Office work

- Conducted the Weekly Scheduling Meeting. Reviewed 4-week look ahead schedule. No major change from last week. All schedule updates are in. Jim Gallego to review and comment on T019A, March update. See meeting minutes for detail.
- Attended a SWPPP workshop at the Mission Bay trailer. This was a meeting called by Dragomir with the Environmental Engineering Services to go over common SWPPP issues in the Bay area that included SAS, SSD, and OTD1 projects. The core idea was to improve communication between State inspectors and the contractor. Also, it was determined that more training was needed for the staff and management support is key in successful implementation and enforcement of SWPPP requirements.
- There was a request from MCM that all State vehicles be parked in the parking lot for the remainder of this week, as the job site access is very tight. They will make available the area between WB Bent 20 and Bent 21 underneath Frame 2 superstructure dressed up for additional parking spaces ASAP. The information was distributed to staff.
- Received a Green rating for a SWPPP inspection performed by the District on 4/17/09. There are a few minor deficiencies that need correction. Dennis McCollum will ensure correction is made.
- Reviewed and approved daily diaries and time sheets.
