Called about a commitment and he said that it is in the E-mail. He said this is how they write it meaning "does make/sell water for construction purposes". That is their commitment according to him.

Thank you,

Bruce

Per our telephone conversation:

MID does make/ sell available water for construction purposes.

Mid does have a permitting procedure for granting access to our facilities to draft construction water.

I am the contact person for issuing The Non Ag Water Use Permit.

The permit requires a deposit and signed agreement with MID.

Generally during our water season, water is available, but with the severe drought conditions, this may not be the case in 2015.

When your project nears start-up, you or your contractor may contact me to see if MID will be able to supply construction water.

Any other questions please contact me: (209) 354-2851

Regards

Scott W Porter

Bruce Sumida, Project Engineer, at Caltrans Stockton. My project is in Merced County at and near Snelling from 0.3 mile north of Oakdale Road to La Grange Road. We anticipate a 45 working day construction window during early Summer

2015. We would like to know how we can go about getting around 320,000 of non-potable gallons of water for our overlay project. Please let us know as discussed.

Thank you,

Bruce G. Sumida, PE
