comments: CTP 2040 is very commendable and sensible in its community and environmental pollution reduction goals. It seems to have a good grasp of the importance of regional transportation needs.

Where the plan falls short is in recognizing that transportation infrastructure without significant inclusion of wildlife needs is short sighted and dangerous to travelers and wildlife. Although there is brief mention of natural habitats and the SWAP there is no significant inclusion.

CTP 2040 should be amended to fully include the concept of regional wildlife corridors. There should be an absolute requirement to include wildlife crossings and other protections into each transportation proposal under this plan.
