Mr. Eric Jones
Western Regional Sales Manager
TrafFix Devices, Inc.
160 Avenida La Pata
San Clemente, CA 92673

Dear Mr. Jones:

The Sentry Longitudinal Energy Dissipater End Treatment (SLED) is approved for use on California State highways at Test Levels (TL) – 2 and – 3. This approval was recommended by the California Department of Transportation's (Caltrans) Highway Safety Features New Products Committee (HSFNPC), based on information you provided indicating the devices complied with the requirements of the National Cooperative Highway Research Program Report 350. The Federal Highway Administration accepted the SLED at TL-3 on February 9, 2011 (HSST/CC-114), and at TL-2 on June 24, 2011 (HSST/CC-117).

The SLED is a 42-inch high water-filled crash cushion, comprised of a steel Containment Impact Sled at the nose, water-filled modules, one empty module and an adjustable steel transition at the back for attaching to portable concrete barriers (PCB). The TL-3 model has three water-filled modules and is approximately 26 feet long. The TL-2 model has two water-filled modules and is approximately 18.6 feet long.

Conditions for use of the SLED are shielding the ends of PCB that are from 32 to 36 inches tall. The TL-2 and TL-3 models are to be used only where the there is minimal potential for high-speed, high-angle impacts by vehicles.

Caltrans will post design drawings for the SLED TL-2 and TL-3 models on the Authorized Materials List, and it will be an alternative to other approved equal crash cushions designed to shield PCB. If you have any questions, please contact Randy Hiatt, Chair, HSFNPC at (916) 654-2465.

Sincerely,

DEAN SAMUELSON
Acting Chief, Office of Traffic Engineering

RE: I-880 OVERCROSSINGS AT 23rd and 29th AVENUES, OAKLAND, CALIFORNIA, CDOT CONTRACT 04-0A7104

SUBJECT: PROPOSAL FOR PHOTO DOCUMENTATION AND SOUND MONITORING DURING CONSTRUCTION

Please find herein our proposal for photo surveys, vibration monitoring and settlement monitoring in connection with the **Construction On State Highway From 0.2 Mile South of 29th Avenue Overcrossing To 0.3 Mile North of 23rd Avenue Overcrossing.** With extensive experience in various forms of geotechnical instrumentation and vibration monitoring, we are uniquely qualified to handle this assignment. With eighty (80) seismographs, fifty (50) high-end sound level meters, ninety (90) in-situ inclinometer sensors, multiple vibrating wire joint meters and dataloggers in service, we do more of this work than any firm west of the Mississippi. In addition:

** *We are Reliable* **

Over 22 years experience and a strong record of repeat clients/business.

** *We are Experienced* **

We have conducted more pre-construction photo surveys and performed more vibration monitoring than anyone on the West Coast.

** *We are Safety Conscious* **

We hold regular weekly "toolbox" safety meetings as our personnel are regularly tending our equipment on or adjacent to contractor heavy construction sites. Our personnel have been given orientation and training for work adjacent to active railroad lines, on freeways, and inside of tunnels. **Our personnel are e-railsafe certified.**

* * *We are experienced in Community Relations* * *

We have conducted extensive large scale pre-construction photo survey projects and have successfully coordinated with public agencies and local Police/Sheriff organizations.

PRECONSTRUCTION PHOTO SURVEYS

Municon specializes in pre-construction photo surveys with large numbers of buildings (as many as 350) and the document control of data. Municon has completed preconstruction surveys for blasting projects throughout California and Nevada, for highway and road improvement projects in San Francisco, Oakland, Fremont, San Jose, and elsewhere throughout the Bay Area. We have performed photo surveys for the seismic retrofit of the historic San Francisco City Hall, the Richmond Transport Tunnel, the New Irvington Tunnel, and multiple projects at the San Francisco International Airport.

SOUND MONITORING

We have monitored construction generated noise with sound level meters during multiple contracts on the San Francisco Oakland Bay Bridge East Span replacement, for the Oakland Airport Connector project. We have recorded air overpressure on numerous blasts in Reno and the Sierra foothills. We have been remotely monitoring sound at the Doyle Drive project in San Francisco for the past 3 years, are concluding two years of remote sound monitoring at the New Irvington Tunnel Jobsites, are currently monitoring at the I-10/I-605 flyover in Baldwin Park, at the Warm Springs BART Extension in Fremont, and the Cathedral Hill Hospital project in San Francisco.

PROJECT DESRIPTION

We reviewed the project plans and specifications, and Addenda 1 through 7, available on the CalTrans website, to determine which photo/video documentation, noise monitoring, vibration monitoring and geotechnical instrumentation would be required for the Project.

Our review finds a requirement for a pre-construction and post-construction photo/video survey of four (4) adjacent properties, along with crack monitoring at those properties, and vaguely-specified sound level monitoring. A Sound Control Plan is required to be submitted by the contractor. There are no requirements for vibration monitoring for this project.

Our proposal for pre construction photo/video surveys and sound monitoring at the 23rd and 29th Avenue Bridge Replacement project follows. Please call me at 415-641-2570 with any questions or email me at anthony@municon.net. Thank you for your consideration – we look forward to working with you on this and other projects!

