RSES®

Eighty five percent of HVACR equipment problems are electrical related. When technicians are asked what they would consider their weakest skill, most respond that their electrical skills are lacking.

RSES (Refrigeration Service Engineers Society), the premier educational authority in refrigeration and air conditioning has produced the ideal electrical course, Electricity for HVACR Technicians. The text book takes both entry level and experienced technicians from basic fundamentals of electricity, to understanding electrical schematics, motors, capacitors and troubleshooting gas furnaces and split systems. The course concludes with reading and interpreting manufacturers schematics on a variety of equipment. Upon passing a final exam, attendees will receive a certificate of completion.
