Central Concrete employs the Enviro Guard Wash-Out system.
 We REQUIRE that you provide a location on your jobsite for our delivery professional to effectively utilize their Enviro Guard equipment, however we do NOT require a contained wash out disposal area.

The use of **EF Technology™** assists in qualifying for **Leadership in Energy and Environmental Design (LEED)** credits increasing the building's environmental performance rating.
Ask for EF Technology™ from Central Concrete Supply.

Prices are effective until 1/1/14 on that date prices will increase by \$5.00/cu. yard.

Prices expire on 6/1/14. After this date the project must be re-quoted.

Central Concrete's material suppliers will not provide long-term sourcing guarantees; therefore, Central Concrete cannot guarantee material sourcing throughout a project for reasons including, but not limited to extensive logistic issues with imports, natural disasters, union strikes, environmental concerns, permitting, inclement weather, power outages, and general maintenance issues. In recent years, Central Concrete's material supplies were interrupted several times by many of aforementioned items.

In order to better serve our customers, Central Concrete has expanded its sourcing to include additional suppliers to provide increased options in a limited supply situation. Central Concrete will be submitting both our standard mix designs with our standard materials in conjunction with an alternate mix with an alternate stone source. Additionally, alternate cement, sand and fly ash certifications will be submitted as emergency alternates for short-term or long-term shortages. This quote is contingent on Central Concrete's flexibility to utilize these alternate materials as needed. When alternate materials are utilized, Central Concrete will choose materials that will fulfill specified performance properties. Central Concrete will not be liable for construction delays if extensive testing and re-submittals are required as material changes occur.