Yours truly,

2.00 SOUND MONITORING.

Special Provisions section 5-1.15 "**Noise Control**" states ***"This work includes monitoring and control of noise resulting from construction activities and equipment used on the project or associated with the project, including trucks, transit mixers, stationary equipment, and transient equipment. Do not exceed 86 dBA LMax at 50 feet from the job site activities from 9:00 p.m. to 6:00 a.m. except you may perform the following activities during the hours and for the days shown in the following table:"***, and lists ***"Concrete Removal and Sawcutting", "Bridge Removal", "Cold Plane AC Pavement" and "CIDH Piling Installations"*** as activities allowed from 9:00pm to 6:00am every day.

The Special Provision requires that the General Contractor ***"Engage an independent qualified engineer or Geo Physicist, who has an engineering or related degree with an emphasis in acoustic, noise and vibration control, and has two years of experience in noise control on construction projects, to prepare the Sound Control Plan and perform the continuous ambient sound measurements during the nighttime operations.***

Submit 3 copies of the Sound Control Plan (SCP), for review and approval by the Engineer prior to beginning construction. Include the following information for nighttime operations in the SCP:

1. List of work to be performed along with planned work durations.

2. Type and location of construction equipment and facilities.

3. Type and quantity of noise generating construction equipments or activity, grouped by equipment operating at any one time.

4. Operating sound level of all construction equipment.

5. List of sound control measures to be implemented to ensure that all nighttime operations minimize the nighttime sound level to the extent possible.

6. Calculations that demonstrate the expected nighttime sound level from operations utilizing the equipment and methods identified in this SCP to satisfy the nighttime sound level requirements.

7. List of contingency measures to be implemented in the event that sound levels exceed the calculated nighttime sound level.

8. Exact locations of sound level meters pursuant to the requirements specified in this special provision.

RECEIVED: 2014-03-14 10:21:59 (GMT -08:00)

Municon Consultants
Vibration Monitoring, Construction Instrumentation, Photo Surveys

9. Detailed information on proposed procedures for monitoring and recording of the sound level at the monitoring locations pursuant to the requirements specified in this special provision. "

The Special Provision further requires that the General Contractor *"Under direct control of the approved acoustical engineer, provide, maintain, and continuously monitor sound level meters for the activities and hours specified. ... Keep a copy of all sound data and submit one copy to the Engineer by 1 p.m. each day for the previous night. If requested, make hourly data from the sound monitors available to the Engineer within 2 hours of recording to address any complaints regarding construction sound levels."*

There is also a requirement for the General Contractor to *"Provide one Type 1 sound level meter and one acoustic calibrator to be used by the Department until contract acceptance. Provide training by a person trained in noise monitoring to two Department employees designated by the Engineer. The sound level meter must be calibrated and certified by the manufacturer or other independent acoustical laboratory before delivery to the Department. Provide annual recalibration by the manufacturer or other independent acoustical laboratory. The sound level meter must be capable of taking measurements using the A-weighting network and the slow response settings. The measurement microphone must be fitted with a windscreen.*

2.01 General

Our interpretation of the Special Provision is that work performed at night (9:00pm to 6:00am) which may exceed 86 dBA at 50 feet from the jobsite must have sound level monitoring during those operations, with daily reporting of sound monitoring data. No guidance is provided for where sound monitoring should be performed (and how many locations); this will be determined in the Sound Control Plan.

Municon Consultants is an **"independent qualified engineer"** with over 10 **"years of experience in noise control on construction projects"**, and will prepare the Sound Control Plan and provide **"sound measurements during nighttime operations"**.

Based on our review of the plans, we anticipate that night work on the 29th Avenue Overcrossing will require up to three (3) sound monitoring locations, and night work on the 23rd Avenue Overcrossing will require up to two (2) sound monitoring locations. We anticipate that night work to be monitored will require up to two (2) months at each overcrossing.

2.02 Provide Sound Level Meter

Municon Consultants will not provide a sound level meter nor training to CalTrans to enable them to perform our work. We recommend that you request a change order to remove this requirement.

2.03 Sound Control Plan

We will prepare a Sound Control Plan in consultation with you to meet the requirements of the Special Provisions, including information regarding the work to be performed and equipment to be used at night (as provided by you), expected sound levels generated during nighttime work, contingency measures to reduce sound levels in the event of exceedence of expected sound levels (in consultation with you), and including a detailed sound monitoring plan with monitoring locations and descriptions of equipment and procedures to be used during monitoring.

We will submit a statement of our qualifications for a **LUMP SUM** of .....**$1,500.**

We will prepare the Sound Control Plan for a **LUMP SUM** of .....**$12,000.**

2.10 Furnish use of sound level meters

We will furnish for our use up to three (3) Type 1 Integrating Sound Level Meters (SLMs) at any one time, over an anticipated period of two (2) months for each of five (5) installations. We will furnish the SLMs in weatherproof NEMA enclosures with cell modems and batteries. We will mount SLMs on poles attached to existing features or set in concrete in the ground. We will install our solar panels to keep the batteries charged. We will charge use charges for an anticipated two (2) months or fractions thereof for each Sound Level Meter.

