The locations of noteworthy revisions are denoted by a vertical line within the manual.

Changes due to the implementation of the project study report-project development support (PSR-PDS) were needed to illustrate additional items for consideration during the PA&ED phase when a project is initiated with a PSR-PDS.

The guidance revisions include minor changes to terminology, updates to references, and various corrections which are updates to the text for cover sheet instructions, nonstandard design features, air quality conformity, cooperative agreements, transportation management plans, and funding and programming. Also, new sections were added for discussion of schedule, risks, and FHWA coordination. A project report template was developed.

PDPM subscribers are encouraged to use the most recent manual version available on-line at the above website. Should a subscriber choose to maintain a paper copy of the manual, the subscriber is responsible for keeping their paper copy up to date and current.
