Description	Qty	U/M	Cost	Total
ESTIMATED Freight Charges per truckload / delivery of steel Pricing is based on a package deal and all steel items listed on this estimate must be ordered together. Any reductions in the qty's listed may affect the pricing. Pricing is for a standard basket only. Advise if skewed or tapered baskets are required and pricing will be addressed accordingly. Pricing is based on materials being released for production prior to expiration date noted above. In the event materials are released for production after expiration date, raw material escalators that occur from bid date to production release date will be passed along at cost if applicable. A steel raw material prepay option is available to protect pricing and control cost. Raw materials must be prepaid prior to expiration date and pricing will then be good for the duration of the job and produced as required. Typically a six week lead time is sufficient to service project requirements. All orders are subject to the availability of raw materials.	99	EA	275.00	27,225.00