Five (5) SLM installations @ $700/month @ 2 months.....**$7,000.**

2.20 Installation and Set Up of Sound Monitoring Stations.

We will install the sound level meter systems at each of five (5) anticipated monitoring stations. We will remove our SLMs at the completion of work. Removal of mounting poles set into concrete shall be by General Contractor. +2000

Deploy at five (5) monitoring locations @ $800 each.....**$4,000.**

Remove five (5) SLMs at end of work @ $300 each.....**$1,500**

We will maintain sound level meters, clean solar panels, and change batteries as required. We include here a monthly allowance for maintenance of $1,000/month for as many SLMs are installed.

Maintenance: $1,000/month x 4 months.....**$4,000.**

2.40 Professional Services for Sound Monitoring

We will download data and prepare and transmit **daily** sound monitoring reports to you.

Daily reports $300/report @ 80 days = ...**$24,000.**

If CalTrans requests that we **"make hourly data from the sound monitors available to the Engineer within 2 hours of recording to address any complaints"**, there will be an additional charge of $1,000/night to have our personnel available for the duration of night work.

TOTAL SOUND MONITORING ALLOWANCE.....$63,000.

NOISE

3.00 SETTLEMENT MONITORING.

Special Provisions section 5-1.15 **"Bridge Settlement Monitoring"** states ***"Settlement devices shall be constructed where shown on the plans at the 29th Avenue Off-Ramp Abutment 1 embankment to monitor embankment vertical movements. Prior to constructing settlement devices their locations shall be approved by the Engineer.***

Settlement monitoring and settlement devices shall conform to the requirements of California Test 112.

In addition to California Test 112 requirements that the distances from the tops of pipe couplings to the tops of wood platforms be measured and recorded, the elevations of the tops of wood platforms prior to the placement of any embankment material shall be established by survey accurate to within 0.01 foot and recorded.".

It is clear from the special provision that "Pipe Riser" settlement monitors are required rather than "Hydraulic Settlement Platforms", even though there is no explicit statement to that effect. As monitoring of pipe riser settlement monuments is work which should be performed by a surveyor, we do not offer to perform this work.

ENTIRE CONTRACT:
These Conditions are exclusive and in lieu of all other terms and conditions appearing on Buyer's purchase order or elsewhere and apply to all supplies of Material and/or Services by DSI. Any other terms, whether in a purchase order or other document issued by or referred to by Buyer, irrespective of their materiality, which are either different or additional to the Conditions are objected to by DSI and excluded unless expressly and clearly agreed to in writing by DSI. Supply of Material or Services by DSI shall constitute Buyer acceptance to the Conditions. There are no understandings, representations or warranties of any kind not expressly set forth herein.

TERMS OF PAYMENT:
Terms of payment shall be the terms set out on the face of this Contract as supplemented by the terms of this paragraph. If not otherwise states on the face of this Contract, DSI shall be entitled to invoice Buyer periodically as Material and/or Services are provided and payment shall be due and payable within 30 days after the date of each invoice. A service charge, computed on all payments past due and owed by Buyer under this Contract at an annual percentage rate of 18% shall be added to the Price; however, if such rate is prohibited under applicable law, then such service charge shall be computed at such lower rate as is the maximum rate permitted by law. Buyer also shall be liable for all legal fees and reasonable expenses incurred by DSI in the collection of past due accounts. DSI, upon notice to Buyer, may decline to make deliveries under this Contract, except for cash sales, whenever DSI for any reason doubts Buyer's ability to make payments as agreed under the Contract. Buyer shall not be entitled to set off any amounts owing or purported to be owing by DSI to Buyer or any 3rd party against amounts owing to DSI by Buyer.

DELIVERY/RISK OF LOSS/TITLE:
Unless otherwise indicated on this Contract, delivery of Materials shall be Ex Works DSI's Facility (Incoterms 2010). Delivery dates will be confirmed upon receipt of a binding order from Buyer. Risk of loss or damage to, and responsibility for, the Material shall pass to Buyer upon delivery to carrier at shipping point. No shipment shall be diverted or reconsigned without DSI's prior written consent. Unless otherwise agreed, DSI shall select means of transportation and routing. Title and right to possession of any Material covered by this Contract shall remain with DSI until the purchase price is paid in full or until DSI's lien rights cease.

ACCEPTANCE OF MATERIAL:
Upon tender of delivery of any Material to Buyer, Buyer shall immediately inspect the Material and shall give written notice to DSI of any shortages and of any Material rejected as damaged or otherwise nonconforming. Where delivery is made by common carrier, such notice shall be accompanied by the original freight bill with a notation thereon by the carrier confirming the shortage, damage or nonconformity. Any Material not so reported by Buyer to DSI as rejected shall be deemed to be irrevocably accepted. If Buyer so notifies DSI of any shortage or rejected Material, DSI may if it reasonably notifies Buyer have a further reasonable time to tender substitute Material.

WARRANTIES:
Materials - DSI warrants to Buyer only that the Materials delivered hereunder will conform to their specifications (either as agreed in writing with Buyer or DSI's standard specifications as set out in its product literature in force at the date of delivery) at the time of shipment and shall be free from defects in material and workmanship. Any recommendations or technical advice provided Buyer by DSI is believed reliable; but DSI makes no warranty of results to be obtained or fitness for Buyer's purpose and Buyer accepts such recommendations or advice at Buyer's risk.

