

## **Modeling Panel Bios**

**Mike McCoy is co-Director of the UC Davis Information Center for the Environment. He is currently providing technical assistance to regions regarding modeling for the Caltrans Planning Division, and is also managing the statewide integrated model feasibility study effort.**

**Jerry Walters is a researcher and modeler for Fehr & Peers consultants. He helped develop several tools and models currently being used in California, including I-PLACE3S and the SACOG's land use/transportation model. He is also participating in a national effort to improve those analysis tools.**

**Gordon Gary is the Director of Research and Modeling for the Sacramento Area Council of Governments (SACOG), which is in the forefront of model research and development and initiated the first regional Blueprint planning effort in California.**
