*Vibration Monitoring, Construction Instrumentation, Photo Surveys*

Our construction related services includes:

## **GENERAL GEOTECHNICAL INSTRUMENTATION.**

We have provided and are currently monitoring HSPs and VWPZs on three separate projects. We have provided and operated over 120 HSP installations on Caltrans and VTA projects. We collect data and generate reports on most of our instrumentation remotely, with dataloggers and cellular modems. This allows us to monitor the performance of temporary and short term heavy construction systems in near real time. Since we specialize in this work, we've debugged the systems for reliability, using dataloggers retrofit for and by us to allow for remote logging and internet data access. We have used these systems for real time alerts when parameters may exceed the established values and may need to be addressed.

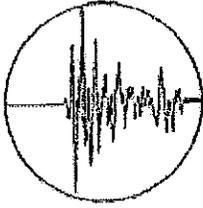

However, site constraints especially the distance between the instrumentation installations called for here makes remote reading which would require dataloggers at each location (25) with special and more expensive HSP configurations and/or long signal cable runs, impractical.

## **VIBRATION MONITORING.**

With eighty (80) specialty construction monitoring seismographs, we do more vibration monitoring than anyone. west of the Mississippi and probably more than all other firms in California combined. We have conducted vibration monitoring from Newport, RI to Seattle, WA to Ensenada, Mexico. In the Bay Area, we conducted vibration monitoring on the Central and Bayshore Viaducts and the Doyle Drive 4 and Presidio Parkway projects, the Cypress Freeway replacement projects, the Webster/Posey Tubes retrofits, the West Approach to the Bay Bridge project, multiple other projects on the San Francisco Oakland Bay Bridge and large numbers of public and private projects.

## **PRE-CONSTRUCTION PHOTO SURVEYS.**

Municon has conducted more existing condition photo surveys than other firms. We have completed preconstruction surveys for the City of San Francisco PUC on the New Irvington Tunnel, the Harry Tracy WTP, and the Richmond Transport Tunnel. We were consultants to prime contractors on the seismic retrofits of the historic San Francisco City Hall, the California Palace of the Legion of Honor, the Los Angeles City Hall and multiple projects at the San Francisco International Airport.

# *Municon Consultants*

*Vibration Monitoring, Construction Instrumentation, Photo Surveys*

We specialize building photo surveys with large numbers of buildings included (as many as 350) and the document control of data.

## **NOISE (SOUND) MONITORING**

We have monitored construction generated noise with sound level meters at pile driving projects throughout northern California including in-water at the San Francisco Oakland Bay Bridge Pile Installation Demonstration Project, the new Brannan Street Pier, and numerous Caltrans projects throughout the state. We are currently monitoring construction generated noise on BART's Warm Springs Extension, the Yerba Buena Island Transition structure on the new Bay Bridge work, at the Doyle Drive 4/Southbound Battery Tunnel and Presidio Parkway Projects and the New Irvington Tunnel project in Fremont. We have recorded air overpressure on numerous blasting projects in Reno and the Sierra foothills.

With extensive experience in various forms of geotechnical and structural instrumentation, we are uniquely qualified to handle this assignment. We can apply these same familiar methods to monitoring your work on this project.

We look forward to working with you on this and other projects in the future.

Yours truly,  
MUNICON Consultants

**SR 12 TERMINOUS CDOT 10-0G8004 3 of 8 PROPOSAL FOR GEOTECHNICAL  
INSTRUMENTATION SERVICES**

# *Municon Consultants*

*Vibration Monitoring, Construction Instrumentation, Photo Surveys*

## **4.00 GEOTECHNICAL INSTRUMENTATION.**

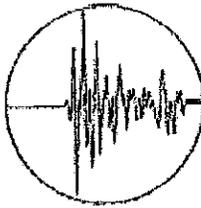

### **4.01 GENERAL.**

The project is in San Joaquin County on Kettleman Lane near Stockton on SR 12 and near Rio Vista and Terminous from Mokelumne River Bridge over the Mokelumne River near Brannan Island to Little Potato Slough Bridge over Little Potato Slough at Terminous. The estimated cost of the project is \$29,000,000. The work is mostly the addition of fills. Most of the work area is underlain by highly compressible peat. Wick drains are to be used to accelerate anticipated settlements which are anticipated to be as much as one to four meters (3-12 feet). We propose herein to furnish, participate in the installation of, read and maintain hydraulic settlement platforms (HSP) and push in type vibrating wire piezometers (VWPZ). Installation of the push-in VWPZs to be by your specialty geotechnical instrumentation drilling subcontractor usually with a CPT rig.

Per SS 10-1.34 "The Contractor shall install fluid level settlement platforms... and "Contractor shall install push-in vibration wire piezometers (VWPZ)...". And read weekly "... once fill placement has begun and continuing until the end of the settlement period ..." and monthly till the end of the contract

### **4.02 PREPARE WORK PLANS.**

We will prepare submittal documents describing the instruments proposed and the methods of construction necessary for their installation for your submittal to Caltrans. You should have your surveyor layout the locations of the HSPs and VWPZs. The work plans will include details for you to follow and for your driller's participation in the installation of the VWPZs. Due to the differential elevations shown on Plan Sheet 2 of 130, we will allow for our preparation of a profile/section sketch for each of the twenty-five (25) HSP & VWPZ locations which will show approximate elevations for the HSP relative to the hydraulic readout location. We will prepare these work plan submittal documents for both the HSPs and VWPZs for your submittal to Caltrans and for your guidance in construction for a LS = .. \$7,500.