DSI also warrants that the Material furnished hereunder will not, in the form in which furnished, infringe any valid United States patent which claims the Material itself, but DSI does not warrant against infringement by reason of Buyer's use thereof in combination with other materials or in the operation of any process. This warranty is conditioned upon Buyer's prompt notification in writing to DSI of any claim made against Buyer for such patent infringement, and upon Buyer's authorization of DSI to assume full and exclusive control of the defense or settlement of such claim or any legal action based thereon.

DSI MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY, STATUTORY OR OTHERWISE, CONCERNING THE MATERIALS INCLUDING, WITHOUT LIMITATION, A WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE OR A WARRANTY OF MERCHANTABILITY. THE WARRANTIES GIVEN UNDER THIS SECTION ARE EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

Services Warranty - DSI warrants that the Services will be performed in a good and workmanlike manner. Buyer's sole and exclusive remedy and DSI's entire liability with respect to this warranty will be, at the sole option of DSI, to either (a) use its reasonable commercial efforts to reperform or cause to be reperformed any Services not in substantial compliance with this warranty or (b) refund amounts paid by Buyer related to the portion of the Services not in substantial compliance; provided, in each case, Buyer notifies DSI in writing within 30 days after performance of the applicable Services. EXCEPT AS SET FORTH HEREIN OR IN ANY STATEMENT OF WORK THAT EXPRESSLY AMENDS DSI'S WARRANTY, DSI EXPRESSLY DISCLAIMS ALL OTHER WARRANTIES, REPRESENTATIONS, CONDITIONS OR COVENANTS, EITHER EXPRESS OR IMPLIED (INCLUDING WITHOUT LIMITATION, ANY EXPRESS OR IMPLIED WARRANTIES OR CONDITIONS OF FITNESS FOR A PARTICULAR PURPOSE, MERCHANTABILITY, DURABILITY, TITLE, ACCURACY OR NON-INFRINGEMENT) ARISING OUT OF OR RELATED TO THE PERFORMANCE OR NON-PERFORMANCE OF THE SERVICES.

LIMITATIONS ON DSI'S LIABILITY:
DSI's total aggregate liability under this Contract and for any damages in any action or claim based upon contract or tort (including negligence) or breach of statutory duty or for any other reason and which arises out of or in connection with this Contract or the supply of Materials and/or Services shall in no event exceed 100% of the total amount paid to DSI by Buyer under this Contract. However, nothing excludes or limits DSI's liability for (i) death or personal injury resulting from its sole negligence, or (ii) any claim against Buyer relating to DSI infringing a third party's intellectual property.
In no event shall DSI be liable for i) any liquidated or delay damages or for any costs related to delays or the avoidance of delays ii) any consequential, special or incidental damages or indirect losses, (including without limitation fines, punitive damages, loss of profit, business or contract, pure economic loss, depletion of goodwill incurred or suffered by Buyer).

CLAIMS:
All claims, except for the infringement of patents, must be made in writing strictly within 30 days after delivery of the Materials or completion of Services hereunder, and failure so to do shall constitute a waiver by Buyer of any such claims. Buyer shall use all reasonable efforts to minimize such claims or sums and to mitigate its losses. No claim of any kind shall be greater in amount than the paid purchase price of the Material or Services for which a claim is made. Any claim that is not asserted as a claim, counterclaim, defense or set off in a judicial proceeding instituted within one (1) year after the date on which the Materials were delivered to Buyer or Services performed, whichever date is earlier, shall be forever waived, barred and released. Time is of the essence for all Buyer notifications to DSI.

If Buyer notifies DSI in writing of any defect in Material within 30 days after the date of last delivery of Material and such material breaches the relevant warranty above, then Buyer's sole and exclusive remedy shall be to cause DSI, at DSI's option to either replace such nonconforming Material or reimburse Buyer for the price paid for such nonconforming Material provided by DSI.

Buyer shall indemnify, hold harmless and defend DSI from and against any and all claims, actions, suits, proceedings, costs, expenses, damages and liabilities, including actual legal fees and expenses, attributable or alleged to be attributable in whole or in part to Buyer's breach of the Contract, its negligence or other fault arising out of or pertaining to the use, performance, non-performance or misuse of the Material or Services supplied by DSI hereunder.

FORCE MAJEURE:
DSI shall not be liable for any breach of its contractual obligations if performance of its obligations is suspended, delayed or interrupted or rendered impossible or impractical for reasons of Force Majeure. If an event of Force Majeure negatively impacts DSI, it shall be entitled to an extension of time in which to perform its contractual obligations and DSI and Buyer shall negotiate any change to the Contract including time periods and Price in good faith. Force Majeure means events outside or beyond DSI's reasonable control including without limitation Acts of God, flood, earthquake, or other natural disaster; epidemic or pandemic; war, threat of or preparation for war, armed conflict, imposition of sanctions, embargo, breaking off of diplomatic relations or similar actions; terrorist attack, civil war, civil commotion or riots; nuclear, chemical or biological contamination or sonic boom; any law or government order, rule, regulation or direction, or any action taken by a government or public authority, including but not limited to imposing an embargo, export or import restriction, quota or other restriction or prohibition, or failing to grant a necessary license or consent; fire, explosion or accidental damage by a third party; loss during transportation; adverse weather conditions; interruption or failure of utility service, including but not limited to electric power, gas or water; any labor dispute, including but not limited to walkouts, strikes, industrial action or lockouts (other than by DSI's employees); non-performance by DSI's suppliers, inability to obtain raw materials; and unexpected failure of plant machinery, machinery, computers or vehicles. If an event of Force Majeure lasts more than 3 months or immediately renders DSI's performance impossible or impractical, DSI shall be entitled to terminate its Contractual obligations by notice to Buyer and without penalty and shall be entitled to payment by Buyer of a pro-rata sum of the Price to reflect goods and/or Services delivered by DSI up to the date on which it terminated its Contractual obligations. DSI reserves the right to allocate its available supply of Materials among any or all purchasers, as well as departments and divisions of DSI on such basis as it may deem reasonable, fair and practical, without liability for any failure of performance relating to this Contract.

