June 22, 2012

Dear Transportation Contracting Industry Partners and Stakeholders:

The California Department of Transportation (Caltrans) has a Disadvantaged Business Enterprise (DBE) Program waiver that was originally granted on August 7, 2008, and it was extended on September 16, 2010. The waiver allows Caltrans to set contract goals for some, but not all, certified DBEs.

On May 7, 2012, the California Department of Transportation (Caltrans) received a letter from the United States Department of Transportation (US DOT) Secretary, Mr. Ray LaHood, dated April 25, 2012, stating the Uniform Reports submitted by Caltrans to the Federal Highway Administration (FHWA) on DBE awards and commitments covering Fiscal Years 2007 through 2011 show levels of underutilization of Hispanic-American and Subcontinent-Asian-American-owned DBEs sufficient to warrant terminating the Caltrans DBE Program waiver.

Therefore, race-conscious measures (i.e., contract goals) used by Caltrans to meet its overall DBE goal must include all certified DBEs, including Hispanic-American and Subcontinent-Asian-American contractors. All Federal-aid contracts with DBE goals advertised by Caltrans after June 15, 2012 must ensure the contract goals apply to all DBEs. Additionally, all Federal-aid local agency-administered contracts with DBE goals authorized after June 30, 2012, must ensure the goals apply to all DBEs.

The May 7, 2012, letter from USDOT Secretary LaHood also requires that Caltrans adjust its race-neutral and race-conscious split to make proper use of race-neutral and race-conscious means, consistent with 49 CFR 26.51, that will allow Caltrans to meet its overall DBE goal. The FHWA recognizes these program modifications require Caltrans to make several process changes and has granted Caltrans some flexibility in adjusting its race-neutral and race-conscious split.

If you have any questions, please contact Ms. René Halverson, Assistant Director, Office of Business & Economic Opportunity, at (916) 324-0990.

Sincerely,

A handwritten signature in black ink, appearing to read "Malcolm Dougherty".

Mr. John Lopez, CEO
Led Services, Inc.
420 Third Street

Subject: Disadvantaged Business Enterprise Certification No. 39360

Dear Mr. Lopez:

We are pleased to advise you that after careful review of your application and supporting documentation, the Bay Area Rapid Transit District (BART) has determined that your firm meets the eligibility standards to be certified as a Disadvantaged Business Enterprise (DBE) as required under the U.S. Department of Transportation (U.S. DOT) Regulation 49 CFR Part 26, as amended.

Your firm will be listed in the California Unified Certification Program (CUCP) database of certified DBEs under the following specific areas of expertise that you have identified on the NAICS Codes form of the Application Package:

NAICS Codes	Description
236210	Industrial Building Construction
236220	Commercial and Institutional Building Construction
237130	Power and Communication Line and Related Structures Construction
238210	Electrical Contractors
238220	Plumbing, Heating and Air Conditioning Contractors
238990	All Other Specialty Trade Contractors

Your DBE certification is good for five years from the date of this letter and applies only for the above codes. Any additions and revisions must be submitted to the Bay Area Rapid Transit District (BART) for approval.

Near the end of your five-year certification period, your entire file will be reviewed in order to ascertain continued DBE certification status. You will be notified of the pending DBE status review and any documentation updates necessary several weeks prior to the renewal due date.

Page 2.
LED Services, Inc.
July 25, 2012

The Regulations also require annual updates during this five-year period. In order to assure continuing DBE status, you must submit annually a No Change Declaration form (which will be sent to you), along with supporting documentation.

Based on your annual submission that no change in ownership and control has occurred, or if changes have occurred, they do not affect your firm's DBE standing, the DBE certification of your firm will continue until the end of your five-year certification period.

Also, should any changes occur that could affect your certification status prior to receipt of the DBE Declaration, such as changes in your firm's name, business/ mailing address, ownership, management or control, or failure to meet the applicable business size standards or personal net worth standard, please notify me immediately. DBE certification is subject to review at any time. Failure to submit forms and/or change of information will be deemed a failure to cooperate under Section 26.109 of the Regulations.

You should know that all U.S. DOT recipients in California will honor your DBE certification status if your firm is certified by any one of the CUCP certifying agencies listed below:

- California Department of Transportation (Caltrans)
- Central Contra Costa Transit Authority (CCCTA)
- City of Fresno
- City of Los Angeles

Congratulations, and thank you for your interest in the DBE Program. I wish you every business success and look forward to hearing from you if I may be of any assistance to you in this regard.

Sincerely,

Ruby Smith

Subject: Proposal for Asphalt Materials Testing Services
Route 98 from Westside Main Canal Bridge to Kloke Road
Calexico, California
Caltrans Contract No. 11-275204

Dear Mr. Mordhorst:

We are pleased to be a member of your team for the grind and replacement of Route 98 from Westside Main Canal Bridge to Kloke Road near Calexico in Imperial County, California. The project includes grinding 0.15 feet of the existing asphalt pavement and replacing it with new rubberized hot mix asphalt (RHMA) using the Superpave method of mix design. We understand that we will be tasked with preparation of a quality control plan for the repaving, field observation and compaction testing during the placement of the RHMA, obtaining cores of the pavement replacement, obtaining and logging data cores after completion of the paving, and performance of profilograph testing. Our services will not include asphalt mix design services. It is understood that the quality control testing of the aggregates will be performed by the material supplier, but may be performed upon request by Ninyo & Moore for an additional fee. Our proposed budget is based on a review of the available project plans and specifications and discussions with your project manager regarding the project operations.

