comments: To Whom it May Concern,

I, as a long term California Resident, am highly critical of the CalTrans plans for widening and adding lanes up near the Richardson Grove area!

If anyone is paying attention there are many obvious reasons for going to the 10th degree to protect our Redwood Forests in Ca.!!!

We as California citizens should consider ourselves stewards of these majestic giants and recognize we destroy ourselves if we destroy them. Look at the biochemistry alone and see that we need more trees not less to support our ecosystem, our supply of oxygen on the planet.

Please have a larger perspective in making decisions and don't let the short term economics greedily destroy something that needs our protection and thoughtfulness.

jean
