RE: 09-356904, B.O. 10/15/2015

Mr. McMillan,

Please consider this letter our formal protest of the award of this project to Peterson-Chase General Engineering Construction, Inc. (Peterson). Peterson did not meet the DBE commitment goal on this project nor did they submit a good faith effort in lieu of making the goal.

Peterson's DBE Commitment form states the use of G&C Equipment Corp. (G&C) for guardrail and associated material supply and assigned the work category code C0600.

First, work code category C0600 is not part of the California Unified Certification Program database spreadsheet. On G&C's DBE record page work category code C0600 is present and described as "Misc Suppliers". Note 3 on the DBE Commitment form states to "Use Work Category Codes from the California Unified Certification Program (CUCP) database." Since this work category code is not part of the database this supplier's contribution to the DBE goal is not allowed. See Step 2 of the CalTrans' Fact Sheet used to Evaluate DBE participation by the Contract Evaluation Unit. The first bullet point states "ensure that the DBEs are certified by checking the CUCP database [cross referencing DBE work category code(s) with contract bid items] (if the DBE is not certified, their participation will not be counted.)" It is very clear using CalTran's own evaluation guide that this participation should not be allowed.

Second, there is a specific work category code for guardrail supply, C0683, which G&C does not have shown on their DBE record page. If they were truly a guardrail supplier they would have this work code. The CUPC database instructions state in bullet point nine "DBE firms must be certified with appropriate NAICS and Work Codes prior to bid opening to qualify as a responsible/responsive bid." This is the only bullet point

high-lighted red stressing the importance of this note, also the word "must" is underlined again stressing the requirement that the DBE MUST have the appropriate work code. Since G&C does not have the appropriate work code to supply guardrail their contribution to the DBE goal is not allowed.

Peterson also listed Sam's Equipment & Supplies (Sam's) for the rental of K-rail. Sam's is not a subcontractor since they were not listed by Peterson on the subcontract listing at bid time. Peterson would be non-responsive if they consider Sam's to be a subcontractor because Sam's was not listed. Because Sam's is not considered a subcontractor they have to be considered a material supplier. Sam's does not manufacture concrete barrier therefore is only eligible to contribute 60% of their quote to the goal. This means that of the $76,800.00 claimed participation only $46,080.00 is eligible for DBE participation and Peterson did not meet the DBE goal for this project.

Peterson listed KRC Safety Co., Inc (KRC) on their DBE Commitment form for bid item 2 and listed the description as "Traffic control system". Peterson did not describe the exact portion of the item to be performed in accordance with note 2 so it must be inferred that KRC is performing all the required work in that bid item. Traffic control requires labor to be present on the project site which means KRC is a subcontractor. Peterson did not list KRC as a subcontractor, therefore should be considered non-responsive since they are in violation of the subcontractor listing laws.

Because of the reasons stated above Peterson did not make the required DBE goal of 12%. They also did not submit a good faith effort and because of this should not be eligible to be awarded this contract.

Please call with any questions or if you require additional information.

Thank you,

Marc Roberts

# FACT SHEET

## Federally Funded Contracts
## Evaluating DBE Participation
## Role of OBEO, Contract Evaluation Unit

*May 2013*

The California Department of Transportation (Caltrans), Office of Business and Economic Opportunity (OBEO), Contract Evaluation Unit (CEU), is responsible for evaluating all Caltrans federally funded contracts and is responsible for counting Disadvantaged Business Enterprise (DBE) participation towards contract goals according to federal regulation. The CEU determines whether the goal has been met or an adequate good faith effort has been made by the contractor.

