comments: The proposed improvements to CA highway 199 are admirable but they do not address the addition of double trailer trucks.

The narrow lanes, tight curves and vertical cliffs on both sides of the majority of the road are incredibly hazardous. The few improvements do not address this overall safety issue.

I am frequently frightened by the approach of single trailer truck approaching me as I drive my own pickup on many sections of highway 199.

Make the improvements that you have proposed as they become affordable.

PLEASE DO NOT allow Trucks with two trailers and their Hugh turning radius to travel on 199.