TAXES:
Any tax, excise, fee or other charge or any increase thereof now or hereafter imposed by law upon the production, storage, withdrawal, sale, transportation, use or delivery of the Material sold or Services provided hereunder, shall be in addition to the price quoted and shall be paid by Buyer.

ASSIGNMENT:

RE: I-880 OVERCROSSINGS AT 23rd and 29th AVENUES, OAKLAND, CALIFORNIA, CDOT CONTRACT 04-0A7104

SUBJECT: PROPOSAL FOR PHOTO DOCUMENTATION AND SOUND MONITORING DURING CONSTRUCTION

Please find herein our proposal for photo surveys, vibration monitoring and settlement monitoring in connection with the **Construction On State Highway From 0.2 Mile South of 29th Avenue Overcrossing To 0.3 Mile North of 23rd Avenue Overcrossing.** With extensive experience in various forms of geotechnical instrumentation and vibration monitoring, we are uniquely qualified to handle this assignment. With eighty (80) seismographs, fifty (50) high-end sound level meters, ninety (90) in-situ inclinometer sensors, multiple vibrating wire joint meters and dataloggers in service, we do more of this work than any firm west of the Mississippi. In addition:

** *We are Reliable* **

Over 22 years experience and a strong record of repeat clients/business.

** *We are Experienced* **

We have conducted more pre-construction photo surveys and performed more vibration monitoring than anyone on the West Coast.

** *We are Safety Conscious* **

We hold regular weekly "toolbox" safety meetings as our personnel are regularly tending our equipment on or adjacent to contractor heavy construction sites. Our personnel have been given orientation and training for work adjacent to active railroad lines, on freeways, and inside of tunnels. **Our personnel are e-railsafe certified.**

* * *We are experienced in Community Relations* * *

We have conducted extensive large scale pre-construction photo survey projects and have successfully coordinated with public agencies and local Police/Sheriff organizations.

PRECONSTRUCTION PHOTO SURVEYS

Municon specializes in pre-construction photo surveys with large numbers of buildings (as many as 350) and the document control of data. Municon has completed preconstruction surveys for blasting projects throughout California and Nevada, for highway and road improvement projects in San Francisco, Oakland, Fremont, San Jose, and elsewhere throughout the Bay Area. We have performed photo surveys for the seismic retrofit of the historic San Francisco City Hall, the Richmond Transport Tunnel, the New Irvington Tunnel, and multiple projects at the San Francisco International Airport.

SOUND MONITORING

We have monitored construction generated noise with sound level meters during multiple contracts on the San Francisco Oakland Bay Bridge East Span replacement, for the Oakland Airport Connector project. We have recorded air overpressure on numerous blasts in Reno and the Sierra foothills. We have been remotely monitoring sound at the Doyle Drive project in San Francisco for the past 3 years, are concluding two years of remote sound monitoring at the New Irvington Tunnel Jobsites, are currently monitoring at the I-10/I-605 flyover in Baldwin Park, at the Warm Springs BART Extension in Fremont, and the Cathedral Hill Hospital project in San Francisco.

PROJECT DESRIPTION

We reviewed the project plans and specifications, and Addenda 1 through 7, available on the CalTrans website, to determine which photo/video documentation, noise monitoring, vibration monitoring and geotechnical instrumentation would be required for the Project.

Our review finds a requirement for a pre-construction and post-construction photo/video survey of four (4) adjacent properties, along with crack monitoring at those properties, and vaguely-specified sound level monitoring. A Sound Control Plan is required to be submitted by the contractor. There are no requirements for vibration monitoring for this project.

Our proposal for pre construction photo/video surveys and sound monitoring at the 23rd and 29th Avenue Bridge Replacement project follows. Please call me at 415-641-2570 with any questions or email me at anthony@municon.net. Thankyou for your consideration – we look forward to working with you on this and other projects!

2.00 SOUND MONITORING.

Special Provisions section 5-1.15 **"Noise Control"** states *"This work includes monitoring and control of noise resulting from construction activities and equipment used on the project or associated with the project, including trucks, transit mixers, stationary equipment, and transient equipment. Do not exceed 86 dBA LMax at 50 feet from the job site activities from 9:00 p.m. to 6:00 a.m. except you may perform the following activities during the hours and for the days shown in the following table:"*, and lists *"Concrete Removal and Sawcutting", "Bridge Removal", "Cold Plane AC Pavement" and "CIDH Piling Installations"* as activities allowed from 9:00pm to 6:00am every day.