# *Municon Consultants*

*Vibration Monitoring, Construction Instrumentation, Photo Surveys*

## **4.10 FURNISH GEOTECHNICAL INSTRUMENTATION - HSPs & VWPZs.**

### **4.11 FURNISH HSPs.**

We will fabricate twenty-five (25) HSP systems including the settlement platforms, hydraulic and air vent lines and readout units. These are not recoverable as they would be buried in the fills. Portions of the readout modules will be recoverable and we will recover same upon completion. We will furnish these HSPs to the project for our use on the project for \$1,150/ea x 25 = ..... \$28,750.

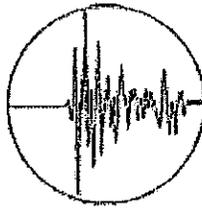

### **4.12 FURNISH VWPZ.**

We will acquire twenty-five (25) push in type VWPZs with appropriate length of signal cables and furnish these for our use on this job. We will assemble and provide vibrating wire readout systems. We will furnish twenty-five (25) VWPZs with signal cables and readout boxes for \$950/ea x 25 each = ..... \$23,750.

## **4.20 INSTALL GEOTECHNICAL INSTRUMENTATION.**

### **4.21 PARTICIPATE IN INSTALLATION OF HSPs.**

We will furnish you with details for the installation of the HSPs. You will need to place a limited amount of fill over the existing ground at the locations of each of the HSPs, excavate a shallow trench (12" x 12" or similar) transverse to the alignment of the roadway, place initial sandy material shading in the trench for us to lay the vulnerable plastic HSP hydraulic and air vent lines. We will install the hydraulic and air vent lines in your prepared trenches, make all connections and fill the hydraulic lines with distilled water. You will place shading fill over the HSP lines to one foot above the lines. We will connect the lines to the readout locations. You may wish to have your geotechnical instrumentation driller install all the VWPZs in one operation to minimize mob and demob charges. This will necessitate installation of all the HSPs in the same operation at the same time. There is no need to begin readings of the instruments until you begin placing the fills.

# Municon Consultants

Vibration Monitoring, Construction Instrumentation, Photo Surveys

We will assume that you will schedule your work such that we can install no less than four (4) HSP systems at a time.

### 4.22 PARTICIPATE IN INSTALLATION OF HSPs & VWPZs.

You will have an experienced geotechnical instrumentation driller install the push-in type piezometers with a CPT rig or equivalent. We will furnish, pretest, deliver to the site, and post installation test the VWPZs. We will run the VWPZ signal cables in the same trench as the HSPs with the HSP hydraulic and vent lines in the trenches by you, to the side of the fill where we will install the VWPZ readout dongle boxes and make connections. We assume that you and we can install the VWPZ signal cables in the same trench as the HSP tubes and at the same time. We will participate in the installation of the HSPs and VWPZs. We will "install" the HSPs on small pads (2'x2') and install the HSP fluid tubing and vent tubing in shallow (1' x 1') trenches which you should excavate in the initial leveling fill. We will lay the VWPZ signal cables in the same trench alongside the HSP tubes. You can then shade with sand and place initial hand placed backfill to 1' over the tubes and signal wires. We will participate in the installation and set up of the HSPs and VWPZs for \$500/ea x 50 each = .....  
**\$25,000.**

### 4.30 READ HSPs AND VWPZs.

We will visit the site and read the HSPs and VWPZs and assume that initially there may be no more than ten (10) HSPs and ten (10) VWPZs at a time. We will read up to ten sets of systems (a set or array includes both the HSP and VWPZ which are adjacent to each other or within five (5) feet of each other) during a visit for \$1050/ visit and up to twenty-five (25) arrays for \$1,900/visit -data set.

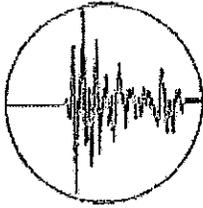

Read up to ten (10) arrays for \$1,050/data set x 8 weeks = ..... **\$8,400.**

Read over ten (10) arrays and up to twenty-five (25) arrays for \$1,900/data set and monthly till the end of the contract or for forty (40) readings = .... **\$95,000.**

**SUBTOTAL FOR READINGS ..... \$104,400**

### 4.40 MAINTAIN HSPs AND VWPZs.

We will perform monthly maintenance on the HSPs and VWPZs during weekly readings

# Municon Consultants

Vibration Monitoring, Construction Instrumentation, Photo Surveys

visits and during monthly readings. We allow for our performing routine maintenance on both sets of instruments during our weekly and monthly visits for reading these instruments. We will perform routine maintenance for \$40/mo/ea array for twenty-five arrays x twelve months (12 mo.) = ..... \$12,000.

#### 4.50 RECOVER HSP READOUTS & VWPZ READOUTS.

We will remove the above ground portions of the HSP readout installations and the VWPZ readout dongle boxes and supports. We will assume that portions of these installations can be retired from service during the project work such that we can remove portions of the installations during our weekly and monthly visits. We will not charge for removal as that can be done during the final monthly reading visit.

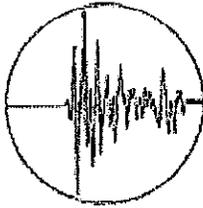

Any abandonment of the below ground portions of the HSPs or VWPZs, as may be required by the local groundwater regulating agency should, as customary, be by your instrumentation driller.

#### TOTAL PROVIDE, INSTALL AND READ HSPs AND VWPZs ... \$201,400.

If the projected ultimate settlement is as much as 1-4 meters, then the specified HSPs may not be suitable. It may be possible for us to be able to make and configure standard HSPs able to accommodate as much as two or three feet of settlement.

However, if the projected settlement is more than two or three feet, then a modified HSP system may be more effective. We have been working on a modified HSP system which can be datalogged. We could furnish these for use on the job. The extra cost for use of modified HSP systems would be on the order of \$75,000. Since we would be able to recover the dataloggers at the completion of the work, we would charge a monthly use charge of \$250/ea/month or \$6,250/month for all twenty-five HSP & VWPZ arrays.

