5. List the names of agencies and the dates on which they were contacted to provide assistance in contacting, recruiting and using DBE firms. If the agencies were contacted in writing, provide copies of supporting documents.

Name of Agency	Date of Contact	Method of Contact	Results
----------------	-----------------	-------------------	---------

PLEASE SEE COMPLETE AGENCY ASSISTANCE LISTING UNDER TAB 6

6. List efforts made to provide interested DBEs with adequate information about the plans, specifications, and requirements of the contract to assist them in responding to a solicitation. Identify the DBE assisted, the information provided, and the date of contact. Provide copies of supporting documents.

Information regarding access to the plans and specifications was provided in our solicitations. Plans were made available for viewing and copying at our Riverside office from 7:30AM – 5:00 PM daily. We also stated that the plans were available on the Caltrans website and provided the link. Skanska had no specific requests for assistance in regards to the plans or specifications.

7. List efforts made to assist interested DBEs in obtaining bonding, lines of credit, insurance, necessary equipment, supplies, materials, or related assistance or services, excluding supplies and equipment the DBE subcontractor purchases or leases from the prime contractor or its affiliate. Identify the DBE assisted, the assistance offered, and the date. Provide copies of supporting documents.

Skanska's Estimating, Risk Management and DBE Compliance team staff is available during regular business hours to provide requested assistance on bonding, credit and/or insurance questions upon request. Technical assistance is also available upon request. During this outreach and bid process we were not solicited for assistance.

B. Include additional data to support a demonstration of good faith efforts.

Skanska is an industry leader in regards to efforts put forth for Small Business participation. We have a full DBE Compliance staff that not only assists with each pursuit, but is part of the project team to provide continuous monitoring and assistance. For all pursuits Skanska utilizes SBE, a DBE certified company to assist us in our initial outreach and project advertising. Skanska also maintains relationships with Small Business firms by offering quarterly training sessions call "Small Business Academies." These courses are training sessions that we use to educate small businesses on proven bidding, marketing, teaming and growth strategies. Skanska also hosts Community Advisory Team meetings on a quarterly basis in strategic national markets to bring together community leaders and our DBE and executive staff to discuss community growth opportunities and solutions to problems that local small businesses have faced/are currently facing.

NOTE: USE ADDITIONAL SHEETS OF PAPER IF NECESSARY.

Fax Status Legend

KeyesFax

Status

The Status field lets you know what is happening or what has happened to each fax. There are a lot of different status messages that the system uses, this is what they mean:

IMGCONV JQ

The fax is waiting on the IMGCONV job queue to be converted.

Converting

The fax is being converted from text form to a Fax image.

FAXCOM JQ

The fax has been converted, now it is waiting to be faxed.

Cnsolidatd

The fax has been consolidated with another to the same recipient.

Scheduled

The fax is scheduled to be sent at the time shown on the far right.

Held or *HOLD

The fax has been put on HOLD using option 3. You can restart the fax using option 9.

use Opt 1

The fax has a phone number of *FAX, *PBX, or *LIST with multiple recipients. You can see the details using option 1.

Active, Running, Dialing, Connecting

The fax is in the process of trying to connect with a fax machine.

Sending

The fax page listed on the right is currently being transmitted.

Sent

The fax has been sent. The last page sent is shown under the Page field.

Sent?

The fax was sent, but without a confirmation from the fax machine.

Will Retry

The fax failed, but is scheduled to retry at the time shown on the right.

The reason for the failure can be seen by choosing option 1 (Details).

Resubmitted

The fax had to be started over, choose option 1 (Details) to see why.

No Cnctn

The fax system could not connect to the remote fax machine.

Lost Cnctn

The fax was transmitting, but the connection was lost.

Busy

The phone number called was busy.

No Answer

The phone number called rang, but no one answered.

NoDialTone

The modem picked up the phone but there was no dial tone. See the detailed description of this error later in these help screens.

Fax Status Legend

KeyesFax

No Carrier

Someone answered the phone call but it was not a fax machine.

Cancelled

The fax was cancelled using the Work with Fax Lines option 7.

Bad File, Missing, No Pages, Bad Cover

These messages mean that something was wrong with the original fax image or its coversheet. You will have to recreate the fax.

Bad LibL, No ICF File, BadLicense

These indicate that the system has not been installed correctly or the library has been damaged.

Com failed, Failed, Bad Modem

These indicate that something is wrong with the communication to the fax modem. Check to see that it is turned on and properly connected.

Separating

The program is separating a multi-page spooled file by phone numbers.

E-mailed

The fax was converted to an e-mail attachment and was e-mailed.

Eml Failed

The fax was converted to an e-mail attachment but failed to be mailed. You must use the Work with KeyesMail screen to determine the cause.

When a failure occurs, you will get a message sent to you that further describes what had happened. A copy of the message is also sent to the FAXCOM message queue and is described below:

Excessive line errors

This is caused when the remote fax machine reports that the phone line has caused too many errors on the fax scan lines. When this happens, the system will automatically send the page again. If the remote fax machine again reports too many line errors, this message is reported to you. In most cases, the recipient will be able to make out the entire fax from the 2 copies that they receive.

Did not connect

This means that the system contacted a fax machine but could not get a connection with it.

Line is busy

This means that the phone line did not ring at the destination. It got a busy signal.

Lost connection

This means that a fax machine was connected and the first page was transmitted, but the system lost the connection. It did not get a response from the remote fax machine saying that it had received the page. It must be assumed that the page was not received.

Fax Status Legend

KeyesFax

No connection or Did not connect

This means that the first page was not even attempted. A fax machine did answer the phone but the 2 systems could not establish a connection

Phone Rang, Ringing

While the fax was getting ready to be sent, the phone rang.

May not be Class 1 Fax modem

This is caused when the fax system asks the modem what class it is and the modem does not respond correctly. The system issues this message, then Varies OFF the Fax line and Varies it back ON. This usually resets the modem so that it again works properly. If the modem was not a Class 1 modem or if it were malfunctioning, you would get this message 6 times then the system will shut the fax line down.

Modem not responding

This is similar to the above explanation.

No Confirmation, Not Cnfrmd

At the end of each page a fax machine is supposed to confirm that it has received the page. Sometimes this confirmation is lost, due to an incompatibility with the modem that you are using. In this case, we do not resend the same page. To do so would usually result in the same page being sent, repeatedly.

, will retry

When this is added to a message it means that the job has been scheduled to try again in a few minutes.

, Job canceled

When this is added to a message it means that the system cannot complete the fax and it is going to stop trying, usually because it has exhausted all of the retries.

, Resubmitting

When this is added to a message it means that the system is automaticall resubmitting the job to try to correct the problem.
