

# San Diego Public Workshop

**The California Transportation Plan 2040 (CTP 2040)** is not project specific, it is a policy driven document to shape California's Transportation vision for the next 25 years. The plan envisions a fully integrated, multimodal, sustainable transportation system that supports economic vitality, protects natural resources, promotes the health and well-being of all Californians, and meets people's needs equitably.

**Your** input will influence the final plan and ultimately how California's future multimodal mobility needs and reduce greenhouse gas (GHG) emissions.

**Get INVOLVED!**