The corresponding charges for reading the datalogged HSPs and VWPZs in combination would be less by \$700/reading set or \$700 x 64 data sets = .... (- \$44,800). Maintenance charges and charges for providing and installing the VWPZ remains the same.

## **5.00 CONTRACTUAL TERMS CONDITIONS & LIMITATIONS.**

**5.10** Authorization to be by simple purchase order referencing this proposal. Please note that this is a unit priced proposal. If you need our services for more or less time, the quoted unit prices should be applicable.

**5.20** Payment within 30 days.

**5.30** No retention.

**5.40** The services offered here are professional services. We do no construction work. No performance bonds are offered.

**5.50** Access arrangements, if any, where needed, to be provided by project owner.

**5.60** We can provide certificates of insurance limited to our existing coverages.

**5.70** Unless specifically called for or explicitly offered herein, data reports, written interpretations or professional opinions are not included.

**5.80 CONTRACTOR** to have an experienced specialty geotechnical instrumentation drilling subcontractor push in the VWPZs. GC to prepare pads for HSPs, cut shallow trenches for HSP hydraulic lines, vent lines and VWPZ signal cables, perform shading, hand filling and similar work. GC to coordinate wick drain installations, horizontal strip drains and geosynthetic fabric installations with the instrumentation work herein.

We look forward to working with you on this and other projects in the future.

Yours truly,

We have been doing this work for 22 years and have a strong record of repeat business.

**\*\* *We are Experienced* \*\***

We have more of this type of monitoring experience than anyone on the West Coast. We have conducted extensive HSP and VWPZ monitoring on many Caltrans and VTA projects and have successfully coordinated with specialty geotechnical instrumentation drilling subcontractors.

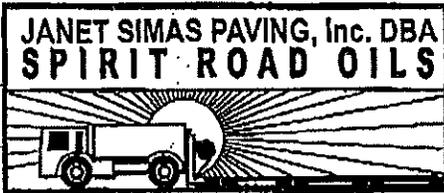

**\*\* *We are Safety Conscious* \*\***

We hold regular weekly "toolbox" safety meetings as our personnel are regularly tending our equipment on or adjacent to contractor heavy construction sites. Our personnel have been given safety & security orientation and training for various heavy on water and over water as well as underground projects. We are c-rail safety certified.

## R.A. NEMETZ CONSTRUCTION CO., INC. SUBCONTRACT PROPOSAL PROVISIONS

**A. PAYMENT TERMS** - Monthly progress payments shall be made to NEMETZ within 10 days of payment to CONTRACTOR by OWNER. If releases are required by CONTRACTOR as a condition of payment, CONTRACTOR shall notify NEMETZ in a timely manner so as to not delay payment. Should CONTRACTOR fail to notify NEMETZ of each release required within 5 days after payment to CONTRACTOR by OWNER, furnishing each such release shall not be a condition of payment. Accounts past due shall bear interest at the rate of one and one-half percent (1-1/2%) per month.

CONTRACTOR may reduce each progress payment to NEMETZ by the same percentage as the OWNER's reduction in payment to CONTRACTOR. This retention rate will not be greater than the OWNER's retention rate to CONTRACTOR. Any retention so withheld shall be paid to NEMETZ within 30 days of substantial completion of NEMETZ's work.

No backcharges will be accepted by NEMETZ if NEMETZ is not given prior written notification and the opportunity to correct any alleged deficiencies with its own forces.

When extra work is paid on a time and material basis, NEMETZ shall be paid all markups for profit and overhead allowed by OWNER except for any additive markup allowed by OWNER specifically to compensate CONTRACTOR for NEMETZ's work.

Prices include sales and other taxes unless otherwise stated in the Special Provisions of this proposal.

Payments shall be made for actual quantities furnished and installed if so specified by the GENERAL CONTRACT. CONTRACTOR shall cooperate in making determination of these quantities if required.

This proposal may be withdrawn if CONTRACTOR cannot, to the satisfaction of NEMETZ, demonstrate its ability to finance the work and make payments in accordance with this proposal.

**B. SCHEDULE** - The prices proposed are based upon receipt of a written notice to proceed 5 days prior to commencing work, unhindered access to the work area, and working 8 hour per day and 40 hour per week shifts Monday through Friday except as modified by the specifications of the GENERAL CONTRACT. NEMETZ shall be compensated for any additional costs due to special shift work if required by CONTRACTOR.

Work shall be completed in conformance with an agreed upon job schedule. The job schedule shall be approved by NEMETZ prior to commencement of work. NEMETZ's liability for liquidated damages and costs for delays to the contract shall be limited to the extent that OWNER deducts such costs from CONTRACTOR's account and to the extent that NEMETZ is solely and directly attributable for the delays.

**C. INDEMNITY and INSURANCE** - NEMETZ and CONTRACTOR shall indemnify, defend and save harmless each other and each other's officers, directors and employees from and against any suits, actions, legal or administrative proceedings, claims, debts, demands, damages, liabilities, interest, attorney's fees and other costs whether they arise before, during or after completion of Nemetz's work to the extent that they are due to any act or omission of the indemnifying party or any subcontractor thereof, or of any officer, director or employee of the indemnifying party. The same shall include injury or death to any person or persons and damage to any property.

NEMETZ shall provide insurance coverage for its operations in the amounts of: \$1,000,000 per occurrence, \$2,000,000 general aggregate and \$5,000,000 excess liability. Costs for additional coverage or special requirements shall be reimbursed to NEMETZ by CONTRACTOR.

