California Access Scaffold, LLC submits the following bid subject to review of the scope of work with the customer. Any additions or deletions of items in the proposed scope may require a change of the price quoted herein.

Date of Bid: 03/16/15 Our Bid Number: 031615-214

Job Name: 3 Mile Slough Bridge
Address: 3 Mile Slough Bridge
Sacramento, CA 94203

SCOPE

CAS will set (2) rows of scaffold to stand approximately 25' & 35' high. The first row of scaffold will be set along the exterior side of the vertical I-Beams. The scaffold will have to be attached to the bridge at the panel points (as close as possible). The second row of scaffold will be set along the middle divider line and will have a 3' side bracket to allow the customer access to the steel over the k-rail. This is based on CAS being able to attach the scaffold along the middle of the road to the I-Beams along the upper horizontal steel. If CAS cannot attach the scaffold to the steel and a buttress has to be set, the price would be changed accordingly.

CAS will set all scaffold in 5 phases to allow the customer access to the entire side of the bridge. Once the side or phase is complete, CAS will dismantle the scaffold and re-erect on the opposite side. If CAS dismantles the scaffold down before the other side is ready, the material will be stored on site until the side is ready for erection.

CAS will also set the scaffold for access to the (2) 132' towers and Control House. The scaffold will have to be set on top of the steel girders due to the vehicle traffic still traveling through the bridge. (2) 132' ingress/egress stair towers will be set for access to each tower.

Bid 031615-214 continued on second page

California Access Scaffold, LLC submits the following bid subject to review of the scope of work with the customer. Any additions or deletions of items in the proposed scope may require a change of the price quoted herein.

Date of Bid: 03/16/15 Our Bid Number: 031615-214

Job Name: 3 Mile Slough Bridge
Address: 3 Mile Slough Bridge
Sacramento, CA 94203

SCOPE

CAS will set (2) rows of scaffold to stand approximately 25' & 35' high. The first row of scaffold will be set along the exterior side of the vertical I-Beams. The scaffold will have to be attached to the bridge at the pannel points (as close as possible). The second row of scaffold will be set along the middle divider line and will have a 3' side bracket to allow the customer access to the steel over the k-rail. This is based on CAS being able to attach the scaffold along the middle of the road to the I-Beams along the upper horizontal steel. If CAS cannot attach the scaffold to the steel and a buttress has to be set, the price would be changed accordingly.

CAS will set all scaffold in 5 phases to allow the customer access to the entire side of the bridge. Once the side or phase is complete, CAS will dismantle the scaffold and re-erect on the opposite side. If CAS dismantles the scaffold down before the other side is ready, the material will be stored on site until the side is ready for erection.

CAS will also set the scaffold for access to the (2) 132' towers and Control House. The scaffold will have to be set on top of the steel girders due to the vehicle traffic still traveling through the bridge. (2) 132' ingress/egress stair towers will be set for access to each tower.

Bid 031615-214 continued on second page

Initialed: _____

All scaffold will be set to accommodate screens and all scaffold will be OSHA compliant as well as set in accordance with OSHA regulations.

Included in the base proposal is the following:

1. Double stamped engineered drawings.
2. A complete Scaffold Plan including a JHA and a list of all equipment used.
3. A complete Safety Plan
4. Erection/Dismantling and rental of scaffold
5. Mobilization / Per Diem / Hotel / Gas / Travel

If CAS is awarded this project, the payment terms will be negotiated prior to the setting of any scaffold.

California Access Scaffold, LLC (CAS) and the Customer listed above agrees to the following:

ACCEPTANCE:
