Gentlemen,

RMA Group is the premier California pavement consulting firm with over 15 years of experience with Caltrans QC/QA projects. Our understanding of the specific approach required to maximize the quality of the materials and workmanship permeates throughout our operations from the field staff to the Quality Control Manager.

We are pleased to present herein a cost estimate for performing Quality Control Testing of the Hot Mix Asphalt (HMA) production for the subject project in accordance with the requirements of the special provisions dated February 25, 2013.

The estimated costs presented on the following page are based on:

- 4 regular weekday 8-hour production shifts of HMA-A (4,600 tons) Standard Process – Bid Item 23

- Job Mix Formula & Verification testing are assumed to have been completed
- A Field Technician will be utilized to obtain the required samples and test compaction in the field per the project special provisions

- Quality Control Plan

In addition to the above assumptions, alternate packages have been provided to account for the varying degrees of involvement with Quality Control activities.

Package 1 assumes the following:

- A Plant Production Technician will be provided by the HMA supplier to conduct aggregate tests, ignition tests, maximum theoretical density tests
- Production HMA testing for Hveem Stability and Density performed by our representatives are listed as an optional cost

Package 2 assumes the following:

QUALITY CONTROL INSPECTION & TESTING

Our costs are based strictly on the construction schedule assumptions presented herein. Any additional testing requested, changes in the construction schedule, or changes to the presented assumptions will affect our costs, which will require that the above estimated costs be revised accordingly. Overtime costs for Saturday and Sunday shifts will be multiplied by 1.4 and 1.7, respectively. If paving exceeds 8 hours per shift, each additional (Package 1) hour will be billed at $250 up to 10 hours and $300 thereafter. If paving exceeds 8 hours per shift, each additional (Package 2) hour will be billed at $380 up to 10 hours and $500 thereafter. If a field laboratory facility is required, the mobilization charge will be $3,500 and monthly rental will be $750.

Proposal No. P-21049

Mr. Jason Mordhorst
Hazard Construction
6465 Marindustry Place
San Diego, California 92192

Subject: Proposal for Asphalt Materials Testing Services
Route 10 from Monterey Avenue to Washington Street
Thousand Palms, Riverside County, California
Caltrans Contract No. 08-0Q1104

Dear Mr. Mordhorst:

We are pleased to be a member of your team during the construction of the concrete barrier and widening of outside shoulder of Route 10 from Monterey Avenue in Palm Desert to Washington Street in Thousand Palms, Riverside County, California. The project includes the construction of approximately 23,800 feet of concrete barrier and the widening of the shoulder by approximately 4 feet with placement hot mix asphalt (HMA). We understand that we will be tasked with preparation of a quality control plan for the paving, field observation and compaction testing during the placement of the HMA, obtaining cores of the completed pavement, and laboratory testing. Our services will not include asphalt mix design services or testing of the concrete. It is understood that the quality control testing of the aggregates will be performed by the material supplier, but may be performed upon request by Ninyo & Moore for an additional fee. Our proposed budget is based on a review of the available project plans and specifications and discussions with your project manager regarding the project operations.

PROPOSED SCOPE OF SERVICES

We propose to provide quality control testing of the HMA during the placement process, acceptance core sampling of completed asphalt pavement, and laboratory testing. Based on our discussions, our testing services during the asphalt pavement process are estimated on a daily shift rate which includes coring for the Caltrans acceptance cores. The core locations will be selected by the Caltrans Engineer, and the specifications indicate that two cores will be required for each 3,000 lineal feet of HMA placement. If additional cores are requested by Hazard Construction, obtaining the cores and requested

laboratory testing will be incurred on a time and materials basis. Lane closures and traffic control will be supplied by Hazard Construction. Filling/patching of acceptance core locations and data core locations will be performed by Hazard Construction. We anticipate that our specific scope of services for this project will include the following:

- Preparing a contractor quality control plan.
- Attending RHMA preconstruction meeting with Caltrans and Hazard representatives.
- Performing field observations and relative compaction testing during the placement of the HMA.
- Obtaining acceptance cores of HMA wedge at the locations identified by Caltrans representatives. Coring to be performed on a daily basis within lane closures supplied by the contractor. Two cores are required for each 3,000 lineal feet of placement.
- Sampling asphalt materials during production of the HMA at the truck, windrow, paver hopper, or mat behind the paver, as specified in the contractor quality control plan.
- Laboratory testing of the HMA including extraction to assess asphalt binder content and aggregate gradation, mix moisture content, air voids, voids in mineral aggregate (VMA), voids filled with asphalt (VFA), dust proportion, maximum theoretical unit weight, Hamburg Wheel Track (HWT), and moisture susceptibility as outlined in Section 39-2.02B1D of the project specifications.

FEE ESTIMATE

We understand that this project is subject to "prevailing wage rates." Field observation and compaction testing services will be provided on a daily rate basis assuming a nine-hour on-site work period for density testing and an eight-hour on-site work period for coring. The daily rate for our field technicians includes the mobilization and per diem for each work day. Mobilization and utilization of the profilograph will be charged on an hourly basis. Estimated fees for the testing services based on the anticipated three-day project duration are presented in Table 1.

The estimated fees are based on our assumptions of the anticipated services and do not include stand-by time or fees associated with retesting or reinspecting materials that were found not to be in compliance with the project specifications. Our services will depend on the construction schedule and your operations, which can substantially affect the duration of our services. Requested engineering, material sampling and testing, or field density and laboratory testing not within the specified scope of services or in excess of those presented will be provided, on a time and materials basis, in accordance with the attached Schedule of Fees. Our fees do not include time to review drawings, preparation of construction specifications, meetings and other activities requested that are not in our estimated fee breakdown.

We look forward to working with you on this project.

Respectfully submitted,

RE: Disadvantaged Business Enterprise Certification

Dear Mr. Barton:

We are pleased to advise you that after careful review of your application and supporting documentation, the Los Angeles County Metropolitan Transportation Authority (Metro) has determined that your firm meets the eligibility standards to be certified as a Disadvantaged Business Enterprise (DBE) as required under the U.S. Department of Transportation (U.S. DOT) Regulation 49 CFR Part 26, as amended. Your DBE certification status will be honored by all of the U.S. DOT recipients in California. Your firm will be listed in the California Unified Certification Program (CUCP) database of certified DBEs under the following specific areas of expertise:

NAICS (2007)	Description	Size Standard
238190	Other Foundation, Structure & Building Exterior Contractors	$14 million

Your DBE certification is good for five years from the date of this letter and applies only for the above NAICS 2007 codes. Requests for additional or revised NAICS 2007 codes must be made in writing to Metro. After the five-year certification period, your entire file will be reviewed in order to ascertain continued DBE certification status. Prior to your firm's DBE certification expiration date, Metro will send a letter to you requesting information necessary to complete this review.

The Regulations also require annual updates during this five-year period. In order to assure continuing DBE status, you must submit annually a DBE Declaration with supporting documentation, in the format that will be sent to you. Based on your annual submission that no change in ownership and control has occurred, or if changes have occurred, they do not affect your firm's DBE standing, the DBE certification of your firm will continue until the five-year certification has expired.

Also, should any changes occur that could effect your certification status prior to receipt of the DBE Declaration, such as changes in your firm's name, business/mailing address, ownership, management or control, or failure to meet the applicable business size standards or personal net worth standard, please notify Metro immediately. Your DBE certification is subject to review at any time. Failure to submit forms and/or change of information will be deemed as failure to cooperate under §26.109 of the Regulations.

Congratulations, and thank you for your interest in the CUCP.

Sincerely,

Linda B. Wright
