## Quotation

Project: CALTRANS, Project No. 08-1F-R604, Rt. 10, Riverside County  
 Quantity: Item 394050 - 6,520 stations (approx. 652,000 cuts) of asphalt Shoulder Rumble Strips

Construction Time: 10 work shifts or less

Mobilization:	\$16,010.00
Unit Price: \$9.50 per station x 6,520 stations =	<u>\$61,940.00</u>
Cutting Only:	\$77,950.00 (approx.)

Note: This quotation is based on daylight work hours, unless otherwise stated. Please contact SPT if you would like a quotation for night shift work hours.

### \*Optional Clean-Up Methods:

\* **Optional Clean up via Sweep-to-Side Broom.** SPT can provide one sweep-to-side broom with operator on this project to sweep the debris over the shoulder's edge (5 foot maximum) for an additional lump sum price of \$16,440.00. In the event the shoulders are wider than 5 feet or if there is a concrete barrier, curb, or something else that will prevent SPT from sweeping the debris over the shoulder's edge, the General Contractor will need to provide additional clean up equipment and labor. Broom price is valid for one mobilization only.

\* **Optional Clean up via Pick-Up Broom.** SPT can provide one pick up broom with operator on this project for an additional \$44,050.00 lump sum. SPT's pick up broom loads continuously off of a conveyor and therefore the General Contractor must provide two (2) or more dump trucks for SPT's broom to continuously load debris into. A dump truck is needed at all times under its conveyor for the broom to operate. Broom price is valid for one mobilization only.  
 To view SPT's unique sweeping technology go to: <http://www.rumblestrips.com/about/video-gallery/>, and please click-on the video titled "Rumble Strip Milling Clean-Up".

The above unit price includes:

- 1) The labor and equipment necessary to mill-in approximately 6,520 stations (approx. 652,000 cuts) of asphalt shoulder rumble strips on the CALTRANS project; SPT's rumble strip mills are capable of cutting various continuous, skip and gap patterns on roadway centerline and shoulders to satisfy all known DOT specifications. Cut width can be varied from a minimum of 4" to a maximum of 16" and is easily interchangeable.

The above unit price excludes:

- 1) Traffic control, flaggers, impact attenuators, arrow boards or any other maintenance and protection of traffic items other than revolving beacons on SPT trucks. The travel lane adjacent to the shoulder must be closed to install the shoulder rumble strips;
- 2) The clean-up of the debris from the shoulder surface. Please see clean-up options above.
- 3) The milling of rumble strips in areas not accessible to our equipment or areas SPT deems unsuitable for cutting rumble strips;
- 4) Layout. The contractor must provide a continuous pavement marking stripe on the edge of the shoulder that is visible to our operator. The layout and alignment of the cuts will mirror this stripe. Start and stop points must also be clearly marked by the General Contractor.

Service charge of 1.14% per month (minimum charge \$50), which is an annual rate of 18%, added to past due balance, plus reasonable collection and/or attorneys fees if required.

[www.rumblestrips.com](http://www.rumblestrips.com)

- 5) Union concessions on behalf of SPT's non-union employees.
- 6) Payment & Performance Bonds, SPT's bond cost is 1.5 percent with a \$100.00 minimum.
- 7) Mobilization. A mobilization charge of \$16,010.00 lump sum will be charged in addition to the unit price as shown above. A single mobilization is based on uninterrupted construction from the time of arrival.
- 8) Fog Seal. Some states require that the contractor spray the rumble strip with a protective oil sealant. This quotation does not include fog seal materials nor the labor and equipment for the application thereof.
- 9) TERO taxes, fees, licenses or hiring, if required.

Pricing excludes general contractor association dues, gross receipt taxes, or additional charges passed on by the general contractor.

#### Schedule of Operations:

This quotation is based on a single mobilization and a construction schedule that will allow SPT to mill in rumble strips for a minimum of 8 hours per shift after traffic control setup. SPT estimates that it will take us 10 consecutive work shifts or less to install 6,520 stations of rumble strips on this project. Please note that SPT is capable of milling up to 25 miles of rumble strips during each shift and expects the general contractor to provide sufficient lane closures and brooming to meet this daily production.

If SPT cannot construct this project as quoted (i.e. within the number of mobilizations included, and/or according to the work hours and construction shifts described above) please notify us so we may re-quote this project.

#### Contract Terms:

SPT provides one hour daily for project coordination and traffic control set up by the General Contractor and other project subcontractors. Delays or wait time beyond the initial hour due to improper layout, incomplete work areas or other delays not caused by, or related to SPT, will be charged at \$500.00 per hour.

SPT bids work based on the published completion date in the project advertisement. The above pricing is valid through the original completion date of the project as posted in the project advertisement or contract documents. Any extensions or significant accelerations to the advertised completion date must be approved by SPT to assure equipment and crew availability.

Due to the fact that rumble strips are installed at or near the end of most projects, SPT will not be liable for liquidated damages or other costs unless adequate notice (minimum 20 days) and construction time are provided.

Thank you for the opportunity to quote on this project. We look forward to the opportunity of working with your company. If you have any questions regarding this quotation or SPT, please contact me at 717-697-1450.

Sincerely,

SURFACE PREPARATION TECHNOLOGIES

*John Holbert*

John Holbert

Please note: SPT will honor this quotation for 30 days after the bid date.  
 \*By submitting a subcontract to SPT for work on this project, the Contractor agrees to the terms of this quotation and thereby incorporates them into and as part of said subcontract, unless a corporate officer of SPT approves changes to this quotation in writing on SPT's letterhead. The terms and conditions of this quotation will supersede any conflicting terms of said subcontract.

Unknown To address

### How to Fix It

The address may be misspelled or may not exist. Try one or more of the following:

- Send the message again following these steps: In Outlook, open this non-delivery report (NDR) and choose **Send Again** from the Report ribbon. In Outlook on the web, select this NDR, then select the link "**To send this message again, click here.**" Then delete and retype the entire recipient address. If prompted with an Auto-Complete List suggestion don't select it. After typing the complete address, click **Send**.
- Contact the recipient (by phone, for example) to check that the address exists and is correct.
- The recipient may have set up email forwarding to an incorrect address. Ask them to check that any forwarding they've set up is working correctly.
- Clear the recipient Auto-Complete List in Outlook or Outlook on the web by following the steps in this article: [Fix email delivery issues for error code 5.1.10 in Office 365](#), and then send the message again. Retype the entire recipient address before selecting **Send**.

If the problem continues, forward this message to your email admin. If you're an email admin, refer to the **More Info for Email Admins** section below.

Carolyn,

We are a flatbed operation. WE do not have dump trucks, asphalt or earthwork.

Do you have our scope of work.

Thanks,
