welcome

This Web portal has recently been redesigned by the California Department of Transportation to focus on the development of the California Interregional Blueprint (CIB). The CIB will integrate Regional Blueprint planning with Caltrans' goal to plan an interregional multi-modal transportation system in the most effective and efficient way possible. The CIB will also become the foundation for the next update of the State's transportation plan, the California Transportation Plan 2040. Signing up on this Web portal will keep you up to date on what's happening and provide you with many opportunities to ask questions and make comments.

in the spotlight

Progress Report Released!
This California Interregional Blueprint (CIB) Progress Report completes the first phase of the overall CIB effort with a snapshot of the best planning information available to date to address new State and Federal requirements, including an analysis of greenhouse gases, while improving upon project delivery. This report will now guide the Department through a second phase of critical planning updates; the development of robust modeling and data programs; and a fully developed California Interregional Blueprint that will then become the foundation of the next update to the State's long-range transportation plan--the California Transportation Plan 2040. The **full Progress Report and the Executive Summary** are available for viewing.

Recent Management Video Highlights the California Interregional Blueprint
Martin Tuttle, Caltrans Planning and Modal Programs Deputy Director, **highlights the California Interregional Blueprint** including 1) the statutory requirements of Senate Bill 391; 2) the integration of data from statewide modal plans using Geographic Information Systems (GIS); and 3) innovations within the Department like recent discussions with Google Transit to make Real-Time Transit information available to travelers for better trip decisions.

Stakeholder Workshops Summary Report
Attendance at six California Interregional Blueprint stakeholder workshops exceeded expectations with 227 stakeholders attending and another 653 that might not have been able to participate observing via webcasts. More than 80 percent of the stakeholders supported or strongly supported the California Interregional Blueprint effort. You may view more information on the **Stakeholder Workshops Summary Report**. You may also wish to view the **webcasts** and **workshop materials** for these workshops.

Approved Complete Streets Implementation Action Plan in CT News
Caltrans recently approved its **Complete Streets Implementation Action Plan**—a significant milestone in putting Deputy Directive 64-R1 "Complete Streets–Integrating the Transportation System" into action.

ABOUT CIB

About CIB

The California Interregional Blueprint (CIB) is a plan that links statewide transportation goals and regional transportation and land use goals to produce a unified transportation strategy. Below are supporting documents that explain more of what the CIB is about and the process in developing the CIB.

Stakeholder Workshops Summary

The first leg of the California Interregional Blueprint is complete! Stakeholder Workshops were held all over California (Sacramento, San Diego, Los Angeles, Redding, Fresno, and Oakland). Those who did not physically attend had viewed the workshops through the webcast and followed along with the workshop materials. Below, a summary of the results is made available in pdf format. To view this document along with all of the attachments properly, *please have the latest pdf reader installed on your computer.*

- *California Interregional Blueprint Stakeholder Workshop Summary Report (0.6 mb)*
- *Attachment A - Workshop Flyer (0.2 mb)*
- *Attachment B - Workshop Agenda (0.2 mb)*
- *Attachment C - Slideshow Presentation (2.7 mb) *This document may take a few moments to download**
- *Attachment D - Other Workshop Handouts (15.7 mb) **Warning - This file is quite large. Downloading will require some time. Please be patient. Thank you***
- *Attachment E - Interactive Polling Detailed Results (1.0 mb)*
- *Attachment F - Flip Chart Notes (0.2 mb)*

Below are a few photos taken at the workshops. Please click on the thumbnails below to enlarge. Some images may be large; please be patient while downloading.

INTEGRATING STATEWIDE PROGRAMS

Integrating Statewide Programs

The California Interregional Blueprint will also incorporate recommendations from the following statewide programs to implement the CIB concept and measure progress. Fact sheets with information, status and web links for many of these statewide programs are included below.

- California Regional Blueprint Planning Program promotes the linking of transportation, land use, housing, and the environment through the development of a vision for future growth that supports transportation plans and projects.
- Smart Mobility 2010 - A Call to Action for the New Decade assists in the implementation of multimodal, sustainable transportation principles and strategies and provides performance measures to guide progress towards the successful implementation of the CIB.
- Complete Streets has been adopted in Caltrans policy as a key consideration in planning, designing, operating, and maintaining facilities. Complete Streets are designed to ensure transportation choices and enable safe access for all travelers including bicyclists, pedestrians, people using mobility aids, motorists, and transit riders of all ages and abilities.
- California Essential Habitat Connectivity Study provides additional tools to incorporate natural resources early in the transportation planning process in order to sustain the State's unique natural heritage.
- Caltrans Climate Action Program includes both mitigation strategies for the reduction of greenhouse gas emissions and adaptation strategies that will ultimately ensure a more sustainable transportation system essential for a successful CIB.
- Real Time Multimodal System Management provides new technology to enhance our ability to manage the transportation system in real-time and in a way that integrates all modes, including Real-Time Transit and iCone technology.

CIB Tools

The CIB is a holistic statewide undertaking with the goal of linking statewide transportation goals with regional transportation and land use plans. The CIB, both Phase I and Phase II, informs Caltrans' implementation of a transportation framework that will achieve the California Transportation Plan's "3 E" objectives for a sustainable statewide transportation system based on a: prosperous economy, quality environment, and social equity. Linking regional information at a statewide level, the CIB serves as a platform to support interagency collaboration to jointly plan for a future integrated California transportation and land use network.

Below are two supporting documents for Phase I and Phase II.

Click on a thumbnail images below to view the complete documents in pdf format.