The Special Provision requires that the General Contractor *"Engage an independent qualified engineer or Geo Physicist, who has an engineering or related degree with an emphasis in acoustic, noise and vibration control, and has two years of experience in noise control on construction projects, to prepare the Sound Control Plan and perform the continuous ambient sound measurements during the nighttime operations.*

Submit 3 copies of the Sound Control Plan (SCP), for review and approval by the Engineer prior to beginning construction. Include the following information for nighttime operations in the SCP:

1. List of work to be performed along with planned work durations.

2. Type and location of construction equipment and facilities.

3. Type and quantity of noise generating construction equipments or activity, grouped by equipment operating at any one time.

4. Operating sound level of all construction equipment.

5. List of sound control measures to be implemented to ensure that all nighttime operations minimize the nighttime sound level to the extent possible.

6. Calculations that demonstrate the expected nighttime sound level from operations utilizing the equipment and methods identified in this SCP to satisfy the nighttime sound level requirements.

7. List of contingency measures to be implemented in the event that sound levels exceed the calculated nighttime sound level.

8. Exact locations of sound level meters pursuant to the requirements specified in this special provision.

RECEIVED: 2014-03-14 10:21:59 (GMT -08:00)

Municon Consultants
Vibration Monitoring, Construction Instrumentation, Photo Surveys

9. Detailed information on proposed procedures for monitoring and recording of the sound level at the monitoring locations pursuant to the requirements specified in this special provision. "

The Special Provision further requires that the General Contractor *"Under direct control of the approved acoustical engineer, provide, maintain, and continuously monitor sound level meters for the activities and hours specified. ... Keep a copy of all sound data and submit one copy to the Engineer by 1 p.m. each day for the previous night. If requested, make hourly data from the sound monitors available to the Engineer within 2 hours of recording to address any complaints regarding construction sound levels."*

There is also a requirement for the General Contractor to *"Provide one Type 1 sound level meter and one acoustic calibrator to be used by the Department until contract acceptance. Provide training by a person trained in noise monitoring to two Department employees designated by the Engineer. The sound level meter must be calibrated and certified by the manufacturer or other independent acoustical laboratory before delivery to the Department. Provide annual recalibration by the manufacturer or other independent acoustical laboratory. The sound level meter must be capable of taking measurements using the A-weighting network and the slow response settings. The measurement microphone must be fitted with a windscreen.*

2.01 General

Our interpretation of the Special Provision is that work performed at night (9:00pm to 6:00am) which may exceed 86 dBA at 50 feet from the jobsite must have sound level monitoring during those operations, with daily reporting of sound monitoring data. No guidance is provided for where sound monitoring should be performed (and how many locations); this will be determined in the Sound Control Plan.

Municon Consultants is an **"independent qualified engineer"** with over 10 **"years of experience in noise control on construction projects"**, and will prepare the Sound Control Plan and provide **"sound measurements during nighttime operations"**.

Based on our review of the plans, we anticipate that night work on the 29th Avenue Overcrossing will require up to three (3) sound monitoring locations, and night work on the 23rd Avenue Overcrossing will require up to two (2) sound monitoring locations. We anticipate that night work to be monitored will require up to two (2) months at each overcrossing.

We will prepare a Sound Control Plan in consultation with you to meet the requirements of the Special Provisions, including information regarding the work to be performed and equipment to be used at night (as provided by you), expected sound levels generated during nighttime work, contingency measures to reduce sound levels in the event of exceedence of expected sound levels (in consultation with you), and including a detailed sound monitoring plan with monitoring locations and descriptions of equipment and procedures to be used during monitoring.

We will submit a statement of our qualifications for a **LUMP SUM** of .....**$1,500.**

We will prepare the Sound Control Plan for a **LUMP SUM** of .....**$12,000.**

2.10 Furnish use of sound level meters

We will furnish for our use up to three (3) Type 1 Integrating Sound Level Meters (SLMs) at any one time, over an anticipated period of two (2) months for each of five (5) installations. We will furnish the SLMs in weatherproof NEMA enclosures with cell modems and batteries. We will mount SLMs on poles attached to existing features or set in concrete in the ground. We will install our solar panels to keep the batteries charged. We will charge use charges for an anticipated two (2) months or fractions thereof for each Sound Level Meter.

Five (5) SLM installations @ $700/month @ 2 months.....**$7,000.**

2.20 Installation and Set Up of Sound Monitoring Stations.

We will install the sound level meter systems at each of five (5) anticipated monitoring stations. We will remove our SLMs at the completion of work. Removal of mounting poles set into concrete shall be by General Contractor. 42,000

We will maintain sound level meters, clean solar panels, and change batteries as required. We include here a monthly allowance for maintenance of $1,000/month for as many SLMs are installed.

Maintenance: $1,000/month x 4 months.....**$4,000.**

2.40 Professional Services for Sound Monitoring

We will download data and prepare and transmit **daily** sound monitoring reports to you.

Daily reports $300/report @ 80 days = ...**$24,000.**

If CalTrans requests that we **"make hourly data from the sound monitors available to the Engineer within 2 hours of recording to address any complaints"**, there will be an additional charge of $1,000/night to have our personnel available for the duration of night work.

