- 11) The above price does not include permits, fees, bonding, state or local taxes.

SECTION F. INERTIAL PROFILE TESTING						
Twining will provide profilograph testing services utilizing the High Speed Inertial Profiler (HSIP). The Inertial Profiler is equipped with the FHWA's engineering software ProVal which will be used to collect profiling data under AASHTO R56. The profiling data will include the raw profile data, ProVal ride quality analysis reports for IRI and MRI of each lane, ProVal smoothness assurance analysis reports for both left and right IRI's, GPS data file for each lane, and applicable IP calibration and verification test results. Per the specifications we will perform inertial profiling for each lane except areas as dictated by the specifications which require a 12 foot straightedge. The shifts for HSIP have been determined based on an 8-hour shift for pre-pave, post-grind, post pave, and final profile with an additional technician to mark sections that do not comply with the specification and 2 hours of supervisory time per shift.

**Limitations:**

Our services will be provided on a time-and-expense basis in accordance with the hourly rates quoted for pre-production testing, mix designs, and pavement coring. Our services will be charged Lump Sum per shift during production for each shift of asphalt concrete placement. If production exceeds the estimated 8 hour paving shift, an additional charge will be applied at the overtime factors identified below.

Overtime, if incurred, will be billed at 1.35X the standard rate for time in excess of 8 hours during one day and for Saturday work. Work in excess of 12 hours and that which is performed on Sundays and holidays will be billed at 1.8X the standard rate. The rates will remain in effect throughout the duration of this project. Please note that we provide our services in conjunction with the construction schedule. Any change in the number of days or hours per day will impact our budget. We will attempt to coordinate our services with your project manager to efficiently service the project.

Best Regards,