**D. BONDS** - NEMETZ will furnish payment and performance bonds if requested by CONTRACTOR. Premiums to be paid directly by CONTRACTOR.

**E. GENERAL CONDITIONS** - Unless otherwise stated in this proposal, NEMETZ includes traffic control and mobilization for its work only and excludes all clearing, grubbing, and staking. CONTRACTOR is to relocate, remove and replace any conflicting utilities or improvements. CONTRACTOR is to provide a source of water. NEMETZ excludes all costs for permits and fees.

**F. ACCEPTANCE** - This proposal is valid for 30 days from the date of the proposal. Acceptance by CONTRACTOR may be contingent upon award by OWNER. This proposal shall constitute a contract when CONTRACTOR gives NEMETZ oral or written notice of acceptance.

**Special Conditions:**

- RES will not perform extra work at force account until a CCO for said extra work is fully executed or another method for paying for extra work is established so that extra work will be paid on the next progress estimate following the start of the extra work.
- All work not paid at a quoted item rate will be charged to the prime at a rate no less than the Caltrans extra work rate for subcontractors with standard markups, regardless of the payment or reimbursement to prime from owner.

3. No amounts shall be withheld from our extra work payments. Only the prime's markup on RES, should the owner pay the markup, may be withheld.
4. Release of progress and final payments within five (5) calendar days of warrant date or EFT date whichever is sooner.
5. Price based on mutually agreed upon schedule, in writing, with 45 days written notice for all move-ins.
6. Prices subject to change if not accepted in writing within thirty (30) days.
7. RES will require prime contractor to coordinate construction activities at each location.
8. Prime to provide and maintain all weather track grade, clear of obstacles.
9. Prime to provide clear and safe concrete mixer or truck or concrete pump access to the work
10. All barrier paving to be done by machine, from the high side of the barrier, machine to run on final lift of pavement
11. Our insurance for this project will not include coverage beyond the standard limits carried by RES, or an excess umbrella liability policy.
12. RES shall receive copy of all CPM's and schedules and their revisions with time to comment and dispute prior to submittal to owner failure to comply shall relieve RES of any obligations related to the contents of the schedule or impacts to the schedule and any related penalties. In the event that durations or information is forwarded to Caltrans without the consent of RES and the unapproved information becomes part of a claim or contract change order any monetary consequences will become the Contractor's responsibility. Referring RES to review the project schedule at the contractor's office is not acceptable.
13. Prime Contractor to provide **BARRIER** survey staking for line and grade. Survey points need to be 1.2 meters offset from left/right of center line of barrier with a fill to top of barrier marked on stakes. The left/right of centerline is to be determined with RES superintendent on site. Staking to be 20 meter centers in tangents and 10 meter centers in radius. Should survey not be provided exactly as stated above, RES reserves the right to have it provided by a third party and shall charge the prime contractor for these costs plus 5% markup for administrative fees.
14. This quotation shall be made an integral part of our subcontract agreement as a scanned copy of this exact document, in its entirety, and as such shall supersede any conflicting language in the subcontract agreement. Rewording or paraphrasing of our terms for inclusion in subcontract is unacceptable.
15. RES rejects all of the terms in every prime contractor advertisement and solicitation, and encourages primes to assist with DBE participation.
16. Prices bid as a package, please call before splitting.
17. Jobsite water at work areas and sanitary facilities to be provided by others at no cost to RES.
18. RES will require any temporary k-rail movement and specific location of k-rail openings to be coordinated with its operations and will be staging paving equipment and related equipment at worksite unless other arrangements satisfactory to RES are made in advance at no cost to RES.
19. Prices are based on working standard shifts without overtime.
20. Price based on RES using no more than 1 apprentice to assist in meeting the federal requirement.
21. Prices listed above include mobilization as follows; 1 mob for barrier. Additional mobilizations add \$7500 each, no credit for fewer.
22. Escalator of \$4 per linear foot for items 92, 99, and 100 beginning 10/1/15; and an additional \$6 per linear foot every 6 months thereafter until the completion of this project.
23. Escalator of 5% for item 102 beginning 1/1/14; and an additional 3% every 6 months thereafter until the completion of this project. This escalator can be waived if; RES is directed to order the gate system before 11/1/13, RES is paid MOH for the gate system, contractor provides a secure on-site storage area for the gate system that is out of the weather. Contractor would be responsible for lost or damage parts. RES would include unloading the gate systems once and transport from storage to install site once, any other moving or unloading would be billed to others at force account with standard subcontractor markups.

We are pleased to submit, for your consideration, the following bid for the supply and installation of Prefabricated Vertical Drains (also known as wick drains), as described in detail below. The following inclusions, exclusions, and general conditions are the basis of HB's price to do the work, and must be included in the final contract to perform the work at the offered price. Should you have any questions with this offer, please don't hesitate to contact myself at the numbers listed above.

**1.0 PROJECT:**

Project Name : Hwy 12, San Joaquin County, CA  
HB Opportunity # : OP0009713  
Bid Quantity : 2,840,000 LF Drainage Wick, 22,700 LF Horizontal Strip Drain  
Material : MD-7407 wick drain, 6" wide horizontal drain  
Depth : 60 foot maximum  
Drain Spacing : 5' triangular  
Bid documents : Through Addendum 4

1,260,050.

**PROJECT APPROACH:**

We understand Prefabricated Vertical "Wick" drains are being considered to accelerate consolidation of soft soils beneath a 4 mile long widening of CA Hwy 12.

Our offer is based upon the understanding that our work will take place in a single mobilization, equipment will arrive after relocation of any site utilities, to a site that has been cleared and stripped of any vegetation/fill/debris and graded flat, with suitable working platform construction to support our equipment. Adequate access and traffic control will be provided, and each wick drain location marked.

