Subject: RE: Request for Water Availability

MID works with contractors performing work within or near our district boundaries. Your contractor can work with MID regarding the possibility of obtaining construction water. We generally try to accommodate construction works in the area by providing construction water when requested, although depending on the time and location, there are no guarantees.

Subject: FW: Request for Water Availability

Good Afternoon,

I had sent out the request for water availability two weeks ago to all of you (please see email below). I would like to know the status of the request. Thank you very much and really appreciated.

Subject: Request for Water Availability

Hello All,

Due to the drought, California is subjected to Mandatory Water Rationing. As a result, Caltrans has implemented a policy for all projects to identify various sources for potential water during construction. This information will be included in the special provision. I'm currently working on a signalized project at River Road/Kasson Road on State Route 132. This project is anticipated to be in Construction in early 2017. You may have seen many similar requests due to the fact that every project has to have its own request. Please respond and let me know.

Thank you and have a great day.
