Changes were needed to incorporate the updated requirements for obtaining a United States Coast Guard Bridge Permit for projects that include work on bridges over navigable waters and to refresh other information so it represents current policy and practice. The guidance revisions also include miscellaneous minor changes to remove inconsistency, update requirements, correct terminology, update references and correct formatting. The locations of revisions are marked with a vertical line within the manual.

Some of the references found in the PDPM have hyperlinks that connect to Caltrans intranet pages which are not displayable to the general public. Until such time that the specific reference becomes available on the internet, the user will have to contact their district liaison, Caltrans project manager, or the appropriate Headquarters division to inquire about the availability of the reference.

PDPM subscribers are encouraged to use the most recent manual version available on-line at the above website. Should a subscriber choose to maintain a paper copy of the manual, the subscriber is responsible for keeping their paper copy up to date and current.