**2.0 EXCLUSIONS:**

Our bid anticipates that the following items will be undertaken by the General Contractor, and the costs of these items are not included in our Bid Price.

1. Site operations, including but not limited to:
  - a) Preparing a level work pad capable of supporting HB's equipment with a total weight up to 175,000 pounds.
  - b) Any and all procurement and placement of materials for working pad and surcharge.
  - c) Project surveying, and marking of each individual wick drain location with pin flags or similar.

California · Colorado · Pennsylvania · Alberta  
[www.HBWickDrains.com](http://www.HBWickDrains.com)  
Equal Opportunity Employer

- d) Traffic and Pedestrian control, including signs, barricades, flagmen, etc., as necessary.
- e) All Access to the working pad.
- f) A smooth and level lay down area (approximately 100' x 150').
- g) Maintenance of a site free of standing water.
- h) Provide sanitary facilities adjacent to the wick drain area for HB personnel.
- i) Location verification, protection, and relocation of any overhead or underground utilities.
- j) Removal of any rip rap or fill material that has been placed prior to the wick drain installation that is detrimental to the wick drain installation process.
- k) Pre-Augering (stiff sands/silts/clays) or Pre-Drilling (boulders, large concrete debris, etc.).
- l) Project drawings or as-built records.

**3.0 QUOTATION:**

Item	Description	Unit Cost	Estimated Quantity	Total
	Initial Mobilization (3 units)	\$30,000	3 EA	\$90,000.00
	Mobilize Additional Units	\$30,00.00 EA		
	Supply & Install Drainage Wick	\$0.40/LF	2,840,000 LF	\$1,136,000.00
	S&I Horizontal Strip Drain	\$1.50/LF	22,700 LF	\$34,050.00
<b>Basis of price includes:</b> <ul style="list-style-type: none"> <li>• HB anticipates using an excavator/installation rig with a possible combined weight of 175,000 pounds. All site stability, access and transport of equipment to work area shall be prepared accordingly.</li> <li>• Initial Mobilization will be charged for each time equipment must be established on the project.</li> <li>• HB has no contaminated soils or other hazardous conditions costs included.</li> <li>• Liquidated Damages: No</li> <li>• Union: Yes</li> <li>• Buy America: Yes</li> </ul>				

**4.0 VALIDITY:**

Price will remain open for acceptance for 30 days from the date of this proposal. Prices quoted are based upon the assumption that the works will commence within 90 days from the date of this proposal. If authorization to proceed is delayed beyond this time period, HB shall be allowed to increase the quoted prices in proportion to the actual increases in labor and materials costs incurred.

**5.0 SCHEDULE:**

1. Subsequent to the initial mobilization, and set up of the equipment, HB anticipates the installation time will be approximately 60 working days (for three Wick Installation units). This installation rate will be exclusive of delays due to the weather, operations of the owner or general contractor, or other causes beyond the control of HB.
2. HB anticipates working one shift of 10 hours, 6 days per week. At HB's discretion and subject to approval by the owner, additional hours or weekend work hours may be performed, without incurring any additional cost for site supervision or inspection.
3. HB shall have continuous, uninterrupted, and systematic access to the worksite for the duration of the project.
4. Subject to availability, HB can provide additional equipment to meet the General Contractor, or owner's requirements, and reserves the right to renegotiate the mobilization price based on the situation.
5. Priced is based on two weeks notice for mobilization. HBWD shall be entitled to additional costs for a rushed mobilization, if required.

**6.0 PAYMENT:**

1. HB will be paid in full within 45 days of substantial completion of the HB Scope of work. We will not wait for the General Contractor to complete the contract for holdback or retention.
2. Should the final quantity change by 15% or more HB reserves the right to an equitable adjustment in the unit rate.

We appreciate this opportunity to submit this Bid, and we look forward to working with you. If you require any additional information, or clarification of any aspect of this Bid, please do not hesitate to contact me at the numbers listed below.

## GENERAL CONDITIONS - WICK DRAIN INSTALLATION

### 1. Submittals and Materials Shipment

Material samples and other submittals, as required, will be forwarded for approval within ten (10) working days after receipt of an executed contract. Shipment of materials can begin within four (4) weeks after receipt, by HB, of written approval of submittals.

### 2. Surface Preparation and Acceptance

The General Contractor or Owner shall be responsible for preparing the work site to the required standard, suitable for installation of the Wick Drains. Included in such site preparation is the removal of any asphalt roadway base course material or other debris; identification, and relocation if necessary, of all underground and overhead utility works that may be in conflict with the wick drain installation operation; and ensuring that there is a smooth, relatively level working surface capable of supporting a 175,000 lb. hydraulic excavator and installation mast (12 psi track pressure).

ACCEPTANCE BY HB OF THE SITE PREPARATION, AND COMMENCEMENT OF WORK SHALL NOT RENDER HB LIABLE OR RESPONSIBLE FOR ANY LOSSES OR DAMAGE TO THE CONSTRUCTED PROJECT OR EXISTING WORKS RESULTING FROM SUBSEQUENT CHANGE OR DETERIORATION OF THE CONDITION OF THE PREPARED SITE.

### 3. Project Supervision

All phases of the installation will be under the supervision of a qualified HB Site Manager, and conduct of the work will be solely under his control and at his discretion, subject to the terms of the Contract.

### 4. Project Schedule

Completion of the project is anticipated within the time period set out in the body of the Proposal. If HB is delayed in the performance of their work, by an act or omission of the Owner, Consultant, other Contractors, or other causes beyond the control of HB, the completion date of the Contract shall be extended accordingly, and HB shall be compensated for all reasonable costs incurred due to such delays.

