Subject: Bid 08-0M0204, Construct CNG Facility Bloomington

Ref: Your letter dated April 12, 2013 received at AMTEK on April 15, 2013

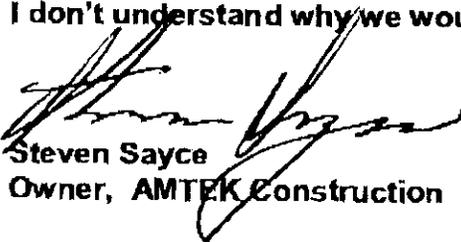

Mr. McMillan,

This is in response to your reference letter stating that AMTEK Construction was non compliant due to our failure to submit the subcontractor's list. We did in fact submit a subcontractor's list with "None" written on it. We listed no subcontractors as we will not have any subcontractor's on this project. What else would we write when this is the case except "None"? We are qualified to undertake 100% of this project and we fully expect to do so.

It seems that there may have been some confusion regarding our DVBE listing of Browns Electrical for Materials/Electrical. Mr. Brown is a certified DVBE in the area of electrical material supply. We are planning on purchasing material in the amount of \$56,019.35 from Browns Electrical. Per Cal Trans we receive 60% credit for material supplied—in this case $\$56,019.35 \times .60 = \$33,611.61$. This is 5.68% of our bid amount. Browns Electrical is not a subcontractor. He is a material supplier. He will provide no labor on the site. That is why we listed him as a DVBE but not as a subcontractor.

We request that you review the paperwork again. You will find that we are in compliance in all respects.

I don't understand why we would receive a letter such as this without a phone call first.

Steven Sayce
Owner, AMTEK Construction