PROPOSED SCOPE OF SERVICES

We propose to provide quality control testing of the RHMA during the grind and replacement process, acceptance core sampling of completed asphalt pavement, and data cores. Based on our discussions, our testing services during the asphalt pavement process are estimated on a daily shift rate which includes coring for the Caltrans acceptance cores. The core locations will be selected by the Caltrans Engineer, and the specifications indicate that one core will be required for each 250 tons of RHMA. If additional cores are requested by Hazard Construction,

obtaining the cores and requested laboratory testing will be incurred on a time and materials basis. The specifications indicate that after completion of the paving, data cores should be taken at the beginning, end, and every ½-mile along the 9.5-mile alignment, for a total of 20 data cores. Lane closures and traffic control will be supplied by Hazard Construction. Filling/patching of acceptance core locations and data core locations will be performed by Hazard Construction. We anticipate that our specific scope of services for this project will include the following:

- Preparing a contractor quality control plan.
- Attending RHMA preconstruction meeting with Caltrans and Hazard representatives.
- Performing field observations and relative compaction testing during the placement of the RHMA.
- Obtaining acceptance cores of RHMA overlay at the locations identified by Caltrans representatives. Coring to be performed on a daily basis within lane closures supplied by the contractor. One core is required for each 250 tons placed.
- Sampling asphalt materials during production of the RHMA at the truck, windrow, paver hopper, or mat behind the paver, as specified in the contractor quality control plan.
- Laboratory testing of the RHMA including extraction to assess asphalt binder content and aggregate gradation, mix moisture content, air voids, voids in mineral aggregate (VMA), voids filled with asphalt (VFA), dust proportion, maximum theoretical unit weight, Hamburg Wheel Track (HWT), and moisture susceptibility as outlined in Section 39-1.01D of the project specifications.
- Performing profilograph testing after completion of the RHMA overlay. We understand that one sequence of testing will be required to evaluate the smoothness of the RHMA, and a second sequence of testing will be required after correction of the must-grinds.
- Obtaining data cores of completed pavement sections which will include coring of asphalt, hand augering through the pavement section, logging of soils, and photographic documentation.

FEE ESTIMATE

We understand that this project is subject to “prevailing wage rates.” Field observation and compaction testing services will be provided on a daily rate basis assuming a nine-hour on-site work period for density testing and an eight-hour on-site work period for coring. The daily rate for our field technicians includes the mobilization and per diem for each work day. Mobilization and utilization of the profilograph will be charged on an hourly basis. Estimated fees for the testing services are presented in Table 1.

The estimated fees are based on our assumptions of the anticipated services and do not include stand-by time or fees associated with retesting or reinspecting materials that were found not to be in compliance with the project specifications. Our services will depend on the construction schedule and your operations, which can substantially affect the duration of our services. Requested engineering, material sampling and testing, or field density and laboratory testing not within the specified scope of services or in excess of those presented will be provided, on a time and materials basis, in accordance with the attached Schedule of Fees. Our fees do not include time to review drawings, preparation of construction specifications, meetings and other activities requested that are not in our estimated fee breakdown.

We look forward to working with you on this project.

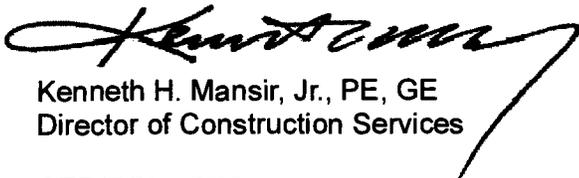

Respectfully submitted,
NINYO & MOORE

Caltrans Contract 11-275204
Route 98, Imperial County, CA

Gentlemen,

RMA Group is the premier California pavement consulting firm with over 15 years of experience with Caltrans QC/QA projects. Our understanding of the specific approach required to maximize the quality of the materials and workmanship permeates throughout our operations from the field staff to the Quality Control Manager.

We are pleased to present herein a cost estimate for performing Quality Control Testing of the Hot Mix Asphalt (HMA) production for the subject project in accordance with the requirements of the special provisions dated January 14, 2013.

The estimated costs presented on the following page are based on:

- 12 regular consecutive weekday 8-hour production shifts of RHMAG-SP (17400 tons) - Bid Item 20
- Assumed quantity of production shifts is based on approximately 1,500 tons per shift
- Job Mix Formula & Verification testing
- Asphalt rubber binder tests will be performed by the supplier
- RMA Group will provide a Plant Production Technician to conduct aggregate and HMA tests
- If a field laboratory is required, power will be provided by the production facility
- Data Cores will be obtained, assuming traffic control is provided
- Core holes will be patched by the contractor
- Quality Control Plan

The following is a summary of our estimated costs, which were calculated using the scope of work and construction duration assumptions presented herein:

QUALITY CONTROL INSPECTION & TESTING

A. FIXED COSTS:	Quantity	Unit Cost	Subtotal
Job Mix Formula (RHMA-SP-G) Includes Sampling & Quality Tests	1 Lump Sum	\$ 11,500.00	\$ 11,500.00

Subtotal Laboratory Costs:			\$ 10,410.00

TOTAL ESTIMATED COSTS (A+B+C): **\$ 94,280.00**

D. OPTIONAL COSTS:	Quantity	Unit Cost	Subtotal
Pre-Paving Meeting - QC Manager	10 Hours	\$ 125.00	\$ 1,250.00
Data Coring	21 Cores	\$ 350.00	\$ 7,350.00

QUALITY CONTROL INSPECTION & TESTING

Our costs are based strictly on the construction schedule assumptions presented herein. Any additional testing requested, changes in the construction schedule, or changes to the presented assumptions will affect our costs, which will require that the above estimated costs be revised accordingly. Overtime costs for Saturday and Sunday shifts will be multiplied by 1.4 and 1.7, respectively. If paving exceeds 8 hours per shift, each additional hour will be billed at \$320. If a field laboratory facility is required, the mobilization charge will be \$3,500 and monthly rental will be \$750.