HB SHALL NOT BE LIABLE FOR ANY INDIRECT, INCIDENTAL OR CONSEQUENTIAL LOSSES OR DAMAGES SUFFERED BY THE OWNER OR GENERAL CONTRACTOR, HOWEVER CAUSED AND HOWSOEVER RESULTING WHETHER FROM DELAYS IN COMPLETION OF THE WORK OR OTHERWISE.

### 5. Mobilizations

The Proposal Price provides for one (1) mobilization and demobilization to and from the site for one Wick Drain installation units. If the overall construction program requires more than one mobilization, HB will, upon receiving reasonable written notice, accommodate the needs and desires of the Owner or General Contractor, to the best of HB's ability, subject to other HB commitments for installation personnel and/or equipment. HB shall be paid additional compensation to cover expenses incurred as a result of such remobilizations.

### 6. Payment Terms

The Proposal Price presented above is based on the finished lengths of wick drain (including cut-off tab) and appurtenant works installed, as set out in the Proposal on a Unit Price Basis. Upon completion of the works, and at interim periods as necessary for progress evaluation, a measurement will be conducted by HB and the Owner's representative, to determine quantities for interim payments and major changes in the scope of the work. Any dimensional variations from those shown in the Bid Documents will result in proportional changes in the Contract Price. Compensation for such changes will be resolved between HB and the Owner's representative, prior to completion of the works.

Payment for works covered under this Proposal, shall be made in accordance with the Contract Documents with the following exception: Invoices for work completed, will be submitted by HB on a monthly basis, and shall be payable net thirty (30) days. All invoices not paid in accordance with the above will be subject to interest at the rate of eighteen percent (18%) per annum.

### 7. Liability and Indemnity

HB will be liable for and agrees to indemnify the Owner with respect to claims in contract, tort or otherwise for losses, liabilities, judgments, penalties or expenses, resulting from bodily injury, death or property damage, whether suffered or incurred by the Owner or any third party, arising from the performance of the Work by HB, its agents, employees or Subcontractors, except where the injury, death, loss or property damage is caused by the negligence of the Owner.

In no event shall HB be liable in contract, tort or otherwise for consequential, indirect or special loss or damage, including without limiting the generality of the foregoing, economic loss, loss of profits or losses arising from business interruption, whether suffered or incurred by the Owner, or any third party.

The Owner shall and does hereby indemnify and save harmless HB, its officers, servants, agents, subcontractors and assigns from and against any and all claims made by third parties, arising from:

- a) All claims in contract, tort or otherwise for losses, liabilities, judgments, penalties or expenses resulting from bodily injury, death or property damage whether suffered or incurred by HB or any third party arising from the negligence of the Owner.
- b) Any act or omission of HB in the performance of the Work in respect of all consequential, indirect or special loss or damage, including without limiting the generality of the foregoing, economic loss, loss of profits and losses arising from business interruption.

### 8. Quantity

Should the estimated project quantity change by more than 15%, HB reserves the right to an equitable Adjustment.

### 9. Attorneys Fees

In the event of legal action the prevailing party will be entitled to attorneys fees.

Re: DBE Certification

We are pleased to advise you that after careful review of your application and support documentation, the San Francisco Bay Area Rapid Transit District (BART) has determined that your firm meets the eligibility standards to be certified as a Disadvantaged Business Enterprise (DBE) under the U.S. Department of Transportation Regulations 49 CFR Part 28 as amended. Your firm has been added to the California Unified Certification Program (CUCP) database of certified DBE under the specific expertise codes. The **Expertise Code(s)** for your business is/are:

**237310 Highway, Street, Bridge Construction – Metal Beam Rail**

Please be advised that your DBE certification status applies only for the above code(s) and any additions, revisions and changes must be submitted to the BART Office of Civil Rights (OCR) for review and approval. Your DBE certification status will be honored by all of the CUCP members.

Your DBE certification is good for five years and must be renewed on December 1, 2015. Our office will notify you, prior to the renewal date, of the documentation required to recertify your firm with BART. DBE certification is subject to review at any time. However, it is your responsibility to notify this office of any change in ownership and/or control, as well as current address and phone number prior to your recertification date.

Should you have any questions, please contact OCR at (510) 464-6103

Sincerely,

Ron A. Granada

We have been doing this work for 22 years and have a strong record of repeat business.

**\*\* *We are Experienced* \*\***

We have more of this type of monitoring experience than anyone on the West Coast. We have conducted extensive HSP and VWPZ monitoring on many Caltrans and VTA projects and have successfully coordinated with specialty geotechnical instrumentation drilling subcontractors.

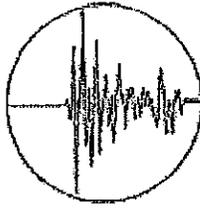

**\*\* *We are Safety Conscious* \*\***

We hold regular weekly "toolbox" safety meetings as our personnel are regularly tending our equipment on or adjacent to contractor heavy construction sites. Our personnel have been given safety & security orientation and training for various heavy on water and over water as well as underground projects. We are e-rail safety certified.

**SR 12 TERMINOUS CDOT 10-0G8004 1 of 8 PROPOSAL FOR GEOTECHNICAL INSTRUMENTATION SERVICES**

# *Municon Consultants*

*Vibration Monitoring, Construction Instrumentation, Photo Surveys*

Our construction related services includes:

## **GENERAL GEOTECHNICAL INSTRUMENTATION.**

We have provided and are currently monitoring HSPs and VWPZs on three separate projects. We have provided and operated over 120 HSP installations on Caltrans and VTA projects. We collect data and generate reports on most of our instrumentation remotely, with dataloggers and cellular modems. This allows us to monitor the performance of temporary and short term heavy construction systems in near real time. Since we specialize in this work, we've debugged the systems for reliability, using dataloggers retrofit for and by us to allow for remote logging and internet data access. We have used these systems for real time alerts when parameters may exceed the established values and may need to be addressed.

