Contacted: Tuolumne Utilities District

TUD Office

18885 Nugget Blvd.

Sonora, CA 95370

Phone: 209.532.5536

Email summary: Emailed Stefanie Lujan at Tuolumne Utilities District (TUD). She responded that potable water would be available in the Sonora area. Caltrans contractor would need to apply for and use a hydrant meter. TUD can be listed as a potential water source for project 10-1F5901.

Stefanie Lujan contact number is (209) 532-5536 ext. 504.

**Subject:** RE: Caltrans - Request for Information on Non-Potable Water/Potable Water Source for 2017 Construction Project (EA: 10-1F5901)

Good morning,

Yes as of right now we have water sources for your project, but that is subject to change if drought restrictions are imposed from the State.

Thank you and have a great week!

Stefanie Lujan

**Subject:** Caltrans - Request for Information on Non-Potable Water/Potable Water Source for 2017 Construction Project (EA: 10-1F5901)  
**Importance:** High

Hello Ms. Lujan,

Thank you for your help and speaking to me on April 21, 2016. As per our phone conversation, my name is Jhoanna Oamilda with District 10 Caltrans Maintenance Design.

I am writing in regards to finding possible construction water sources for our upcoming 2017 Maintenance Paving Project in Tuolumne County, on Route 49 and 108, near Jamestown and Sonora.

**10-1F5901, Tuo-49- PM 12.8/16.5, Tuo-108- PM R0.0/R4.4, 5.8/6.5**

As part of our efforts to conserve water in the State, we have been directed to provide on our projects a non-potable and/or potable water source in an information handout for the Contractor to be used during construction.

This means that as the designer we need to check during design phase for a readily available non-potable water source 1<sup>st</sup> and if not possible, then a potable water source that the contractor can select to use during construction.

As we spoke, Tuolumne Utilities District may have a potable water available that could be listed as a potential water source for Caltrans construction project (10-1F5901). We understand that if a source is available, the awarded contractor would need to contact Tuolumne Utilities District to apply for a temporary construction permit prior to the start of construction and pay whatever fee if they choose this source.

If you could please email me back with a response to let me know if you do have a source or any additional information on the process, I would greatly appreciate it. Once I hear back from you I will include this information in my PS&E Package.

Thank you again,

Jhoanna Oamilda, P.E.