TOTAL SOUND MONITORING ALLOWANCE.....**$63,000.**

NOISE

3.00 SETTLEMENT MONITORING.

Special Provisions section 5-1.15 **"Bridge Settlement Monitoring"** states *"Settlement devices shall be constructed where shown on the plans at the 29th Avenue Off-Ramp Abutment 1 embankment to monitor embankment vertical movements. Prior to constructing settlement devices their locations shall be approved by the Engineer.*

Settlement monitoring and settlement devices shall conform to the requirements of California Test 112.

In addition to California Test 112 requirements that the distances from the tops of pipe couplings to the tops of wood platforms be measured and recorded, the elevations of the tops of wood platforms prior to the placement of any embankment material shall be established by survey accurate to within 0.01 foot and recorded.".

It is clear from the special provision that "Pipe Riser" settlement monitors are required rather than "Hydraulic Settlement Platforms", even though there is no explicit statement to that effect. As monitoring of pipe riser settlement monuments is work which should be performed by a surveyor, we do not offer to perform this work.

RE: Disabled Veterans Business Enterprise (DVBE) number 1519120

Dear Mr. Weisse:

This letter is regarding the review conducted by the Department of Transportation (Caltrans) Contract Evaluation Unit (CEU) staff on March 20, 2012. Caltrans has taken the initiative to ensure all certified DVBE firms that bid on or perform on Caltrans' State funded projects are performing a commercial useful function (CUF). After careful evaluation of the information and documentation obtained as a result of the review, pursuant to Military & Veterans Code §999(b)(5)(B) (i) and (ii), your firm is deemed to perform a CUF when acquiring the following types of products on Caltrans projects:

Classification Number	Description
401421	Pipe
301515	Roofing Materials
301520	Fencing
261215	Electrical Wire
391115	General Lighting Fixtures

Keywords: Roofing, Wire, Electrical, Pipe, Fencing

Since we have determined your firm is providing a CUF for the specified classifications listed in the table above, the DVBE credit can ONLY be granted to the afore mentioned classifications and counted towards DVBE goals for Caltrans State funded contracts. For the remaining services listed on your DVBE certification, no documentation or evidence has been provided to demonstrate that you perform, manage or supervise the work involved.

You may review your firm's information on the Department of General Services (DGS) website at http://www.bidsync.com/DPXBisCASB. It is your responsibility to maintain correct information regarding your firm's name, address, phone/fax number, and e-mail address on the DGS website.

Caltrans CEU is amiable to re-visit your firm to determine if work classifications and updated information reflect actual practices.

If you have questions or need further assistance or clarification, please contact Larry Williams Analyst, CEU at (916) 327-9784, or by email at larry_williams@dot.ca.gov.

Re: Small Business Enterprise Certification

Dear Mr. Weisse:

We are pleased to advise you that after careful review of your application and supporting documentation, the Los Angeles County Metropolitan Transportation Authority (Metro) has determined that your firm meets the eligibility standards to be certified as a Small Business Enterprise (SBE) as required under the Metro SBE Program. Your firm will be listed in the Metro SBE database of certified SBEs under the following specific areas of expertise:

NAICS (2007)	Description	Size Standard
423610	Electrical Apparatus & Equipment, Wiring Supplies & Related Equipment Merchant Wholesalers (Suppliers)	$22.41 million
423310	Lumber, Plywood, Millwork, & Wood Panel Merchant Wholesalers (Supplier)	$22.41 million

Your SBE certification is good for five years from the date of this letter and applies only for the above NAICS 2007 codes. Requests for additional or revised NAICS 2007 codes must be made in writing to Metro. After the five-year certification period, your entire file will be reviewed in order to ascertain continued SBE certification status. You will be notified of the pending SBE status review and any documentation updates necessary prior to the expiration date.

Should any changes occur that could affect your certification status, such as changes in your firm's name, business/mailing address, ownership, management or control, or failure to meet the applicable business size standards or personal net worth standard, please notify Metro immediately. SBE certification is subject to review at any time.

Metro reserves the right to withdraw this certification if at any time it is determined that certification was knowingly obtained by false, misleading, or incorrect information. Metro also reserves the right to request additional information and/or conduct on-site visits at any time during the certification period. The firm thereby consents to the examination of its books, records, and documents by the Metro.

10-1.90 WELDED STEEL PIPE CASING (BRIDGE)

Welded steel pipe casings through bridges and under approach slabs shall be of the size shown and shall conform to the provisions in Section 70, "Miscellaneous Facilities," of the Standard Specifications and these special provisions.

Unless otherwise shown on the project plans, casings shall be installed at each abutment, and casings shall be extended to the greater of: (1) 5 feet beyond the approach slab, (2) 5 feet beyond the end of the adjacent wingwall, or (3) 20 feet beyond the abutment.

WORKING DRAWINGS

Working drawings for temporary support of casing pipe at the abutments shall be submitted for approval in conformance with the provisions in Section 5-1.02, "Plans and Working Drawings" of the Standard Specifications.

MATERIALS

Casing pipe

B. Tapes shall be tightly applied with 1/2 uniform lap, free from wrinkles and voids to provide not less than a 100—mil thickness.
C. Field joints and fittings for wrapped pipe shall be covered by double wrapping 50—mil thick tape. Wrapping at joints shall extend a minimum of 6 inches over adjacent pipe coverings. Width of tape for wrapping fittings shall not exceed 2 inches. Adequate tension shall be applied so tape will conform closely to contours of joint.