However, site constraints especially the distance between the instrumentation installations called for here makes remote reading which would require dataloggers at each location (25) with special and more expensive HSP configurations and/or long signal cable runs, impractical.

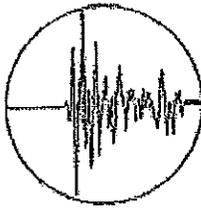

## **VIBRATION MONITORING.**

With eighty (80) specialty construction monitoring seismographs, we do more vibration monitoring than anyone. west of the Mississippi and probably more than all other firms in California combined. We have conducted vibration monitoring from Newport, RI to Seattle, WA to Ensenada, Mexico. In the Bay Area, we conducted vibration monitoring on the Central and Bayshore Viaducts and the Doyle Drive 4 and Presidio Parkway projects, the Cypress Freeway replacement projects, the Webster/Posey Tubes retrofits, the West Approach to the Bay Bridge project, multiple other projects on the San Francisco Oakland Bay Bridge and large numbers of public and private projects.

## **PRE-CONSTRUCTION PHOTO SURVEYS.**

Municon has conducted more existing condition photo surveys than other firms. We have completed preconstruction surveys for the City of San Francisco PUC on the New Irvington Tunnel, the Harry Tracy WTP, and the Richmond Transport Tunnel. We were consultants to prime contractors on the seismic retrofits of the historic San Francisco City Hall, the California Palace of the Legion of Honor, the Los Angeles City Hall and multiple projects at the San Francisco International Airport.

**SR 12 TERMINOUS CDOT 10-0G8004 2 of 8 PROPOSAL FOR GEOTECHNICAL  
INSTRUMENTATION SERVICES**

# *Municon Consultants*

*Vibration Monitoring, Construction Instrumentation, Photo Surveys*

We specialize building photo surveys with large numbers of buildings included (as many as 350) and the document control of data.

## **NOISE (SOUND) MONITORING**

We have monitored construction generated noise with sound level meters at pile driving projects throughout northern California including in-water at the San Francisco Oakland Bay Bridge Pile Installation Demonstration Project, the new Brannan Street Pier, and numerous Caltrans projects throughout the state. We are currently monitoring construction generated noise on BART's Warm Springs Extension, the Yerba Buena Island Transition structure on the new Bay Bridge work, at the Doyle Drive 4/Southbound Battery Tunnel and Presidio Parkway Projects and the New Irvington Tunnel project in Fremont. We have recorded air overpressure on numerous blasting projects in Reno and the Sierra foothills.

With extensive experience in various forms of geotechnical and structural instrumentation, we are uniquely qualified to handle this assignment. We can apply these same familiar methods to monitoring your work on this project.

We look forward to working with you on this and other projects in the future.

Yours truly,  
MUNICON Consultants

SR 12 TERMINOUS CDOT 10-0G8004 3 of 8 PROPOSAL FOR GEOTECHNICAL  
INSTRUMENTATION SERVICES

# *Municon Consultants*

*Vibration Monitoring, Construction Instrumentation, Photo Surveys*

## **4.00 GEOTECHNICAL INSTRUMENTATION.**

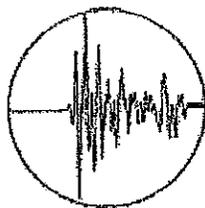

### **4.01 GENERAL.**

The project is in San Joaquin County on Kettleman Lane near Stockton on SR 12 and near Rio Vista and Terminous from Mokelumne River Bridge over the Mokelumne River near Brannan Island to Little Potato Slough Bridge over Little Potato Slough at Terminous. The estimated cost of the project is \$29,000,000. The work is mostly the addition of fills. Most of the work area is underlain by highly compressible peat. Wick drains are to be used to accelerate anticipated settlements which are anticipated to be as much as one to four meters (3-12 feet). We propose herein to furnish, participate in the installation of, read and maintain hydraulic settlement platforms (HSP) and push in type vibrating wire piezometers (VWPZ). Installation of the push-in VWPZs to be by your specialty geotechnical instrumentation drilling subcontractor usually with a CPT rig.

Per SS 10-1.34 "The Contractor shall install fluid level settlement platforms... and "Contractor shall install push-in vibration wire piezometers (VWPZ)...". And read weekly "... once fill placement has begun and continuing until the end of the settlement period ..." and monthly till the end of the contract

### **4.02 PREPARE WORK PLANS.**

We will prepare submittal documents describing the instruments proposed and the methods of construction necessary for their installation for your submittal to Caltrans. You should have your surveyor layout the locations of the HSPs and VWPZs. The work plans will include details for you to follow and for your driller's participation in the installation of the VWPZs. Due to the differential elevations shown on Plan Sheet 2 of 130, we will allow for our preparation of a profile/section sketch for each of the twenty-five (25) HSP & VWPZ locations which will show approximate elevations for the HSP relative to the hydraulic readout location. We will prepare these work plan submittal documents for both the HSPs and VWPZs for your submittal to Caltrans and for your guidance in construction for a LS = .. \$7,500.

# *Municon Consultants*

*Vibration Monitoring, Construction Instrumentation, Photo Surveys*

## **4.10 FURNISH GEOTECHNICAL INSTRUMENTATION - HSPs & VWPZs.**

### **4.11 FURNISH HSPs.**

We will fabricate twenty-five (25) HSP systems including the settlement platforms, hydraulic and air vent lines and readout units. These are not recoverable as they would be buried in the fills. Portions of the readout modules will be recoverable and we will recover same upon completion. We will furnish these HSPs to the project for our use on the project for \$1,150/ea x 25 = ..... \$28,750.

