

Memorandum

*Serious drought.
Help Save Water!*

To: PATRICK BISHOP
North Region Office Engineer

Date: July 24, 2014

ALI KIANI
Design Engineer

ROD MURPHY
Project Manager

S. A. Rice

for From: PETER L. LOVELADY
Chief, North Region Construction Contract Engineering

Subject: Receipt of Electronic Version of Cross Sections for 03-0F6901

The "electronic" cross sections (in PDF file format) for project 03-0F6901 have been received by this office via email. This memorandum is provided for RTL certification in accordance with the requirements of Mark Leja's Cross Section Preparation and Delivery memorandum dated July 30, 2004.

It is presumed that these Cross-sections are the FINAL version providing all the cross section information required for constructing the project. It is important to note that these cross sections may be used by potential bidders during contract advertisement and the resident engineer. Therefore, if the plans and/or specifications are modified between now and the project advertisement date such that the cross sections require revision, the project manager, the district office engineer and the design senior recognize that a new set of cross-sections file(s) will need to be submitted to this office for review.

The project manager's/design engineer's attention is also directed to Mark Leja's Cross-Section Preparation and Delivery memorandum regarding the documents to be delivered to the District Surveys office by the RTL date.

If there are any questions regarding this verification memorandum, please call me at (530) 741-4386.
