Subject: Chamber Questions

1. On Page 103 of the CA Transportation Plan 2040 the last bullet in Policy 2 states: "*Improve the State's 12 deepwater ports with active freight rail connections to the National Rail System*". This kind of has a double meaning - the meaning that we would like to see for the might be reworded something like this "*Improve the State's 12 deepwater ports so that they remain globally competitive and all have active freight rail connections to the National Rail System*".

Thanks!

David
