On December 19, 2007, rainstorms caused various slides and slipouts on the roadway embankment at this location. This project is to excavate and replace unstable soil material, place rock slope protection and horizontal drains, replace metal beam guardrail, place storm water measures, and provide traffic control as necessary. The fires of October 2007 exposed this hidden culvert after burning the brush covering its inlet/outlet. This project is to replace the pipe with a new 84-inch corrugated metal pipe, construct headwall and endwall and conduct traffic control as necessary.
