Meaningful and consistent outreach and coordination are vital components in the transportation planning and programming process. Gathering input from a wide-range of stakeholders, transportation partners, tribal governments, and the public ensures transportation decisions reflect community values and interests.

Be part of the solution and help formulate a vision for addressing current and future transportation trends and challenges.

- Learn about and discuss statewide transportation issues
- Identify concerns and where to invest transportation dollars
- Influence long-range transportation planning vision, policies, strategies and priorities
- Help create a future sustainable multimodal transportation system that enhances our quality of life

Get involved in the CTP 2040 update.

Sign up on our Web portal to receive notification and periodic e-mail updates, check on workshop opportunities, take survey polls, and leave comments.

OUR PARTNERS
An open and collaborative planning process included input from the following partners:

- Assembly Transportation Committee
- California Air Resources Board
- California Association of Councils of Governments
- California Department of Aging
- California Department of Housing and Community Development
- California Department of Public Health
- California Department of Rehabilitation
- California Department of Water Resources
- California Energy Commission
- California High-Speed Rail Authority
- California State Transportation Agency
- California Transit Association
- California Transportation Commission
- California WALKS
- Federal Highway Administration
- Governor’s Office of Planning and Research
- Local Government Commission
- Metropolitan Planning Organizations
- Natural Resources Defense Council
- Regional Transportation Planning Agencies
- Rural Counties Task Force
- Sanata Transportation and Housing Committee
- State Independent Living Council
- Strategic Growth Council
- The Nature Conservancy
- Tribal Government Representation
- U.S. Environmental Protection Agency

Help Shape the Future of California

Why Get Involved?

Helping shape the future of California requires meaningful and consistent outreach and coordination. Gathering input from a wide-range of stakeholders, transportation partners, tribal governments, and the public ensures transportation decisions reflect community values and interests.

Be part of the solution and help formulate a vision for addressing current and future transportation trends and challenges.

- Learn about and discuss statewide transportation issues
- Identify concerns and where to invest transportation dollars
- Influence long-range transportation planning vision, policies, strategies and priorities
- Help create a future sustainable multimodal transportation system that enhances our quality of life

Get involved in the CTP 2040 update.

CTP 2040 TIMELINE

2013
- Outreach & Public Participation
  - Workshops
  - Consultation
  - Policy & Technical Committees
  - Regional Agencies
  - Tribal Governments
- Products
  - CTP Development
  - CTP 2040 - Administrative Draft
  - CTP 2040 - Draft
  - Scoping Document & Survey

2014
- Outreach & Public Participation
  - Workshops
  - Consultation
  - Policy & Technical Committees
  - Regional Agencies
  - Tribal Governments
- Products
  - CTP Development
  - CTP 2040 - Draft
  - CTP 2040 - Final Plan
  - Agency Approval

2015
- Outreach & Public Participation
  - Workshops
  - Consultation
  - Policy & Technical Committees
  - Regional Agencies
  - Tribal Governments
- Products
  - Final CTP
  - CTP Public Review Draft
  - 45-Day Comment Period

Brian P. Kelly, Secretary
California State Transportation Agency
Malcolm Dougherty, Director
California Department of Transportation

Moving into the future...
Creating the Vision for California's Transportation System

**What is the CTP 2040?**
The California Transportation Plan (CTP) is a statewide, long-range transportation plan to meet California's future multimodal mobility needs and reduce greenhouse gas (GHG) emissions. The CTP defines performance-based goals, policies, and strategies to achieve our collective vision for California's future statewide, sustainable, and integrated multimodal transportation system. Caltrans prepares the CTP in response to federal and state laws and is required to update the plan every five years with a minimum 20-year planning horizon.

**The Vision**
Key to this vision is considering the 3 Es of sustainability: a prosperous economy, human and environmental health, and social equity. These principles are interconnected and support a sustainable transportation system that encourages economic vitality, protects our natural resources, promotes the health and well-being of all Californians, and meets people's needs equitably. Caltrans has embraced these principles and incorporated them into the CTP. A commitment to the 3 Es calls for new approaches drawn from a full set of transportation strategies that include integrating transportation and land use to create more sustainable communities.

**Caltrans' Transportation Trends and Challenges**

- **Demographics**
- **Economic Prosperity**
- **Transportation Funding**
- **Climate Change and GHG Reductions**
- **Freight Mobility**
- **Fuel, Energy and Technology**
- **Sustainability in Tribal, Rural and Small Town Communities**
- **Public Health**
- **Housing and Land Use**

**The Three Es of Sustainability**

- **Prosperous Economy**
- **Human & Environmental Health**
- **Social Equity**

**CTP 2040**

**Integrating California's Transportation Future**

**Modal Plans**
The CTP 2040 will integrate findings and recommendations from the five Caltrans statewide long-range modal plans.

**MAP-21 and National Goals**
The CTP 2040 will integrate a detailed performance-based planning approach that is consistent with the national goals specified by the federal surface transportation reauthorization bill MAP-21: safety, infrastructure condition, congestion reduction, system reliability, freight movement and economic vitality, environmental sustainability, and reduced project delivery delays. Establishing goals and performance measures will set the stage for a process that is data-driven and transparent, instilling accountability into developing policies, programs and investment priorities when assessing system performance, and tracking progress toward achieving the national performance goals.

**Needs, Analysis and Development**
The CTP 2040 will integrate a technical analysis utilizing travel demand forecasting models that will evaluate transportation and land use scenarios and policies. The forecasting process will ensure California's Transportation Plan includes comprehensive surface transportation GHG reduction strategies that consider the mobility and accessibility of all transportation users and freight.

**Links to Resources**
The CTP 2040 will integrate findings and recommendations from key documents from various statewide programs.

---

**Caltrans is responsible for articulating a long-term vision for California’s transportation system. As we continue to operate more efficiently, expand alternatives to driving, and encourage smart land use, Caltrans will help California fight global warming and adapt to its effects.**

- Malcolm Dougherty
  Director, Caltrans