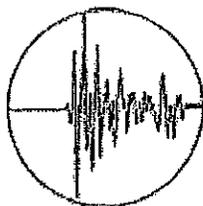

### **4.12 FURNISH VWPZ.**

We will acquire twenty-five (25) push in type VWPZs with appropriate length of signal cables and furnish these for our use on this job. We will assemble and provide vibrating wire readout systems. We will furnish twenty-five (25) VWPZs with signal cables and readout boxes for \$950/ea x 25 each = ..... \$23,750.

## **4.20 INSTALL GEOTECHNICAL INSTRUMENTATION.**

### **4.21 PARTICIPATE IN INSTALLATION OF HSPs.**

We will furnish you with details for the installation of the HSPs. You will need to place a limited amount of fill over the existing ground at the locations of each of the HSPs, excavate a shallow trench (12" x 12" or similar) transverse to the alignment of the roadway, place initial sandy material shading in the trench for us to lay the vulnerable plastic HSP hydraulic and air vent lines. We will install the hydraulic and air vent lines in your prepared trenches, make all connections and fill the hydraulic lines with distilled water. You will place shading fill over the HSP lines to one foot above the lines. We will connect the lines to the readout locations. You may wish to have your geotechnical instrumentation driller install all the VWPZs in one operation to minimize mob and demob charges. This will necessitate installation of all the HSPs in the same operation at the same time. There is no need to begin readings of the instruments until you begin placing the fills.

# Municon Consultants

Vibration Monitoring, Construction Instrumentation, Photo Surveys

We will assume that you will schedule your work such that we can install no less than four (4) HSP systems at a time.

### 4.22 PARTICIPATE IN INSTALLATION OF HSPs & VWPZs.

You will have an experienced geotechnical instrumentation driller install the push-in type piezometers with a CPT rig or equivalent. We will furnish, pretest, deliver to the site, and post installation test the VWPZs. We will run the VWPZ signal cables in the same trench as the HSPs with the HSP hydraulic and vent lines in the trenches by you, to the side of the fill where we will install the VWPZ readout dongle boxes and make connections. We assume that you and we can install the VWPZ signal cables in the same trench as the HSP tubes and at the same time. We will participate in the installation of the HSPs and VWPZs. We will "install" the HSPs on small pads (2'x2') and install the HSP fluid tubing and vent tubing in shallow (1' x 1') trenches which you should excavate in the initial leveling fill. We will lay the VWPZ signal cables in the same trench alongside the HSP tubes. You can then shade with sand and place initial hand placed backfill to 1' over the tubes and signal wires. We will participate in the installation and set up of the HSPs and VWPZs for \$500/ea x 50 each = .....  
\$25,000.

### 4.30 READ HSPs AND VWPZs.

We will visit the site and read the HSPs and VWPZs and assume that initially there may be no more than ten (10) HSPs and ten (10) VWPZs at a time. We will read up to ten sets of systems (a set or array includes both the HSP and VWPZ which are adjacent to each other or within five (5) feet of each other) during a visit for \$1050/visit and up to twenty-five (25) arrays for \$1,900/visit -data set.

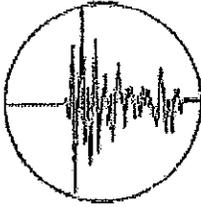

Read up to ten (10) arrays for \$1,050/data set x 8 weeks = ..... \$8,400.

Read over ten (10) arrays and up to twenty-five (25) arrays for \$1,900/data set and monthly till the end of the contract or for forty (40) readings = .... \$95,000.

**SUBTOTAL FOR READINGS ..... \$104,400**

### 4.40 MAINTAIN HSPs AND VWPZs.

We will perform monthly maintenance on the HSPs and VWPZs during weekly readings

# Municon Consultants

Vibration Monitoring, Construction Instrumentation, Photo Surveys

visits and during monthly readings. We allow for our performing routine maintenance on both sets of instruments during our weekly and monthly visits for reading these instruments. We will perform routine maintenance for \$40/mo/ea array for twenty-five arrays x twelve months (12 mo.) = ..... \$12,000.

#### 4.50 RECOVER HSP READOUTS & VWPZ READOUTS.

We will remove the above ground portions of the HSP readout installations and the VWPZ readout dongle boxes and supports. We will assume that portions of these installations can be retired from service during the project work such that we can remove portions of the installations during our weekly and monthly visits. We will not charge for removal as that can be done during the final monthly reading visit.

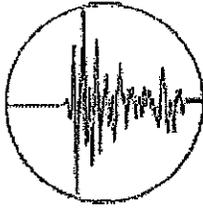

Any abandonment of the below ground portions of the HSPs or VWPZs, as may be required by the local groundwater regulating agency should, as customary, be by your instrumentation driller.

#### TOTAL PROVIDE, INSTALL AND READ HSPs AND VWPZs ... \$201,400.

If the projected ultimate settlement is as much as 1-4 meters, then the specified HSPs may not be suitable. It may be possible for us to be able to make and configure standard HSPs able to accommodate as much as two or three feet of settlement.

However, if the projected settlement is more than two or three feet, then a modified HSP system may be more effective. We have been working on a modified HSP system which can be datalogged. We could furnish these for use on the job. The extra cost for use of modified HSP systems would be on the order of \$75,000. Since we would be able to recover the dataloggers at the completion of the work, we would charge a monthly use charge of \$250/ea/month or \$6,250/month for all twenty-five HSP & VWPZ arrays.

The corresponding charges for reading the datalogged HSPs and VWPZs in combination would be less by \$700/reading set or \$700 x 64 data sets = .... (- \$44,800). Maintenance charges and charges for providing and installing the VWPZ remains the same.
