

## CALIFORNIA INTERREGIONAL BLUEPRINT OVERVIEW

The California Department of Transportation (Caltrans) is enhancing the State's transportation planning process to respond to future challenges. Similar to requirements for regional transportation plans under Senate Bill (SB) 375 (Steinberg 2008), SB 391(Liu 2009) requires the State's long-range transportation plan to meet California's climate change goals under Assembly Bill (AB) 32 (see graphic below).

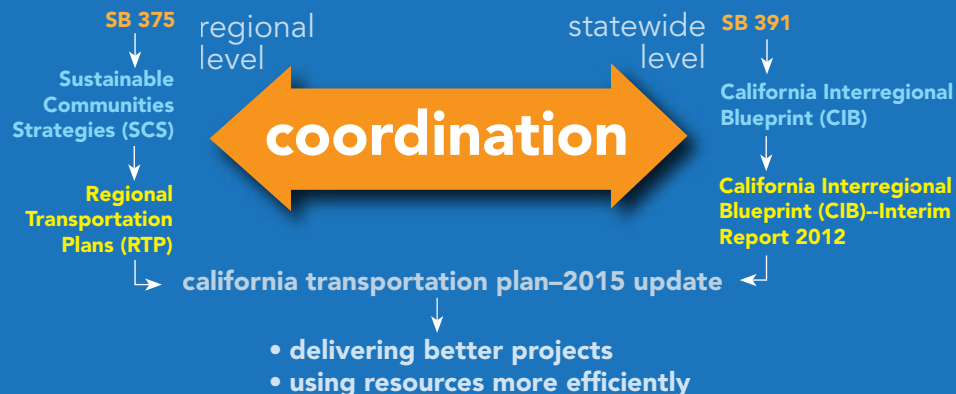

In response to these statutes, Caltrans is preparing a state-level transportation blueprint to articulate the State's vision for an integrated, multimodal interregional transportation system that complements regional transportation plans and land use visions. The CIB will integrate the State's long-range modal plans and Caltrans-sponsored programs with the latest technology and tools to enhance our ability to plan for and manage the transportation system (see sidebars).

SB 391 Requirements:

- Identify the statewide integrated multi-modal transportation system.
- Prepare an Interim Report to the California State Legislature and the California Transportation Commission by December 31, 2012, based on SB 375 (Steinberg) sustainable communities strategies (SCS) and alternative planning strategies (APS).
- Develop the California Transportation Plan by December 31, 2015, that identifies the integrated, multimodal system needed to achieve the maximum feasible greenhouse gas emission reductions.

**Reducing Greenhouse Gases:** Shared Responsibilities SB 375 (Steinberg) and SB 391 (Liu)

### Integrating Statewide Modal Plans

### Integrating Statewide Programs

Regional Blueprint Planning

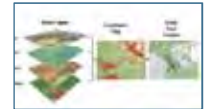

Smart Mobility Framework

Complete Streets

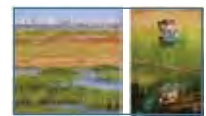

Early Consideration of Environmental Issues

Caltrans Climate Action Program

Regional Advance Mitigation Planning/ Statewide Advance Mitigation Initiative

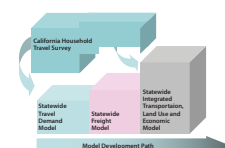

### New Technology and Tools

CT Earth to Visualize GIS Layers

Statewide Model Framework

## California Interregional Blueprint **outcomes**

- Better data and tools for a statewide look and information on interregional travel
- Coordinated approach to planning and modeling
- AB 32, SB 375, and SB 391 compliance
- Enhances scope of existing California Transportation Plan
- GHG Emissions Analysis
- Improves decision making
- Better Projects and Project Delivery

## Develop Statewide Modal Framework

(beginning in December 2012)

- California Household Travel Survey (CHTS)
- Statewide Travel Demand Model (STDM)
- Statewide Freight Model (SFM)\*
- Statewide Integrated Model (SIM)\*\*

\*completion in June 2013

\*\*when fully funded

## Greenhouse Gas (GHG) Emissions Analysis

- Narrative Analysis (Caltrans and UC Davis)
- Methodology to estimate greenhouse gas emissions
- STDM and SFM (Caltrans, ARB, UC Davis)
- SIM — when fully funded (Caltrans and UC Davis)
