Subject: Typos in the CTP

Chris,

I've pulled together a list of typos and a couple of hilarious errors in the CTP. They are easy to fix, once you stop laughing:

Page 13: Delete the comma between "California" and "concerned." Replace "affects" with "effects." Replace "adaption" with "adaptation."

Page 15: Insert a comma between VHD and trips.

Page 21: Either capitalize both vision and sustainability, or make them both lower case.

Page 22: Delete "an accumulation of"

Page 25: Delete extra spaces between "see" and "Figure 3 and Table 2)".

Page 31: Replace "CHSRA" with "The HSR project"

Page 41: Replace "ranks" with "rank."

Page 52: Replace "low carb emitters" with "low carbon emitters."

Page 56: Replace "working class age" with "working age."

Page 69: Replace "may" with "will" in "The CTP 2040 may ultimately serve as a vision document to guide future transportation-related policy and funding."

Page 77: Replace "HSR authority" with "CHSRA."

I hope the page 69 item was an error and not the result of political struggle.
