Subject: EBMUD Claim for Damages to its Wastewater Outfall Pipeline

Dear Mr. Khachian:

Enclosed please find the claim form from East Bay Municipal Utility District (EBMUD) for the above subject claim. EBMUD is submitting a claim for damages to its main Wastewater Treatment Plant (MWWTP) outfall pipeline caused by Caltrans during pile driving construction for the new Caltrans Mole Substation.

EBMUD worked with Caltrans on provisions in the Caltrans instruction specifications, for their Contract No. 04-0120L4, Bay Bridge Oakland Touchdown, aimed at protecting and documenting conditions on the EBMUD outfall pipeline. These provisions are included in the following specification sections:

- 5-1.40 Owner controlled Insurance Program. This includes EBMUD named as an additional insured on the Contractor-Furnished Insurance.
- 10-1-.38 Vibration Monitoring. EBMUD's outfall and dechlorination facilities are listed as facilities to be protected.
- 10-1.39 Sewer Video Survey. This includes the internal inspection of EBMUD's outfall pipeline before and after the Mole Substation pile driving operations.

Significant effort was made to document pre-construction (before pile driving) and post-construction (after pile driving) conditions of the EBMUD MWWTP outfall pipeline in the vicinity of the Mole Station construction. The post-construction inspection findings indicate new damage that was not present during the pre-construction inspection. This is the damage for which EBMUD is submitting its claim. If you have a Caltrans specific claim form that you need to have completed, please forward one to my attention.