| **Bidder's Responsibility – For Meeting DBE Requirements** | |
|---|---|
| **Refer to the Special Provisions of the specific contract you are bidding on for your responsibilities. Contracts are advertised on the Office Engineer's (OE) website at** http://dot.ca.gov/hq/esc/oe/weekly_ads/index.php **and the Division of Procurement and Contracts' (DPAC) website at** http://caltrans-opac.ca.gov/contract.htm. | |
| **Contract Evaluation Unit's Responsibility – Counting DBE Participation** | |
| Step 1 | A contract is received from Office Engineer (OE) or Division of Procurement and Contracts (DPAC) and the CALTRANS Bidder-DBE Commitment form from the prime contractor is reviewed to see if the prime contractor met the goal. If not, the good faith effort will be evaluated. See 49 CFR, Part 26, Appendix A, for good faith efforts guidance. This determination is based only on information timely submitted with the bid. |
| Step 2 | Review the CALTRANS Bidder-DBE Commitment form from the prime contractor to:<br>• ensure that the DBEs are certified by checking the California Unified Certification Program (CUCP) database [cross referencing DBE work category code(s) with contract bid items] *(If the DBE is not certified, their participation will not be counted.)*<br>• ensure that the DBEs possess the correct work category code for the type of work they are listed to perform http://www.dot.ca.gov/hq/bep/find_certified.htm *(If the DBE does not possess the correct work category code, their participation will not be counted.)*<br>• verify the dollar amount claimed for credit is accurate<br>° amount claimed for credit on DBE Commitment form is consistent with written confirmation (quote) from DBE.**<br>° amount claimed for credit is consistent with the prime contractor's bid and subcontractor listing<br>Written confirmation (quotes) from the DBEs are reviewed to verify if the DBEs are committed to do the work on the Caltrans Bidder DBE Commitment form.**<br>****Important Note:** Rate sheets that are generic will not be accepted in lieu of written confirmation (quotes). This determination is based only on information timely submitted with the bid. |
| Step 3 | Counting DBE participation: DBE participation is "counted" only where it is demonstrated that a certified DBE possessing the correct work codes will be actively participating on the contract. CEU will count DBE participation as follows:<br>• The entire amount of that portion of a construction contract that is performed by the DBE's own forces are counted.<br>• DBE' participation will not be counted if the DBE is not certified at the time of bid or if a certified DBE does not possess the correct work codes.<br>• The method for counting trucking towards the DBE goal requires the following additional documentation: motor carrier permit, truck title, registration, and proof of insurance, trailer or tanker registration, bills of lading, sub-hauling agreements, existing commitments of trucking on other jobs, and subcontract specific information (e.g., type of material hauled, number of trucks/trailers/tankers, load capacity, distance traveled, and schedule). Truckers need to own at least one, operable, insured truck.<br>• DBE trucking firms receive 100 percent credit for the value of the hauling. DBE trucking firms who sublease to other DBE firms or DBE owner operators receive 100 percent of the value of the hauling.<br>• DBE trucking firms who sublease to non-DBE trucking firms or non-DBE owner operators receive credit for the transportation arrangement or broker fees ***only*** – typically from 5 -20 percent of the value of the hauling.<br>• Cost of material or supplies are counted at 60 percent for regular dealers. Those claiming to be regular dealers of bulk items must additionally demonstrate that they own and operate appropriate distribution equipment.<br>**Important Note:** There may be times when further clarification of commitment is requested for other types of work. |
| Step 4 | Determination is made regarding whether goal was met. If goal was not met, the good faith effort documentation will be evaluated.<br>**Important Note:** The steps above are not all inclusive. Other steps may be taken in the contract evaluation process. |
| Step 5 | The contracts are returned to OE or DPAC, whichever is applicable. |

**This Work Code Description Chart is a guide only and not a conclusive or comprehensive list of work performed by DBE firms. Certifying agencies use these descriptions, and the accompanying license and NAICS Code cross references, to assign codes that describe a firm's primary business activity. These codes distinguish DBE firms involved in the physically act of construction from those that provide support services and supplies to the construction industry. The tabulated spreadsheets have these various categories separated into specific workgroups. Please note that the issue of whether a firm performs Commercially Useful Function (CUF) is not reviewed at the time of certification (refer 49 CFR 26.73(a)(1));**

**Authority to Assign NAICS and Work Codes**

- DBE certifying agencies get their authority from 49 CFR 26.71(n) to assign NAICS Codes and Work Codes

- Certifying agencies can, in addition to applying the appropriate NAICS code, apply a descriptor from a classification scheme of equivalent detail and specificity

- The use of Work Codes is a descriptor that supplements the NAICS Codes in order describe work items on contract bid summaries or scope of work

- Certifying agencies must certify firms as DBEs only with respect to specific types of work in which the certifying agency determines that the socially and disadvantaged owners have proven ability to control operations of the firm

- There is no such thing as a "generic" certification, that is, DBE firms are not certified in general terms, in ways that make them eligible to perform any sort of work. Put another way, DBE firms cannot base list their business activity as something they intend to do in future after certification.

- At the time of application a DBE firm must provide the primary business or professional activities the firm is engaged in to enable correct code assignment (primary business is what brings in the most revenue for the business)

- An applicant firm has the sole responsibility of providing detailed company information to a certifying agency to help make an appropriate NAICS and Work Code designations (Work Code designation is not based on the request of a prime contractor to facilitate DBE participation).

- Where a DBE firm intends to be certified in "additional work" after initial certification, the firm needs to demonstrate that its socially and economically disadvantaged owner(s), not employees or acquaintances, are able to control the firm regarding the additional type of work.

- DBE firms must be certified with appropriate NAICS and Work Codes prior to bid opening to qualify as a responsible/responsive bid. As indicated above, CUF is not reviewed during the certification process. Prime contractors must conduct their own due diligence to verify if a firm listed on the DBE database performs a CUF before they commit to use the firm. This prevents DBE firms from being disallowed post-bid commitment.

- NACIS Codes and Work Codes are assigned based on documentary evidence and site visit interview that support an applicant's ability to control technical and operational aspects of their firm, including the disadvantaged owner having all the license necessary to demonstrate control.
- In many instances, the ability to control operations may require specific qualification or license from accredited institution or state agency. Failure to provide proof of such qualification or license may prevent an applicant from obtaining NAICS and Work Codes
