1	\$4,076,500	City of Los Angeles	LACMTA	07-Los Angeles	City of Los Angeles – ATCS-Echo Park/Silver Lake Phase 2 Project. <u>Outcome/Output:</u> The proposed ATSAC is a traffic control system which provides fully traffic responsive/adaptive signal control based on real-time traffic conditions. As traffic patterns change, ATCS has the advantage over existing systems in that traffic signal timing is automatically changed in real-time to match the current conditions. This immediately leads to an improvement in the Level of Service (LOS) and reduced traffic congestion, fuel consumption and air pollution. Results have shown that ATCS provides a minimum of 3 percent of added capacity as compared to existing ATSAC system.	TLSP	\$4,076,500	0715000071	4	2014-15	104-6064	TLSP	\$4,076,500
