

The sequence of the TOS SSPs should be inserted as follows:

1. Camera Station
2. Integrated Camera Unit
3. Hybrid camera cable and connectors
4. Interface cable
5. Rack-mount Power strip
6. Camera Control Unit (CCU)
7. Video Encoder Unit (VEU)
8. Additional Eqmt (if applicable)
9. Equipment shelf with Brackets
10. High Mast Camera junction box
11. High Mast Camera pole
12. High Mast Hybrid Camera Cable Assembly
13. Service Manual
14. TOS Equipment Testing
15. TOS Payclauses (Insert at the end of SSP 86.79)
16. CCTV NSSP

6/16/09

For your information, the Camera Mounting Adapter and Camera Pole NSSPs are deleted per Structure review by Jeff Woody. He has a new adapter sheet so all the information on these two NSSPs are covered by his plan, standard plans and standard specifications.

These two sections will be dropped from the server. Also, the last sentence of para. 18 of the Integrated camera unit NSSP which refers to camera mounting adapter has been deleted.
