Mr. Shatnawi,

Owens Corning was built upon the foundation of thinking differently. The affects of this are evident in the innovative products provided over the past 65 years and the subsequent benefits enjoyed by countless numbers everyday. Harnessing Owens Corning extensive asphalt and fiberglass competencies has produced products used by today's pavement preservation-minded pavement owners.

In keeping with our aforementioned philosophy: Owens Corning is proud to sponsor the attached innovation submission; *Fiberglass/Polyester Paving Mat*, for the Pavement Preservation Task Group (PPTG) and CalTrans material review. District 2 has identified a project, requested innovations funds, and intends to sponsor the attached innovation as part of their maintenance strategy.
