

**Fiscal Year 2012-13 Transportation Planning Grant Awards  
Statewide or Urban Transit Planning Studies**

CT District	Grantee <i>Sub-recipient</i>	Project Title	County	Senate District	Assembly District	Project Description
3	Butte County Association of Governments	Butte Regional Transit: Inter-city Commuter Service Feasibility Study	Butte Yuba Sutter Sacramento	4 6	2 3 9	The Butte County Association of Governments will develop a feasibility study for a potential inter-city commuter service transit route between Chico and Sacramento, California.
3	Sacramento Area Council of Governments	Connectivity Study of Transportation Services to Improve Health Care Access across the Sacramento Area Council of Governments Region	El Dorado Placer Sacramento Sutter Yolo Yuba	6	9	This study will help create a more effective and seamless system for demand-response transit and supplemental transportation service users and low-income residents needing to reach medical care and other essential services across jurisdictional boundaries. The Final Connectivity Study will include project findings, community input, evaluation of alternatives, financial analysis, and recommendations.
4	City of Emeryville	Emeryville-Oakland-Berkeley Transit Study	Alameda	9	14	This study will investigate ways to improve last-mile transit service to regional transit and connections among the three areas in Emeryville, West Oakland, and West Berkeley. Working with transit agencies, neighboring cities, community groups and the public, especially low-income minority residents, the team will model transit demand, analyze gaps, compare modes and institutional structures, and plan for transit to support and be supported by economic development.
4	San Francisco County Transportation Authority	Geneva-Harney Bus Rapid Transit Feasibility Study	San Francisco San Mateo	3 8	12 13	This is a feasibility study for the proposed Harney-Geneva Bus Rapid Transit service. The new seven-mile bus corridor would connect existing neighborhoods and major new land development sites to the area's regional transit systems. In consultation with community stakeholders and agencies, the study will focus on envisioning potential future transit in the bus corridor with emphasis on Geneva Avenue and producing conceptual re-design options and technical analysis on benefits and trade-offs.
6	Fresno Council of Governments <i>City of Fresno Department of Transportation/Fresno Area Express</i>	Fresno/Clovis Metropolitan Area Public Transportation Strategic Service Evaluation	Fresno	14 16	31	The Fresno/Clovis Metropolitan Area Strategic Service Evaluation will examine travel patterns through extensive origin and destination studies; transit ride check and transfer studies; public and stakeholder input with a goal of reducing transit travel times, and improving linkages to major trip generators. Improving transit travel time and responsiveness to community needs is critically necessary to making transit a viable alternative in contemporary urban environments.

7	Southern California Association of Governments <i>Long Beach Transit</i>	Long Beach Transit Regional Transit Center Feasibility Analysis	Los Angeles	27	54	This project will produce an analysis to provide Long Beach Transit with more detailed information to assist in determining how a second transportation hub within its service area might help meet the growing transit demand of the region and what location would be preferable for maximum system efficiency.
11	Southern California Association of Governments <i>Imperial County Transportation Commission</i>	Imperial Valley - San Diego State University-Imperial Valley Transit Shuttle Analysis	Imperial	40	80	The Imperial County Transportation Commission will work with the Imperial Valley University Partnership to assess the feasibility of an inter-college shuttle service in the region. The proposed transit service would connect college campuses in the cities of Calexico, Brawley, and Imperial, a distance approximately twenty-five miles in length. The study will identify gaps in service, determine necessary transit connections, and will result in a transit service implementation plan.
11	San Diego Association of Governments	San Diego Regional Vanpool and Carpool Program Analysis and Expansion Plan	San Diego	36 38 39 40	74 75 76 77 78 79	The study will identify the potential for ridesharing in the San Diego region; analyze the existing regional vanpool program and carpool incentive pilot program to identify barriers and opportunities for growth; analyze best practices nationwide; recommend innovative strategies for increasing ridesharing to the projected levels in the Regional Transportation Plan; and, develop an administration plan and budget for the recommended strategies and anticipated growth.
11	San Diego Association of Governments	North University Town Center/Sorrento Valley Transit Study	San Diego	38	78	This project is a transit study that will evaluate transportation options, including bus rapid transit services and alignments, for the North Interstate Route 805 corridor and University Town Center.
