business management assistance by conducting log accounting and logging administration services throughout the sale and harvesting process. All facets of forestry and harvesting from planning and permitting through approvals and sales are conducted by NRM professionals with long histories in the practice of forestry.

NRM provides marketing and negotiation services for a full range of timberland activities. These services include negotiating the best price for delivered logs to purchasers for our management clients, contract negotiations with loggers and truckers in relation to timber operations and regularly negotiating right-of-way fees and easement acquisition. NRM has also been involved in the negotiations for partitioning large industrial forest properties. NRM's services have included involvement in the negotiations for public and private land exchanges and timberland acquisitions.

WILDLIFE BIOLOGY

NRM provides clients with a comprehensive wildlife assessment program emphasizing inventory and management of threatened, endangered and sensitive wildlife species. During the last several field seasons, NRM has conducted inventories for a variety of protected, endangered and threatened species and species of special concern. Since 1991, NRM has conducted roughly 4,500 marbled murrelet surveys and inventoried more than 250,000 acres for northern spotted owls. Extensive surveys have also been conducted for the northern goshawk, red tree vole, golden eagle, great gray owl and Pacific fisher, as well as various amphibians, reptiles and mollusks. Staff wildlife biologists, working in conjunction with aerial photo interpretation specialists, have assisted in the modification of the California Wildlife Habitat Relationships (WHR) System to provide the level of site specific information required for biological evaluations associated with specific wildlife habitat assessments and various proposed projects. NRM's wildlife biologists have conducted both California and Federal Endangered Species Act consultations. Information gathered has supported project permitting, BA/BE reports for CEQA/NEPA requirements, and other numerous reports for project documentation.

BOTANICAL

The NRM staff botanists perform in-depth botanical evaluations and field surveys for the presence and potential habitat of rare, threatened, endangered and sensitive plant and lichen species with particular expertise in the regions of Northern California, the Sierra Nevadàs and Oregon. Botanical surveys are typically implemented for environmental and biological assessments and as a part of responsible planning for land development and various proposed actions by state and federal governments and landowners. NRM conducts wetland assessments and delineations and prepares and implements wetland mitigation and monitoring plans for projects across the region, including the Coastal Zone. NRM also conducts aerial photographic analysis (with field verification) to delineate riparian and other vegetation types and determine habitat quality and quantity. Our botanists are experienced in various vegetation sampling techniques including relevé and rapid assessment methodologies.

NRM's botanical and wetlands expertise has been utilized in the preparation of various planning and management guiding documents such as Watershed Analyses, Environmental Impact Reports,

Environmental Assessments, Land Management Plans and a Local Coastal Program update. NRM's botanical and wetlands services clientele including industrial and non-industrial forest ownerships, the U.S.D.A. Forest Service and other federal agencies, state agencies, numerous private landowners of residential and business parcels, developers, utility companies and non-profit organizations. Routine work products include the preparation and implementation of mitigation plans, planting plans and monitoring plans to avoid, minimize or mitigate impacts to sensitive species and habitats in various ecological settings such as wetlands, timberlands and grazing lands.

SPECIES MONITORING & HABITAT TYPING

NRM has monitored a list of species including birds, fish, amphibians, reptiles, plants, lichen, fungi, mammals, and mollusks. NRM has conducted biological assessments in an exhaustive number of habitats, each presenting a unique set of species. NRM is experienced in habitat and biological assessments in and/or near coastal dunes, salt marshes, prairies, grass lands, oak woodlands, coastal and montane coniferous forests, riparian forests, wetlands and serpentine zones, and deserts. In each of these habitats, NRM biologists and botanists employ invaluable professional field experiences to properly assess subtle, yet important, facets of species behavior and occurrences.

GEOLOGY AND HYDROLOGY

NRM's geologist conducts geologic investigations for a variety of projects. The geologist performs aerial photograph interpretation and geologic hazard evaluations that include information on rock types, geologic history, geologic structure, tectonics, slope stability, landslide and sediment transport processes, soil erosion and land use history. NRM conducts road system investigations to identify and map areas and structures that are failing or prone to failure and plans rehabilitation or mitigation projects relating to sediment control. Furthermore, NRM has a staff member certified as a *Professional Soil Erosion and Sediment Control Specialist* by the Soil and Water Conservation Society.

NRM's staff hydrologist evaluates erosion and sediment sources on roads and landings, investigates hillslope stability, assesses stream channel impacts and aquatic habitat, maps and classifies watercourses and conducts riparian surveys. NRM's hydrologist conducts aerial photograph interpretation to analyze road construction history, landslide activity and other erosion processes. This experience in designing and directing road rehabilitation projects on public and private landholdings has proven to be of critical importance for a number of different project types.

MAPPING & GIS

Project analyses often require integrating diverse data sets to create unified GIS products. NRM staff personnel conduct aerial photograph interpretation for a variety of projects including vegetative analysis, road construction, timberland management, wildlife habitats and watershed analysis. Aerial photograph interpretation has been completed on over 25 million acres to date. NRM's Intergraph, MapInfo and Arcview Geographic Information Systems (GIS) facilitate data analysis through efficient integration of spatial and tabular data. Data can be converted from other prominent GIS formats. The NRM map library contains base maps that cover hydrology, transportation, ownership, landnet and topographic layers in both hard copy and electronic form for all of Northern California. The hardcopy library includes geologic, soils, vegetation, wetland, and precipitation maps.

Prices, terms and conditions are firm for 30 days or the period set forth in this quotation.

TERMS

All prices are subject to federal, state and local taxes. This quotation is specific to the Contractor and project listed on the material price quote. DELIVERY

Prices are delivered to the job site over suitable access roads. The seller reserves the right to stop delivery if the access roads are not suitable or unsafe. The customer assumes responsibility for damages to sidewalks, driveways, or other property, and agrees to hold the seller harmless against all liabilities, loss and expense incurred as a result of such deliveries. Concrete prices are for loads . . 7 or more cubic yards. Loads below this amount are subject to short load charges. If you order a full load and a clean-up you will not be charged a short load fee for the clean-up. All concrete dispatched and with delivery underway will be charged to the customers account.

SCHEDULING

All scheduling is on a first come first serve bases. Therefore it is recommended the Contractor schedule a minimum of 72 hours prior to the delivery date and time desired. This does not guarantee delivery at that time, but all efforts will be made to accommodate the Contractors request.

Additional time will be charged at $1.50 per minute. Time is calculated from begin pour time to finish pour time. In the event the buyer is unprepared to receive the material at the scheduled pour time, standby time will be calculated from the scheduled arrival time to finish pour time.

Standard operating hours are Monday thru Friday, 7.00 am to 5.00 pm -
Saturday, Sunday & Nights are considered "premium time" and subject to additional charges.

Where the customer requires concrete of greater slump than specified, with the addition of water only, the strength is not guaranteed.