Where a welded steel pipe casing passes through the abutment wall, the welded steel pipe casing shall be additionally wrapped with 2 layers of 15—pound asphalt-felt building paper, securely taped or wired in place.

MEASUREMENT AND PAYMENT

Measurement and payment for welded steel pipe casing (bridge) for each size listed in the Engineers Estimate shall conform to the provisions in Sections 70-1.04,"Measurement" and 70-1.05,"Payment" of the Standard Specifications.

10-1.91 AUTOMATIC DRAINAGE GATE

Heavy duty automatic drainage gates shall conform to the provisions in Section 70, "Miscellaneous Facilities," of the Standard Specifications and these special provisions.

The gates shall be designed to operate under 50 feet of head face pressure measured from the center of the gate cover to the highest water level. The gate shall provide a free outflow, but shall prevent backflow. The gate shall be attached to the required pipe size or anchored to a concrete wall.

The gate shall be complete with cover, spigot-back seat, gate links, bushings, bolts and nuts.

The gate cover and spigot-back seat, and pivot lugs and gate links shall be manufactured of cast steel or steel conforming to the requirements in ASTM Designation: A 27, Grade 65-35 or A 36/A 36M, respectively. The bushings shall be manufactured of commercial quality bronze. The assembly bolts, or anchor bolts when required, and nuts shall conform to the requirements in ASTM Designation: A 307, Grade A. The gate links, bolts and nuts shall be galvanized in conformance with the requirements in ASTM Designation: A 153.

The gate cover shall be ribbed or domed with ample section to withstand the face pressure. The seating surfaces of the cover and spignt-back seat shall be machined or ground to fit together within a tolerance of not more than 0.004-inch throughout the circumference of the seating surfaces.

The gate cover shall be hinged from the spigot-back seat, by 2 supporting links, one on each side of the gate, pivotally connected at the top of the seat and at the bottom to the cover above its center of gravity. Bushings of suitable length and diameter shall be provided at the 4 hinge points.

The gate shall be assembled in the shop and parts shall be given a shop coat of commercial quality asphaltic paint furnished by the manufacturer.

The cover of the gate, when installed, shall fit tight against the seat when there is no pressure on the cover face.

The cover shall be equipped with an eye bolt at the bottom for opening the gate under pressure.

RE: Disadvantaged Business Enterprise Certification

Dear Edna Douadi:

We are pleased to advise you that after careful review of your application and supporting documentation, the Los Angeles County Metropolitan Transportation Authority (Metro) has determined that your firm meets the eligibility standards to be certified as a Disadvantaged Business Enterprise (DBE) as required under the U.S. Department of Transportation (U.S. DOT) Regulation 49 CFR Part 26, as amended. This certification will be recognized by all of the U.S. DOT recipients in California. Your firm will be listed in the California Unified Certification Program (CUCP) database of certified DBEs under the following specific areas of expertise that you have identified on the NAICS codes form of the application package:

NAICS (2007)	Description
423710	Hardware Merchant Wholesalers
423610	Electrical Apparatus & Equip., Wiring Supplies, and Related Equip. Merchant Wholesalers
423860	Transportation Equip. & Supplies (except Motor Vehicle) Merchant Wholesalers
423840	Industrial Supplies Merchant Wholesalers
423730	Warm Air heating & Air-Conditioning Equip. & Supplies Merchant Wholesalers
423410	Photographic Equip. & Supplies Merchant Wholesalers
423120	Motor Supplies & New Parts Merchant Wholesalers
423690	Other Electronic Parts & Equipment Merchant Wholesalers
423720	Plumbing & Heating Equip & Supplies (Hydronics) Merchant Wholesalers
424690	Other Chemical & Allied Products Merchant Wholesalers

Your DBE certification applies only for the above codes. You may review your firm's information in the CUCP DBE database which can be accessed at the CUCP's website at www.californiaucp.org. Any additions and revisions must be submitted to Metro for review and approval.

In order to ensure your continued DBE status, you are required to submit an annual No Change Declaration Form (which will be sent to you) along with supporting documentation. If no changes are noted, then your DBE status remains current. If there are changes, Metro will review to determine continued DBE eligibility. Please note, your DBE status remains in effect unless Metro notifies you otherwise.

Should any changes occur that could affect your certification status prior to receipt of the No Change Declaration Form, such as changes in your firm's name, business/mailing address, ownership, management or control, or failure to meet the applicable business size standards or personal net worth standard, please notify Metro immediately. Failure to submit forms and/or change of information will be deemed a failure to cooperate under Section 26.109 of the Regulations.

Metro reserves the right to withdraw this certification if at any time it is determined that it was knowingly obtained by false, misleading, or incorrect information. Your DBE certification is subject to review at any time. The firm thereby consents to the examination of its books, records and documents by Metro.

Project Engineer,
Thank you for your invitation to bid. Please consider the hourly price rates attached as a proposal for this job.If ton or load rates are preferred for this particular project,please assist us in providing any information you have regarding the type of material to be hauled,the location of where the material will be dropped and the location of where the material will be picked up from.I realize you may not have all this information at the early stages of the bidding process so any information of the material to be hauled/dumped at the least gives us an idea of where the supplier/dumpsite may be within a certain vicinity of the jobsite.

Thank you and we look forward to working with you soon.
