Subject: Water for construction

Good afternoon Pat
Tuolumne utilities district will be able to supply you with construction water during the months of September thru December. The amount of 10,000 gallons a day for up to 30 days. During the months of October thru December the district has a ditch outage, there will be one week within those three months we won't be able to deliver raw water in the vicinity of the work. We do have other raw water locations just a little further of a drive. Have your contractor come by the office and we can set him up with a meter for the water.

Thanks.

Eric Hall, Water Master
Tuolumne Utilities District
